The Great International Paper Airplane Book Jerry Mander,Howard Luck Gossage,George Dippel,1998-08 Paper airplanes as serious science? No longer shamefully relegated to the back rows of elementary-school sports stadiums, paper airplanes come into their own with this amusing -- and instructive -- book. The Great International Paper Airplane Book documents the proceedings of the first (and possibly only) International Paper Airplane Competition conducted by Scientific American. In addition to the behind-the-scenes story and official records of the Competition, readers will discover intriguing mini-essays on the historical, aesthetic, technological, and folkloric aspects of the paper airplane and on its startling implications for the future of aviation. Best of all, there are dozens of cut-fold-and-fly-them-yourself planes to experiment with. Combining real science with outright fun, this book appeals to paper airplane enthusiasts and would-be aviators of every age.

Paper Engineering and Pop-ups For Dummies Rob Ives,2009-03-03 Paper Engineering & Pop-ups For Dummies covers a wide range of projects, from greeting cards to freestanding models. Easy-to-follow, step-by-step instructions and dozens of accompanying diagrams help readers not only to complete the diverse projects in the book, but also master the skills necessary to apply their own creativity and create new projects, beyond the book's pages.

European Pack for Visiting Auschwitz-Birkenau Memorial and Museum Alicja Bialecka,2010-01-01 Taking groups of students To The Auschwitz-Birkenau Memorial and Museum is a heavy responsibility, but it is a major contribution to citizenship if it fosters understanding of what Auschwitz stands for, particularly when the last survivors are at the end of their lives. it comes with certain risks, however. This pack is designed for teachers wishing to organise student visits to authentic places of remembrance, and For The guides, academics and others who work every day with young people at Auschwitz. There is nothing magical about visiting an authentic place of remembrance, and it calls for a carefully thought-out approach. To avoid the risk of inappropriate reactions or the failure to benefit from a large investment in travel and accommodation, considerable preparation and discussion is necessary before the visit and serious reflection afterwards. Teachers must prepare students for a form of learning they may never have met before. This pack offers insights into the complexities of human behaviour so that students can have a better understanding of what it means to be a citizen. How are they concerned by what happened at Auschwitz? is the unprecedented process of exclusion that was practised in the Holocaust still going on in Europe today? in what sense is it different from present-day racism and anti-Semitism? the young people who visit Auschwitz in the next few years will be witnesses of the last witnesses, links in the chain of memory. Their generation will be the last to hear the survivors speaking on the spot. The Council of Europe, The Polish Ministry of Education And The Auschwitz-Birkenau Memorial and Museum are jointly sponsoring this project aimed at preventing crimes against humanity through Holocaust remembrance teaching.

Introductory Grammar of Amharic Wolf Leslau,2000 This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's Traite de langue amharique (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language.The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

The Nature of Code Daniel Shiffman,2024-09-03 All aboard The Coding Train! This beginner-friendly creative coding tutorial is designed to grow your skills in a fun, hands-on way as you build simulations of real-world phenomena with “The Coding Train” YouTube star Daniel Shiffman. How can we use code to capture the unpredictable properties of nature? How can understanding the mathematical principles behind our physical world help us create interesting digital environments? Written by “The Coding Train” YouTube star Daniel Shiffman, The Nature of Code is a beginner-friendly creative coding tutorial that explores a range of programming strategies for developing computer simulations of natural systems—from elementary concepts in math and physics to sophisticated machine-learning algorithms. Using the same enthusiastic style on display in Shiffman’s popular YT channel, this book makes learning to program fun, empowering you to generate fascinating graphical output while refining your problem-solving and algorithmic-thinking skills. You’ll progress from building a basic physics engine that simulates the effects of forces like gravity and wind resistance, to creating evolving systems of intelligent autonomous agents that can learn from their mistakes and adapt to their environment. The Nature of Code introduces important topics such as: Randomness Forces and vectors Trigonometry Cellular automata and fractals Genetic algorithms Neural networks Learn from an expert how to transform your beginner-level skills into writing well-organized, thoughtful programs that set the stage for further experiments in generative design. NOTE: All examples are written with p5.js, a JavaScript library for creative coding, and are available on the book's website.

Hover Car Racer Matthew Reilly,2021 In the world of the near future, the most popular sport in the world is hover car racing. Super fast and dangerous, its heroes are the racers: part fighter pilot, part race - car driver, all superstar. But to get to the Pro Circuit, you must first pass through the International Race School, a brutal cauldron of wild races on even wilder courses, where only the best of the best will survive. This is the story of Jason Chaser, a talented young racer selected to attend the Race School. He's younger than the other students. He's smaller. His trusty car, the Argonaut, is older. But Jason Chaser is no ordinary racer. And as he races against the best drivers in the world he will learn that at Race School winning is everything, that not everyone in this world fights fair, and that you never ever have any friends on the track.

Music Scenes Andy Bennett,Richard A. Peterson,2004 While more than 80 percent of the world's commercial music is controlled by four multinational firms, most music is made and enjoyed in diverse situations divorced from such corporate behemoths. These fourteen original essays examine the fascinating world of music scenes, those largely inconspicuous sites where clusters of musicians, producers, and fans explore their common musical tastes and distinctive lifestyle choices. Although most music scenes come and go with hardly a trace, they nevertheless give immense satisfaction to their participants, and a few - New York bop jazz, Merseybeat, Memphis rockabilly, London punk, Bronx hip-hop - achieve fame and spur musical innovations. To date, serious study of the scenes phenomenon has focused mainly on specific music scenes while paying less attention to recurrent dynamics of scene life, such as how individuals construct and negotiate scenes to the various activities. This volume remedies that neglect. The editors distinguish between three types of scenes - local, translocal, and virtual - which provide the organizing framework for the essays. Aspects of local scenes, which are confined to specific areas, are explored through essays on Chicago blues, rave, karaoke, teen pop, and salsa. The section on translocal scenes, which involve the coming together of scattered local scenes around a particular type of music and lifestyle, includes articles on Riot Grrrls, goths, art music, and anarcho-punk. Aspects of virtual scenes, in which fans communicate via the internet, are illustrated using alternative country, the Canterbury sound, postrock, and Kate Bush fans. Also included is an essay that shows how the social conditions in places where jazz was made influenced that music's development.

Profiles in Operations Research Arjang A. Assad,Saul I. Gass,2011-06-28 Profiles in Operations Research: Pioneers and Innovators recounts the development of the field of Operations Research (OR), the science of decision making. The book traces the development of OR from its military origins to a mature discipline that is recognized worldwide for its contributions to managerial planning and complex global operations. Over the past six decades, OR analyses have impacted our daily lives: when making an airline or hotel reservation, waiting in line at a bank, getting the correctly

blended fuel at the gas station, and ensuring that the book you are holding arrived at its destination on time. OR originated in the late 1930s when British scientists from various disciplines joined Royal Air Force officers to determine the most effective way to employ new radar technology for intercepting enemy aircraft. During World War II, similar applied research groups were formed to study, test, and evaluate military operations on both sides of the Atlantic. Their work resulted in great improvements—OR helped the Allies win the war. The scientific field that emerged from these studies was called operational research in the U.K. and operations research in the U.S. Today, OR provides a broad and powerful science to aid decision making. Profiles describes the lives and contributions of 43 OR pioneers and innovators and relates how these individuals, with varying backgrounds and diverse interests, were drawn to the nascent field of OR. The profiles also describe how OR techniques and applications expanded considerably beyond the military context to find new domains in business and industry. In addition to their scientific contributions, these profiles capture the life stories of the individuals—interwoven with personal tales, vivid vignettes, family backgrounds, and views of the mission and future of OR. Collectively, the profiles recount the fascinating story of the growth and development of a field enriched by the convergence of different disciplines. The Editors: Arjang A. Assad is Dean of the School of Management, University at Buffalo, State University of New York. Saul I. Gass is Professor Emeritus, Department of Decision, Operations & Information Technologies, Smith School of Business, University of Maryland, College Park. From the Reviews Profiles In Operations Research: Pioneers and Innovators. Book Review by Nigel Cummings: U.K. OR Society's e-journal, Inside OR., Sept 2011. I can thoroughly recommend this book. I found it both enlightening and undeniably gripping, so much so in fact, you may find it difficult to put it down once you have commenced reading it. Arjang A. Assad and Saul I. Gass have created a masterwork which will serve to immortalise [stet] the pioneers of O.R. for many years to come. *For a list of all known typos, plus further discussion on the book, please visit <http://profilesinoperationsresearch.com>.
