Shelby and AC Cobra Brian Laban, 2015-08-31 In the new edition of this classic text, Brian Laban brings the story of the AC Cobra up to date. In the early 1960s, a flamboyant Texan, Carroll Shelby, dreamed of a special kind of sports car, a marriage of European style with lusty, affordable American V8 power. He took his dream forward and he persuaded British sports car specialist AC Cars to build his car, and US industry giant the Ford Motor Co to fund it. Its name also came to him in a dream - Cobra. The original production of the Cobra lasted just five years and encompassed barely a thousand cars built within the original framework. But it was only the beginning of a story that is still very much alive, encompassing 'continuations', spin-offs, and a massive worldwide replica industry. Shelby and AC Cobra details the man behind the cars, the story of their development and engineering, racing pedigree and owning and driving these powerful, iconic cars today. Fully illustrated with 250 archive colour photographs.

Cobra Trevor Legate, 2015-10-05 The extraordinary marriage of a classic British AC Ace sports car to a large capacity American V8 engine was the idea of America's larger than life Carroll Shelby. Called the Cobra, the resulting car had shattering performance allied to timeless beauty and has become a motoring icon. Originals have become hugely valuable, replica abound and, today, the Cobra is once more in production. Out of print for 10 years, here is the original and best Cobra history in fully updated and beautifully produced form. A lasting tribute to one of the world's greatest cars.

Cobra Trevor Legate, 2006 This book tells the complex saga of a sports car that was created in the early 1960s as a result of an unlikely collaboration between a plain-talking ex-racing driver from Texas and a conservative British automobile manufacturer, funded by one of the giants of the industry, the Ford Motor Company. Carroll Shelby, AC Cars, and Ford came together to create a car

called the Cobra, based on the AC Ace roadster that had been in production since 1954. When the Shelby Cobra was created, it was far from state-of-the-art, but the use of a new series of Ford V8 engines saw the lightweight car annihilate the Chevrolet Corvette in American sports car racing. By adding aerodynamic bodywork, the Daytona Cobra Coupe arrived in Europe to contest the FIA World Championship and took victory in the GT category in 1965, making Shelby American the first (and only) USA-based manufacturer to achieve this feat. In order to capitalize on this success, even greater power was required and the car was developed to take a huge 7-liter engine that proved to be a triumph of horsepower over handling - thus the 427 Cobra became an overnight legend, establishing new performance records and creating a reputation for being more than a little tricky to drive. The era of the Cobra was brief - production ended at Shelby American during 1966 and at AC Cars in 1968 where they built their own final version, the AC289 Sports. Just over 1000 Cobras were built during that time but the final cars proved difficult to sell, their vintage qualities deterring potential owners. Carroll Shelby closed his company and went to Africa while AC developed other models, but the Cobra was not quite finished yet. Within a matter of a few years, a new market for the car was created as the demand for affordable kit cars grew. The most popular model by far was the Cobra and many thousands were built, with the result that both AC Cars and Carroll Shelby put their own versions back into production. And then the arguments really started... If it was an improbable car over forty years ago, it is even more implausible today, but the remarkable Cobra, in one form or another, is still with us. It may be dead, but it just won't lie down!

Carroll Shelby Art Evans, Carroll Shelby, 2018-03-16 Packed with images selected by Carroll Shelby from his racing career, this collection includes captions with the legend's commentary and memories from when he flipped through these very photos. Some of these images have never been printed until

now, and others haven't been published since the 1950s and 1960s. Author Art Evans was a sports car racer in the 1950s on the West Coast who raced against and became close friends with Carroll Shelby. Their intense competition on the track became a lifelong friendship off the track. He and Shelby collaborated on many business projects over the years, including books, marketing projects, projects for the Shelby Foundation, and so on. In his later years, Shelby loved the books about his cars and similar topics, but his eyesight was failing to the point where he had difficulty reading and really preferred the books that were heavy with photos. It was from that realization that Shelby and Evans decided to work on one last book together. Unfortunately, Carroll Shelby passed away before the book was fully completed, but Evans, following Shelby's instructions, carried this final project through to completion. If you are a sports car racing enthusiast, a Ford fan, Shelby fan, or any combination of the three, this final work from Shelby is a perfect addition to your automotive library.

The First Three Shelby Cobras Gordon Bruce, 2018-04-17 *The First Three Shelby Cobras*, the third book in the acclaimed *Exceptional Cars* series, tells the story of three remarkable cars, the first AC Cobras created by the legendary Carroll Shelby in 1962 and now favorites of sports-car enthusiasts throughout the world. The prototype CSX2000 has been described as the “most important American car”, although it was built on a British AC Ace chassis with an American Ford V8 engine. It was retained by the Shelby family until 2016, when it sold at auction for a record \$13.75 million. CSX2001 was the first production Cobra, and was delivered to American racing driver Ed Hugus. It was later sold to Frenchman Jean-Marie Vincent, who raced in the Tour de France and in numerous European hillclimbs. CSX2002 was the first Cobra to race and nearly won its inaugural outing at Riverside, driven by Bill Krause, until sidelined by a broken rear hub. It did take the first ever Cobra win, with Dave MacDonald at Tucson in March 1963. Its success led to a series of competition wins that made

Shelby's Cobras famous and admired across the globe. All three cars are now the pride of car collections in the United States of America. CSX2000 and CSX2002 are part of the Larry Miller Collection, and CSX2001 belongs to California-based motorsport aficionado Bruce Meyer.

The last Shelby Cobra Chris Theodore, 2021-09-15 Carroll Shelby, legendary driving ace, race team owner, and designer of Shelby Cobra, Daytona, and Mustang GT350 classics is revered by automotive enthusiasts, yet little has been written about the last quarter century of Carroll Shelby's life. During that time Chris Theodore, VP at Chrysler and Ford, developed a close personal friendship with Carroll. The Last Shelby Cobra chronicles the development of the many vehicles they worked on together (Viper, Ford GT, Shelby Cobra Concept, Shelby GR1, Shelby GT500 and others). It is an insider's story about how Shelby came back to the Ford family, and the intrigue behind the five-year journey to get a Shelby badge on a Ford Production Vehicle. The author provides fresh insight and new stories into Shelby's larger-than-life personality, energy, interests and the many unpublished projects Carroll was involved with, up to his passing. Finally, the book describes their unfinished project, the Super Snake II Cobra, and the serendipitous circumstances that allowed to the author to acquire 'Daisy,' the last Shelby Cobra. To his many fans, Carroll Shelby was truly 'the most interesting man in the world.'

AC Cobra Rinsey Mills, 2002 The legendary AC Cobra is one of the world's ultimate no-compromise sports cars. Originally derived from the AC Ace, the brutal Cobra was the result of Carroll Shelby's dream to combine British chassis expertise with the easily available power of a large-capacity American V8 engine. Forty years on from its debut, this much imitated car is revered the world over, and original examples have become highly sought-after. This beautifully produced commemorative book will appeal to all sports car fans as well as to Cobra enthusiasts.

Carroll Shelby Rinsey Mills, 2012-04-26 When Ford wanted to add some spice to its newly introduced Mustang pony car, it turned to former racer Carroll Shelby. The resulting cars proved to be the definitive performance Mustangs of the muscle-car era. The choice made sense. Shelby had proven himself a force to be reckoned with on the racetrack, in the tuning shop, and in the auto industry. By the time Ford hired Shelby to create a racer from its Mustang, the man was already an automotive legend. Early in his career, Shelby's accomplishments as a racecar driver included breaking land speed records at Bonneville and winning Le Mans in 1959 with teammate Roy Salvadori. As a team manager, Carroll was part of the FIA World Grand Touring Championship as well as the Ford GT victories at Le Mans. When his health forced him to give up racing in 1960, Carroll turned his attention to design. He had a vision of a racecar made from a lightweight European chassis with American V-8 power. The result is what is considered to be perhaps the greatest sports car and one of the fastest road cars ever constructed: the Shelby Cobra. The aluminum-bodied 289 and 427 Cobra models and the subsequent Shelby Mustangs made Shelby a household name in the 1960s. Shelby continues to impact the world of racing and automobile design. His charisma, vision, and ability to know the best person for the job have made him a master organizer and team leader able to produce consistently impressive results. Even today, Ford's premier Mustang carries the Shelby name and iconic snake logo. This book is the complete, authorized biography of Carroll Shelby including images from Shelby's personal collection. It's the story every enthusiast has always wanted to read. Shelby website: www.shelbyautos.com

How to Rebuild Big-Block Ford Engines Charles Morris, 2009-09 The photos in this edition are black and white. From factory drag racing, to the AC Cobra, to the legendary Mustang, the history of the Ford big-block is a long and storied one. Making its debut in the late 1950s, the Ford FE big-block

engine sat between the fenders of factory lightweights, Cobra Jet Mustangs, 427 Cobras, Cougar Eliminators, Talledega Torinos, and Mach 1s. While the FE engines remained in production through the mid 1970s, mostly in light-truck applications, Ford had plans for a new engine on the horizon. In the late 1960s, Ford transitioned the FE big-block out of production in passenger cars and performance applications in favor of an all-new design, called the 385 series, also known as Lima big-block. Originally used in luxury-car applications, the 429-cubic-inch version of this engine found its way into performance applications such as Mustangs and Torinos starting in 1971. The high-compression 4-barrel versions, called Cobra Jet or Super Cobra Jet, are some of the most powerful engines Ford has ever produced. An engine similar in design to the Lima series engine, the legendary 351 Cleveland made its debut in 1970. While technically a small-block in many ways, its oval ports, canted heads, and physical size made people think of it more as a mid-block than a small-block. The 351- and 400-cubic-inch versions (the latter known as M series engines) of the Cleveland engine were used in passenger car applications and in light trucks starting in 1975. The M stood for modified, as the deck height, bearing sizes, as well as pistons and connecting rods were modified for low-compression passenger car and light truck use, and they were used all the way through the early 1980s. All three engines are covered in full detail in this Workbench series rebuild volume. Included are step-by-step heavily illustrated instructions, that walk you through the entire process of rebuilding your Ford engine. If you want to breathe new life into your tired old Ford engine, this is the book for you.

Cobra Pilote Robert D. Walker, 2017-03 This book primarily takes a close look at the Hugus-Shelby Cobra connection. In the early 1960s James Edward (Ed) Hugus personally financed the first seven production Cobras built since Carroll Shelby did not have the money or facilities for the project. Hugus ordered the first modified but unfinished Aces the A.C. Cars factory in England, and had his

service department mechanics at European Cars in Pittsburgh, Pennsylvania install the Ford 260 engines and Galaxie transmissions, completing the cars for sale. Once Ford signed a contract for Shelby American Cobra production in Venice, California, Hugus still completed Cobras for distribution and sales to all points east of the Mississippi River. -- In his capacity as a driver, Hugus piloted the first racing Cobra (CSX 2001) in competition, and in 1963, the first Cobra (CSX 2142) to appear at Le Mans. -- Carroll Shelby may have had the Cobra dream but it was Hugus who stepped forward and made Shelby's venture a reality.
