Steel and Composite Structures Y.C. Wang,2003-09-02 Steel and Composite Structures: Behaviour and Design for Fire Safety presents a systematic and thorough description of the behaviour of steel and composite structures in fire, and shows how design methods are developed to quantify our understanding. Quantitative descriptions of fire behaviour, heat transfer in construction elements and structural analysis using numerical methods are all addressed and existing codes and standards for steel and composite fire safety design are critically examined. Using a comprehensive and systematic description of structural fire safety engineering principles, the author explains and illustrates the important difference between the behaviour of isolated structural elements and whole structures under fire conditions. This book is a vital source of information to structural and fire engineers. It will also be of considerable interest and value to students and researchers in this field.

Killing Time Nicholas J Saunders,2011-11-08 The Great War of 1914-1918 now stands at the furthest edge of living memory. And yet, hardly a month passes without some dramatic and sometimes tragic discovery being made along the old killing fields of the Western Front. Graves of British soldiers buried during battle – still lying in rows seemingly arm in arm or found crouching at the entrance to a dugout; whole 'underground cities' of trenches, dugouts and shelters have been preserved in the mud; field hospitals carved out of the chalk country of the Somme marked with graffiti; unexploded bombs and gas canisters – all of these are the poignant and sometimes deadly legacies of a war we can never forget. Killing Time digs beneath the surface of war to uncover the living reality left behind. Nicholas J. Saunders brings together a wealth of discoveries to offer fresh insights into the human and often barbaric aspect of warfare. He uses discoveries in the trenches, family photographs, diaries and souvenirs to give the dead a voice. You cannot fail to be fascinated and moved by what he unearths.

Robinson in Space Patrick Keiller,1999 The award-winning film Robinson in Space is a satirical record of a journey made by a fictional character called Robinson through the increasingly unknown landscapes of present-day England. This book juxtaposes the narrative and over 200 images from the film.

United States Naval Aviation, 1919-1941 E.R. Johnson,2011-04-29 Within six months of the devastating attack on Pearl Harbor, the U.S. Navy had checked the Japanese military advance in the Pacific to the extent that the United States could return to its original “Defeat Germany First” strategy. That the Navy was able to accomplish this feat with only six fleet aircraft carriers and little more than 1,000 combat aircraft was not sheer luck but the culmination of more than two decades of determined preparation. This thorough study, with detailed drawings and photographs, explains and illustrates the trial and error process which went into developing the aircraft, airships and ships of the interwar period. The critical factors that shaped Naval Aviation after World War I—naval treaties, fleet tactics, government programs, leadership and organization, as well as the emergence of Marine Corps and Coast Guard aviation—are discussed in depth.

Fire from First Principles John Abrahams,Paul Stollard,2003-04-29 This is the third edition of an introduction to building fire safety that explains from first principles the basic strategies of fire safety design available to the building and construction professional.

Unearthly Disclosure Timothy Good,2011-02-28 Unearthly Disclosure is a story of alien bases, alien contacts and abductions, genetic mutants, animal mutilations, and government paranoia. Here, Timothy Good, one of the world's most respected authorities on the alien phenomenon, reveals for the first time sensational information provided to him by high-level military and scientific sources, who confirm that aliens have established subterranean and submarine bases on Earth and that extra-terrestrial contact has been made with a select group in the US military and scientific intelligence community. Among numerous revelations in this book are those involving the alien creature photographed by Filiberto Caponi in Italy. The author spent several years investigating this controversial case and commissioned an Expert Witness checked by the Law Society to analyse Caponi's astonishing photographs. Published for the first time, this unique story forms the central section of Unearthly Disclosure.

Electric Airplanes and Drones Kevin Desmond,2018-09-14 Attempts at electric powered flight date to well before the 19th century. Battery weight and low energy output made it impractical until the 1990s, when the advent of lightweight materials, more efficient solar power, improved engines and the Li-Po (lithium polymer) battery opened the skies to a wide variety of electric aircraft. The author describes the diverse designs of modern electric flying machines—from tiny insect-styled drones to stratospheric airships—and explores developing trends, including flying cars and passenger airliners.

Another Life Andrew R B Simpson,2011-08-31 T.E. Lawrence found global recognition for his leadership of the Arab Revolt during World War I, preparing the ground for the final Allied offensive in 1918. He was hailed as a hero, but little is known about this mysterious and charismatic man after those events. Here is Lawrence's life after Arabia, his service in the RAF and the Tank Corps as a mere ranker, and how he became an expert in the technology of the new RAF. The book examines the work he did for the 1929 Schneider Trophy Race, the development of the new RAF 200 seaplane tender, and the development of its armour plated offspring, the Armoured Target Boat. It also investigates his literary endeavours and his tragically early death, a sad end to a Renaissance man of all talents, an academic, a talented engineer and a soldier sans pareil. T.E. was offered exalted diplomatic positions by Churchill, implored by Nancy Astor to re-enter the fray as the Nazi threat grew, socialised with the Cliveden set, argued with the Archbishop of Canterbury. He made lasting friendships with humble squaddies. His self-loathing was expressed physically. Consulting primary sources and also having interviewed some of those who knew Lawrence after Arabia the author portrays the last years of one of the most astonishing figures of the 20th century.

Bookhounds of London Kenneth Hite,Pelgrane Press,2018-09 An Ennie- and Golden Geek-award-winning supplement for Trail of Cthulhu.These cycles of experience, of course, all stem from that worm-riddled book. I remember when I found it in a dimly lighted place near the black, oily river where the mists always swirl. The Book. Forbidden Tomes. Bookhounds of London is a brand new campaign setting for Trail of Cthulhu, packed with period detail, where the Investigators seek out books about horror and strangeness and become, seemingly inevitably, drawn into the horror themselves. It provides in-depth material on London in the 1930s, carefully slanted towards Mythos investigators.An Ancient City. Bookhounds London is a city of cinemas, electric lights, global power and the height of fashion. Its about the horrors the cancers that lurk in the capital, in the very beating heart of human civilization. A Templar altar might well crouch, mostly forgotten, in the dreary Hackney Marshes, but altars to false gods tower over the metaphorical swamps of Fleet Street and Whitehall. And as for lost, prehuman ruins whos to say what lies under London, if you dig deep enough? Terrible Choices.The PCs arent stalwart G-men or tweedy scholars exploring forbidden frontiers. Instead, they acquire maps (and maybe guidebooks) to those forbidden frontiers from fusty libraries and prestigious auction houses. They are Book-Hounds, looking for profit in mouldy vellum and leather bindings, balancing their own books by finding first editions for Satanists and would-be sorcerers. They may not quite know what they traffic in, or they may know rather better than their clientele, but needs must when the bills come in. This volume includes:32 authentic full-colour maps with unique new street index of London in the 1930s, and plans of major buildings. A Mythos take on London in the 1930s, packed with contacts, locations and rumours. New abilities such as Document Analysis, Auction and Forgery, as well as new oc
