The Golden Bull Marjorie Cowley, 2012-02-01 A brother and sister's search for a new life and new home . . . 5,000 years ago in ancient Mesopotamia during a terrible drought, Jomar and Zefa's father must send his children away to the city of Ur because he can no longer feed them. At fourteen, Jomar is old enough to apprentice with Sidah, a master goldsmith for the temple of the moon god, but there is no place for Zefa in Sidah's household. Zefa, a talented but untrained musician, is forced to play her music and sing for alms on the streets of Ur. Marjorie Cowley vividly imagines the intrigues, and harsh struggle for survival in ancient Mesopotamia.

**Profiles in Operations Research** Arjang A. Assad, Saul I. Gass, 2011-06-28 Profiles in Operations Research: Pioneers and Innovators recounts the development of the field of Operations Research (OR), the science of decision making. The book traces the development of OR from its military origins to a mature discipline that is recognized worldwide for its contributions to managerial planning and complex global operations. Over the past six decades, OR analyses have impacted our daily lives: when making an airline or hotel reservation, waiting in line at a bank, getting the correctly blended fuel at the gas station, and ensuring that the book you are holding arrived at its destination on time. OR originated in the late 1930s when British scientists from various disciplines joined Royal Air Force officers to determine the most effective way to employ new radar technology for intercepting enemy aircraft. During World War II, similar applied research groups were formed to study, test, and evaluate military operations on both sides of the Atlantic. Their work resulted in great improvements—OR helped the Allies win the war. The scientific field that emerged from these studies was called operational research in the U.K. and operations research in the U.S. Today, OR provides a broad and powerful science to aid decision making. Profiles describes the lives and contributions of 43 OR pioneers and innovators and relates how these individuals, with varying backgrounds and diverse interests, were drawn to the nascent field of OR. The profiles also describe how OR techniques and applications expanded considerably beyond the military context to find new domains in business and industry. In addition to their scientific contributions, these profiles capture the life stories of the individuals—interwoven with personal tales, vivid vignettes, family backgrounds, and views of the mission and future of OR. Collectively, the profiles recount the fascinating story of the growth and development of a field enriched by the convergence of different disciplines. The Editors: Arjang A. Assad is Dean of the School of Management, University at Buffalo, State University of New York. Saul I. Gass is Professor Emeritus, Department of Decision, Operations & Information Technologies, Smith School of Business, University of Maryland, College Park. From the Reviews Profiles In Operations Research: Pioneers and Innovators. Book Review by Nigel Cummings: U.K. OR Society's e-journal, Inside OR., Sept 2011. I can thoroughly recommend this book. I found it both enlightening and undeniably gripping, so much so in fact, you may find it difficult to put it down once you have commenced reading it. Arjang A. Assad and Saul I. Gass have created a masterwork which will serve to immortalise [sic] the pioneers of O.R. for many years to come. \*For a list of all known typos, plus further discussion on the book, please visit <http://profilesinoperationsresearch.com>.

**Elements of Parametric Design** Robert Francis Woodbury, 2010 Pushed by practices wanting to produce novelty, computer-aided design systems are increasingly parametric - they represent designs that change with their input data. Such systems give more control and capability to designers, but require much more comprehensive understanding to be used effectively. This book teaches what new knowledge and skills designers need in order to master the parametric and how they can learn and use them.

**Achtung-Panzer!** Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

*Gods, Guardians, and Lovers* Vishakha N. Desai, Darielle Mason, 1993 Celestial lovers, guardian deities, gods, goddesses, semidivine and human forms bedeck the magnificent, elaborately sculpted medieval temples of northern India. This handsome catalog of an exhibition at the Asia Society in New York City explains that each temple, rich in symbolism and sacred geometry, was viewed as a microcosmic model of cosmic creation and order. Led by Desai, director of the Asia Society Galleries, and Mason of Boston's Museum of Fine Arts, six scholars discuss the historical background, patterns of royal patronage, architectural placement of images and Hindu stories and hymns as keys to the cult of temple images and to the medieval worship service, an elaborate multisensory experience. Nearly 200 color and black-and-white plates document a major architectural and sculptural legacy.

**The Art of Ancient India** Susan L. Huntington, John C. Huntington, 2014-01-01 To scholars in the field, the need for an up-to-date overview of the art of South Asia has been apparent for decades. Although many regional and dynastic genres of Indic art are fairly well understood, the broad, overall representation of India's centuries of splendor has been lacking. The Art of Ancient India is the result of the author's aim to provide such a synthesis. Noted expert Sherman E. Lee has commented: –Not since Coomaraswamy's History of Indian and Indonesian Art (1927) has there been a survey of such completeness." Indeed, this work restudies and reevaluates every frontier of ancient Indic art \_ from its prehistoric roots up to the period of Muslim rule, from the Himalayan north to the tropical south, and from the earliest extant writing through the most modern scholarship on the subject. This dynamic survey—generously complemented with 775 illustrations, including 48 in full color and numerous architectural ground plans, and detailed maps and fine drawings, and further enhanced by its guide to Sanskrit, copious notes, extensive bibliography, and glossary of South Asian art terms—is the most comprehensive and most fully illustrated study of South Asian art available. The works and monuments included in this volume have been selected not only for their artistic merit but also in order to both provide general coverage and include transitional works that furnish the key to an all encompassing view of the art. An outstanding portrayal of ancient India's highest intellectual and technical achievements, this volume is written for many audiences: scholars, for whom it provides an up-to-date background against which to examine their own areas of study; teachers and students of college level, for whom it supplies a complete summary of and a resource for their own deeper investigations into Indic art; and curious readers, for whom it gives a broad-based introduction to this fascinating area of world art.

*Divine Pleasures* Terence McNerney, Steven M. Kossak, Navina Najat Haidar, 2016-06-14 As one of the finest holdings of Indian art in the West, the Kronos Collections are particularly distinguished for paintings made between the sixteenth and early nineteenth centuries for the Indian royal courts in Rajasthan and the Punjab Hills. These outstanding works, many of which are published and illustrated here for the first time, are characterized by their brilliant colors and vivid, powerful depictions of scenes from Hindu epics, mystical legends, and courtly life. They also present a new way of seeking the divine through a form of personal devotion—known as bhakti—that had permeated India's Hindu community. While explaining the gods, demons, lovers, fantastical creatures, and mystical symbols that are central to literature and worship, this publication celebrates the diverse styles and traditions of Indian painting. Divine Pleasures features an informative entry for each work and two essays by scholar Terence McNerney that together outline the history of Indian painting and the Rajput courts, providing fresh insights and interpretations. Also included are a personal essay by expert and collector Steven M. Kossak and an examination of Hindu epic and myth in Mughal painting, which lays important foundations for Rajput painting, by curator Navina Najat Haidar. Through their research and observations, the authors deepen our understanding and underscore the significance of Indian painting. Divine Pleasures presents a nuanced view of a way of life intimately tied to the seasons, the arts, and the divine.

Louise Haselton Gillian Brown, Leigh Robb, Jenna McKenzie, 2019-11-02 Louise Haselton offers glimpses of the curious inner lives of everyday and overlooked things. From the domestic to the exotic, the natural to the 'made', she distinctively intuits connections between seemingly disparate material vernaculars. Haselton believes in the invisible forces that bind and repel the world around us. With a witty reverence for the objects and materials she engages with, Haselton explores the communicative possibilities of weight, balance and form within her predominantly sculptural works. Her practice is unexpected, unconventional, and exemplary of an artist especially attuned to the matters which surround us. Louise Haselton: Act natural is a compendium of Haselton's works to date including illustrated essays chronicling the inspirations, influences and ideas behind her extraordinary practice of the last twenty-five years.
