**European Pack for Visiting Auschwitz-Birkenau Memorial and Museum** Alicja Białocka,2010-01-01 Taking groups of students To The Auschwitz-Birkenau Memorial and Museum is a heavy responsibility, but it is a major contribution to citizenship if it fosters understanding of what Auschwitz stands for, particularly when the last survivors are at the end of their lives. it comes with certain risks,

however. This pack is designed for teachers wishing to organise student visits to authentic places of remembrance, and for the guides, academics and others who work every day with young people at Auschwitz. There is nothing magical about visiting an authentic place of remembrance, and it calls for a carefully thought-out approach. To avoid the risk of inappropriate reactions or the failure to benefit from a large investment in travel and accommodation, considerable preparation and discussion is necessary before the visit and serious reflection afterwards. Teachers must prepare students for a form of learning they may never have met before. This pack offers insights into the complexities of human behaviour so that students can have a better understanding of what it means to be a citizen. How are they concerned by what happened at Auschwitz? Is the unprecedented process of exclusion that was practised in the Holocaust still going on in Europe today? In what sense is it different from present-day racism and anti-Semitism? The young people who visit Auschwitz in the next few years will be the last witnesses, links in the chain of memory. Their generation will be the last to hear the survivors speaking on the spot. The Council of Europe, The Polish Ministry of Education And The Auschwitz-Birkenau Memorial and Museum are jointly sponsoring this project aimed at preventing crimes against humanity through Holocaust remembrance teaching.

Introductory Grammar of Amharic Wolf Leslau, 2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A

milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

### **Face Recognition Across the Imaging Spectrum**

Thirimachos Bourlai, 2016-02-12 This authoritative text/reference presents a comprehensive review of algorithms and techniques for face recognition (FR), with an emphasis on systems that can be reliably used in operational environments. Insights are provided by an international team of pre-eminent experts into the processing of multispectral and hyperspectral face images captured under uncontrolled environments. These discussions cover a variety of imaging sensors ranging from state-of-the-art visible and infrared imaging sensors, to RGB-D and mobile phone image sensors. A range of different biometric modalities are also examined, including face, periocular and iris. This timely volume is a mine of useful information for researchers, practitioners and students involved in image processing, computer vision, biometrics and security.

### **Profiles in Operations Research** Arjang A.

Assad, Saul I. Gass, 2011-06-28 Profiles in Operations Research: Pioneers and Innovators recounts the

development of the field of Operations Research (OR), the science of decision making. The book traces the development of OR from its military origins to a mature discipline that is recognized worldwide for its contributions to managerial planning and complex global operations. Over the past six decades, OR analyses have impacted our daily lives: when making an airline or hotel reservation, waiting in line at a bank, getting the correctly blended fuel at the gas station, and ensuring that the book you are holding arrived at its destination on time. OR originated in the late 1930s when British scientists from various disciplines joined Royal Air Force officers to determine the most effective way to employ new radar technology for intercepting enemy aircraft. During World War II, similar applied research groups were formed to study, test, and evaluate military operations on both sides of the Atlantic. Their work resulted in great improvements—OR helped the Allies win the war. The scientific field that emerged from these studies was called operational research in the U.K. and operations research in the U.S. Today, OR provides a broad and powerful science to aid decision making. Profiles describes the lives and contributions of 43 OR pioneers and innovators and relates how these individuals, with varying backgrounds and diverse interests, were drawn to the nascent field of OR. The profiles also describe how OR techniques and applications expanded considerably beyond the military context to find new domains in business and industry. In addition to their scientific contributions, these profiles capture the life stories of the individuals—interwoven with personal tales, vivid vignettes, family backgrounds, and views of the mission and future of OR. Collectively, the profiles recount the fascinating story of the growth and development of a field enriched by the convergence of different disciplines. The Editors: Arjang A.

Assad is Dean of the School of Management, University at Buffalo, State University of New York. Saul I. Gass is Professor Emeritus, Department of Decision, Operations & Information Technologies, Smith School of Business, University of Maryland, College Park. From the Reviews Profiles In Operations Research: Pioneers and Innovators. Book Review by Nigel Cummings: U.K. OR Society's e-journal, Inside OR., Sept 2011. I can thoroughly recommend this book. I found it both enlightening and undeniably gripping, so much so in fact, you may find it difficult to put it down once you have commenced reading it. Arjang A. Assad and Saul I. Gass have created a masterwork which will serve to immortalise [sic] the pioneers of O.R. for many years to come. \*For a list of all known typos, plus further discussion on the book, please visit <http://profilesinoperationsresearch.com>.

**A Call to Duty** David Weber, Timothy Zahn, 2014-09-16

Growing up, Travis Uriah Long yearned for order and discipline in his life . . . the two things his neglectful mother couldn't or wouldn't provide. So when Travis enlisted in the Royal Manticoran Navy, he thought he'd finally found the structure he'd always wanted so desperately. But life in the RMN isn't exactly what he expected. Boot camp is rough and frustrating; his first ship assignment lax and disorderly; and with the Star Kingdom of Manticore still recovering from a devastating plague, the Navy is possibly on the edge of budgetary extinction. The Star Kingdom is a minor nation among the worlds of the Diaspora, its closest neighbors weeks or months away, with little in the way of resources. With only modest interstellar trade, no foreign contacts to speak of, a plague-ravaged economy to rebuild, and no enemies looming at the hyper limit, there are factions in Parliament who want nothing more than to scrap the Navy and shift its resources and manpower elsewhere. But those factions are mistaken. The universe is not a safe place. Travis Long is about to find that out. At the publisher's request, this title is sold without DRM (Digital Rights Management). About A Call to Duty: A new series set in the universe of Weber's popular heroine Honor Harrington gets off to a solid start. . . . Cowriters Zahn and Weber do an excellent job alluding to events known to longtime fans. . . . [T]his astronomical adventure is filled with . . . intrigue and political drama. Publishers Weekly About the Honor Harrington series: \_Weber combines realistic, engaging characters with intelligent technological projection and a deep understanding of military bureaucracy in this long-awaited Honor Harrington novel—Fans of this venerable

space opera will rejoice to see Honor back in action. Ó\_Publishers Weekly \_ . . everything you could want in a heroine ã. Excellent ã plenty of action. Ó\_Science Fiction Age \_Brilliant! Brilliant! Brilliant! Ó\_Anne McCaffrey \_Compelling combat combined with engaging characters for a great space opera adventure. Ó\_Locus \_Weber combines realistic, engaging characters with intelligent technological projection . . . Fans of this venerable space opera will rejoice . . . Ó\_Publishers Weekly About Timothy Zahn: \_Zahn keeps the story moving at a breakneck pace, maintaining excitement. Ó¾Publishers Weekly [Y]ou can count on Timothy Zahn for three things: clean, sparse prose; good pacing; and great action scenes. The first book in the Cobra War series hits all those marks in admirable style and makes for a quick, entertaining sci-fi novel. ¾Blogcritics \_[Conqueror's Heritage] is another finely wrought space adventure . . . **Designing with Smell** Victoria Henshaw, Kate McLean, Dominic Medway, Chris Perkins, Gary Warnaby, 2017-10-05 Designing with Smell aims to inspire readers to actively consider smell in their work through the inclusion of case studies from around the world, highlighting the current use of smell in different cutting-edge design and artistic practices. This book provides practical guidance regarding different equipment, techniques, stages and challenges which might be encountered as part of this process. Throughout the text there is an emphasis on spatial design in numerous forms and interpretations – in the street, the studio, the theatre or exhibition space, as well as the representation of spatial relationships with smell. Contributions, originate across different geographical areas, academic disciplines and professions. This is crucial reading for students, academics and practitioners working in olfactory design.

*From Cave Man to Cave Martian* Manfred "Dutch" von Ehrenfried, 2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

*Achtung-Panzer!* Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks

and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

*Retail Visioning* Christine Moynihan, 2011-06-15 Easy to use work book designed for independent retailers. Full of self assessment tools and recommendations for improving retail branding, interior and exterior store design and retail marketing.

*Elements of Parametric Design* Robert Francis Woodbury, 2010 Pushed by practices wanting to produce novelty, computer-aided design systems are increasingly parametric - they represent designs that change with their input data. Such systems give more control and capability to designers, but require much more comprehensive understanding to be used effectively. This book teaches what new knowledge and skills designers need in order to master the parametric and how they can learn and use them.
