The Global Industrial Complex Steven Best, 2011 The Global Industrial Complex: Systems of Domination is a groundbreaking collection of essays by a diverse set of leading scholars who examine the entangled and evolving global array of corporate-state structures of hegemonic power--what the editors refer to as the power complex--that was first analyzed by C. Wright Mills in his 1956 classic work, The Power Elite. In this new volume edited by Steven Best, Richard Kahn, Anthony J. Nocella II, and Peter McLaren, the power complex is conceived as co-constituted, interdependent and imbricated systems of domination. Spreading insidiously on a global level, the transnational institutional relationships of the power complex combine the logics of capitalist exploitation and profits and industrialist norms of efficiency, control, and mass production, While some have begun to analyze these institutional complexes as separate entities, this book is unique in analyzing them as overlapping, mutually-enforcing systems that operate globally and which will undoubtedly frame the macro-narrative of the 21st century (and perhaps beyond). The global industrial complex--a grand power complex of complexes--thus poses one of the most formidable challenges to the sustainability of planetary democracy, freedom and peace today. But there can be no serious talk of opposition to it until it is more popularly named and understood. The Global Industrial Complex aims to be a foundational contribution to this emerging educational and political project.

**Trigger Happy** Steven Poole, 2011-11-07 The Edge calls Trigger Happy a seminal piece of work. For the first time ever, an aficionado with a knowledge of art, culture, and a real love of gaming takes a critical look at the future of our videogames, and compares their

aesthetic and economic impact on society to that of film. Thirty years after the invention of the simplest of games, more videogames are played by adults than children. This revolutionary book is the first-ever academically worthy and deeply engaging critique of one of today's most popular forms of play: videogames are on track to supersede movies as the most innovative form of entertainment in the new century.

**Twelve Years a Slave** Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that

he struggled to cope with family life after being freed.

Textual Vehicles Roger N. Casey, 1997 Examines an American icon Textual Vehicles explores the position of the automobile in the mythologies of American literature through an analysis of the works of Sinclair, Lewis, Booth Tarkington, F. Scott Fitzgerald, Upton Sinclair, John Steinbeck, Erskine Caldwell, William Faulkner, Jack Kerouac, Flannery O'Connor, John Updike, Arna Bontemps, Ralph Ellison, Richard Wright, E. L. Doctorow, Harry Crews, John Dos Passos, and Joy Williams. The study also addresses the ways in which race, gender, and place have affected writer's perceptions and imagination of the car. Charts the development of a myth The automobile unites the American fundamental ideologies of freedom and movement -- auto-mobility. The book begins with an examination of auto-mobility in literature prior to the invention of the car, and traces the evolution, through Lewis' novels in particular, of the automobile from romantic to satirical object. By the 1930s, the car had become essential to most Americans, such as Steinbeck's Joads, and had transfigured rural America, as evidenced by the works of Caldwell and Faulkner. During this period, the car attained increasingly complex literary signification -- the center of an intricate dialectic of attraction and repulsion. The mythical prominence assumed by the automobile after World War II was exemplified by Kerouac's On the Road. Updike's Rabbit

novels chronicle the transformation of the image of the car to one of polluter and murderer in the wake of the social upheaval of the 1960s and the oil crisis of the 1970s. The automobile as paradox At the close of the century the car occupies an ambiguous and complex position in American culture, and literary responses to the automobile have never been so multifarious. Harry Crews' *Car* and Joy Williams' *Escapes* exemplify the paradoxical role the automobile assumes in our present lives.

*Southland* Nina Revoyr, 2003-04-01 I'm an LA native with a lot of love for LA crime fiction, but instead of preaching to the noir choir about *The Long Goodbye*, I'd like to gush about *Southland* by Nina Revoyr. It's a brilliant, ambitious, moving literary crime novel about two families in South Los Angeles and their tangled history between the 1930s and the 1990s. The central mystery is the death of four black boys in a Japanese-American man's store during the Watts Rebellion of 1965. It's a powerful book, one that I think about often, as well as a huge influence on my work. Right up there with Chandler. --Stephanie Cha (of the LARB) in GQ on The Greatest Crime Novelists on Their Favorite Crime Novels Ever A story about injustice dressed up as a detective novel, *Southland* reminds us that activism is both an ongoing project and a deeply personal choice. --Vallaire Wallace in Electric Lit on The Novel That Shows Us How to Face our Past to Change Our Future Jackie Ishida's grandfather had a store in Watts where four boys were killed during the riots in 1965, a mystery she attempts to solve. --New York Times Book Review, Ross MacDonald on

Where Noir Lives in the City of Angels It is the kind of saga that often epitomizes and shocks LA--friction and violence between races and cultures. --Los Angeles Times, named one of the 20 Essential LA Crime Books When I started working on *Your House Will Pay*, I hoped to write something that was half as smart and affecting as *Southland*. Revoyr's novel takes place in the Crenshaw district of Los Angeles, following two families--one black, one Japanese--over several decades. It's a character-driven saga with the engine of a crime novel, unravelling a horrific multiple murder that took place in the chaotic days of the Watts Rebellion in 1965. --The Guardian (UK), one of Steph Cha's Top 10 Books About Trouble in Los Angeles [A]n absolutely compelling story of family and racial tragedy. Revoyr's novel is honest in detailing southern California's brutal history, and honorable in showing how families survived with love and tenacity and dignity. --Susan Straight, author of *Highwire Moon* *Southland* brings us a fascinating story of race, love, murder and history, against the backdrop of an ever-changing Los Angeles. A young Japanese-American woman, Jackie Ishida, is in her last semester of law school when her grandfather, Frank Sakai, dies unexpectedly. While trying to fulfill a request from his will, Jackie discovers that four African-American boys were killed in the store Frank owned during the Watts Riots of 1965. Along with James Lanier, a cousin of one of the victims, Jackie tries to piece together the story of the boys' deaths. In the process, she unearths the long-held secrets of her family's history. *Southland* depicts a young woman in the process of learning that her own history has bestowed upon her a deep obligation to be engaged in the larger world. And in Frank Sakai and his African-American friends, it presents characters who find significant common ground in their struggles, but who also engage each other across grounds--historical and

cultural--that are still very much in dispute. Moving in and out of the past--from the internment camps of World War II, to the barley fields of the Crenshaw District in the 1930s, to the streets of Watts in the 1960s, to the night spots and garment factories of the 1990s--Southland weaves a tale of Los Angeles in all of its faces and forms.

*Racing the Beam* Nick Montfort, Ian Bogost, 2020-02-25 A study of the relationship between platform and creative expression in the Atari VCS, the gaming system for popular games like Pac-Man and Star Wars: The Empire Strikes Back. The Atari Video Computer System dominated the home video game market so completely that “Atari” became the generic term for a video game console. The Atari VCS was affordable and offered the flexibility of changeable cartridges. Nearly a thousand of these were created, the most significant of which established new techniques, mechanics, and even entire genres. This book offers a detailed and accessible study of this influential video game console from both computational and cultural perspectives. Studies of digital media have rarely investigated platforms—the systems underlying computing. This book, the first in a series of Platform Studies, does so, developing a critical approach that examines the relationship between platforms and creative expression. Nick Montfort and Ian Bogost discuss the Atari VCS itself and examine in detail six game cartridges: Combat, Adventure, Pac-Man, Yars' Revenge, Pitfall!, and Star Wars: The Empire Strikes Back. They describe the technical constraints and affordances of the system and track developments in programming, gameplay, interface, and aesthetics. Adventure, for example, was the first game to represent a virtual space larger than the screen (anticipating the boundless virtual spaces of such later games as World of Warcraft and Grand Theft Auto), by allowing the player to walk off one side into

another space; and Star Wars: The Empire Strikes Back was an early instance of interaction between media properties and video games. Montfort and Bogost show that the Atari VCS—often considered merely a retro fetish object—is an essential part of the history of video games.

**Asphalt Nation** Jane Holtz Kay, 2012-06-20 Asphalt Nation is a major work of urban studies that examines how the automobile has ravaged America's cities and landscape, and how we can fight back. The automobile was once seen as a boon to American life, eradicating the pollution caused by horses and granting citizens new levels of personal freedom and mobility. But it was not long before the servant became the master—public spaces were designed to accommodate the automobile at the expense of the pedestrian, mass transportation was neglected, and the poor, unable to afford cars, saw their access to jobs and amenities worsen. Now even drivers themselves suffer, as cars choke the highways and pollution and congestion have replaced the fresh air of the open road. Today

our world revolves around the car—as a nation, we spend eight billion hours a year stuck in traffic. In *Asphalt Nation*, Jane Holtz Kay effectively calls for a revolution to reverse our automobile-dependency. Citing successful efforts in places from Portland, Maine, to Portland, Oregon, Kay shows us that radical change is not impossible by any means. She demonstrates that there are economic, political, architectural, and personal solutions that can steer us out of the mess. *Asphalt Nation* is essential reading for everyone interested in the history of our relationship with the car, and in the prospect of returning to a world of human mobility.

This book, the first atlas of its kind, aims to explore, map, study and celebrate them. To imagine what they would be like in reality. To paint a lasting picture of their domes, arches and walls. Virtual Cities transports us into these imaginary worlds, through cities that span over four decades of

digital history across literary and gaming genres.
