Apollo's Warriors Michael E. Haas, 1998-05 Presenting a fascinating insider's view of U.S.A.F. special operations, this volume brings to life the critical contributions these forces have made to the exercise of air & space power. Focusing in particular on the period between the Korean War & the Indochina wars of 1950-1979, the accounts of numerous missions are profusely illustrated with photos & maps. Includes a discussion of AF operations in Europe during WWII, as well as profiles of Air Commandos who performed above & beyond the call of duty. Reflects on the need for financial & political support for restoration of the forces. Bibliography. Extensive photos & maps. Charts & tables.

RAF Wings over Florida Will Largent, 2020-08-01 From 1941 through 1945, British cadets in the Royal Air Force trained in the United States through the Lend-Lease Act, President Roosevelt's ingenious plan to help beleaguered Great Britain while maintaining the semblance of neutrality. This book tells the saga of two Florida training fields during this turbulent time. In their own words, British pilots tell of their Florida experiences. Many of them still in their late teens, away from home for the first time, pale and thin from years of rationing, these young men encountered immense challenges and overwhelming generosity during their training in Florida. Now retired, these former pilots still smell the scent of orange blossoms when they glance through the log books they kept while flying their Stearmans and Harvards over Florida citrus groves. They fondly remember the times when they buzzed over the homes of their Florida "families" to let them know to expect them for Sunday dinner. More than fifty years later, their stories still resonate with universal emotions: fear of failure, love of country, camaraderie, romantic love, and the pain of tragic deaths. Their stories also remind the American reader of a unique time in our history, when, poised on the brink of war, the United States reached out to help a country in distress.

American Airpower Comes Of Age—General Henry H. "Hap" Arnold's World War II Diaries Vol. II [Illustrated Edition] Gen. Henry H. "Hap." Arnold, 2015-11-06 Includes the Aerial Warfare In Europe During World War II illustrations pack with over 180 maps, plans, and photos. Gen Henry H. "Hap." Arnold, US Army Air Forces (AAF) Chief of Staff during World War II, maintained diaries for his several journeys to various meetings and conferences throughout the conflict. Volume 1 introduces Hap Arnold, the setting for five of his journeys, the diaries he kept, and evaluations of those journeys and their consequences. General Arnold's travels brought him into strategy meetings and personal conversations with virtually all leaders of Allied forces as well as many AAF troops around the world. He recorded his impressions, feelings, and expectations in his diaries. Maj Gen John W.

Huston, USAF, retired, has captured the essence of Henry H. Hap Arnold—the man, the officer, the AAF chief, and his mission. Volume 2 encompasses General Arnold's final seven journeys and the diaries he kept therein.

Special Air Warfare and the Secret War in Laos Air University Press, Joseph D Celeski, 2019-07-02 The story of special air warfare and the Air Commandos who served for the ambassadors in Laos from 1964 to 1975 is captured through extensive research and veteran interviews. The author has meticulously put together a comprehensive overview of the involvement of USAF Air Commandos who served in Laos as trainers, advisors, and clandestine combat forces to prevent the communist takeover of the Royal Lao Government. This book includes pictures of those operations, unveils what had been a US government secret war, and adds a substantial contribution to understanding the wider war in Southeast Asia.

Round the Bend Nevil Shute, 2023-03-24 Round the Bend follows the life of Tom Cutter, an Englishman who becomes a pilot and settles in the Middle East after World War II. Tom starts an air freight business and becomes fascinated by the spiritual beliefs of the local Muslim population, which leads him to start his own religion called The Way. Through his travels and teachings, Tom attracts a group of devoted followers and becomes a spiritual leader. However, his unconventional beliefs and practices lead to conflict with some of the more traditional religious and political authorities in the region. Despite the challenges he faces, Tom remains committed to his beliefs and the pursuit of a more peaceful and harmonious world. The novel explores themes of religion, spirituality, cultural differences, and the clash between tradition and modernity.

Leading the Way Ronald B. Hartzler, Lois E. Walker, Rebecca Gatewood, Katherine Grandine, Kathryn M. Kuranda, 2014 Leading the way describes how the men and women of Air Force civil engineering have provided the basing that enabled the Air Force to fly, fight, and win. This book depicts how engineers built hundreds of bases during World Wars I and II, Korea, Vietnam, the Gulf War, and Operations Enduring Freedom and Iraqi Freedom. At the same time, these engineers operated and maintained a global network of enduring, peacetime bases. It describes the engineers' role in special projects such as the ballistic missile program, the Arctic early warning sites, and construction of the U.S. Air Force Academy. Using hundreds of sources, this detailed narrative tells the story of how civil engineers have been organized, trained, equipped, and employed for more than 100 years. From the beaches of Normandy to the mountains of Afghanistan, civil engineers have forged an unmatched record of success and built a solid foundation for today's Air Force.--Back cover.

Worlds of Flow Olivier Darrigol,2005-09 This book provides the first fully-fledged history of hydrodynamics, including lively accounts of the concrete problems of hydraulics, navigation, blood circulation, meteorology, and aeronautics that motivated the main conceptual innovations. Richly illustrated, technically competent, and philosophically sensitive, it should attract a broad audience and become a standard reference for any one interested in fluid mechanics.

Firefox Down Craig Thomas,2022-10-24 Firefox is down and on thin ice...The unputdownable thriller from a modern master Badly damaged and rapidly losing fuel after a brutal dogfight, stolen Cold War super-plane Firefox is forced to land on a frozen lake twenty miles from the Norwegian frontier. When the ice breaks, pilot Mitchell Gant has no choice but to abandon the aircraft and run for his life. As NATO races against the Soviets to recover Firefox from its icy tomb, Gant is hunted across Russia by the KGB. With international tension between East and West mounting, Gant must evade capture and get Firefox back into the sky before it's too late... Strap in for the ride of your life. The extraordinary sequel to the bestselling techno-thriller Firefox, perfect for fans of Tom Clancy and Robert Ludlum.

The Grim Reaper's road map Shaw, Mary,Thomas, Bethan,2008-10-20 This impressive full-colour atlas, with over 100 colour-coded and accessible maps, uniquely presents the geography of death in Britain. The first atlas published on this subject for over two decades, this book presents data from more than 14 million deaths over a 24-year period in Britain. The maps detail over 100 separate categories of cause of death, including various cancers, suicides, assault by firearms, multiple sclerosis, pneumonia, hypothermia, falls, and Parkinson's disease, and show how often these occurred in different neighbourhoods. Accompanying each map is a detailed description and brief geographical analysis - the number of people who have died due to each cause, the average age of death and ratio of male to female deaths are listed. Taken as a whole, these provide a comprehensive overview of the geographical pattern of mortality in Britain. This atlas will be essential reading for academics and students of social medicine, sociology of health and illness and epidemiology. It will also be valuable for anyone who wants a better understanding of patterns of mortality within Britain, including medical and healthcare practitioners, policy makers and researchers.

History of Computer Art Thomas Dreher,2020 The development of the use of computers and software in art from the Fifties to the present is explained. As general aspects of the history of computer art an interface model and three dominant modes to use computational processes (generative,

modular, hypertextual) are presented. The History of Computer Art features examples of early developments in media like cybernetic sculptures, computer graphics and animation (including music videos and demos), video and computer games, reactive installations, virtual reality, evolutionary art and net art. The functions of relevant art works are explained more detailed than usual in such histories.

Smoke Signals Simon Chapman,2016-11-30 Smoke Signals gathers 71 of Professor Simon Chapman's authoritative, acerbic and often heretical essays written in newspapers, blogs and research journals across his 40-year career. They cover major developments and debates in tobacco control, public health ethics, cancer screening, gun control and panics about low risk agents like wi-fi, mobile phone towers and wind turbines. This collection is an essential guide to the landscape of many key debates in contemporary public health. It will be invaluable to public health students and practitioners, while remaining compelling reading for all interested in health policy. When is Simon Chapman the academic, intellectual, self-appointed chief wowser of the nanny state gunna leave us alone? Steve Price, Australian radio broadcaster His insane wibblings are worrying yes, but still bloody funny to read. Christopher Snowdon, Institute of Economic Affairs, London Simon Chapman is emeritus professor in public health at the University of Sydney. He has won the World Health Organization's medal for tobacco control (1998), the American Cancer Society's Luther Terry Award for outstanding individual leadership in tobacco control (2003), and was NSW Premier's Cancer Researcher of the Year medal (2008). In 2013 he was made an Officer in the Order of Australia for his contributions to public health and named 2013 Australian Skeptic of the Year. In 2014, the Australian right-wing think tank, the Institute of Public Affairs, named him as one of Australia's Dirty Dozen all-time "opponents of freedom".

United States Naval Aviation, 1919-1941 E.R. Johnson,2011-04-29 Within six months of the devastating attack on Pearl Harbor, the U.S. Navy had checked the Japanese military advance in the Pacific to the extent that the United States could return to its original "Defeat Germany First" strategy. That the Navy was able to accomplish this feat with only six fleet aircraft carriers and little more than 1,000 combat aircraft was not sheer luck but the culmination of more than two decades of determined preparation. This thorough study, with detailed drawings and photographs, explains and

illustrates the trial and error process which went into developing the aircraft, airships and ships of the interwar period. The critical factors that shaped Naval Aviation after World War I—naval treaties, fleet tactics, government programs, leadership and organization, as well as the emergence of Marine Corps and Coast Guard aviation—are discussed in depth.

Douglas A-26 and B-26 Invader Scott Thompson, 2002 Douglas A-26 and B-26 Invader has often been overshadowed by other aircraft and circumstances. It saw service too late in World War II to lay claim to a distinctive heritage. By Korea, it was seen as a workhorse and just an old propeller job. But there can be no doubt that the Invader was a fine aircraft - highly effective and popular with its crews.

American Armies and Battlefields in Europe , 2018-08-17 This volume was first published by the American Battle Monuments Commission in 1938 and was republished by CMH in 1992 to commemorate the American Expeditionary Forces' seventy-fifth birthday. American Armies and Battlefields in Europe, a facsimile edition to commemorate the seventy-fifth birthday of the American Expeditionary Forces, is a unique, illustrated volume that captures the AEF's lessons of battle during World War I. Based on the series of battlefield tours conducted for staff officers at General John J. Pershing's headquarters, the operational chapters describe the military situation, giving detailed accounts of actual fighting supported by maps and sketches, and a summary of events and service of combat divisions. Topical chapters on the Services of Supply, the U.S. Navy, military cemeteries and memorials, and other interesting and useful facts conclude the narrative. For scholars and students of the Great War, as well as veterans and their descendants wishing to find battle sites of long ago, this guidebook remains the most authoritative and easily usable source for visitors to the AEF's battlefields. The American Battle Monuments Commission, a small independent agency established by Congress in 1923 at the request of General John J. Pershing, is the guardian of America's overseas commemorative cemeteries and memorials. Its mission is to honor the service, achievements, and sacrifice of the United States armed forces.
