English Pastoral James Rebanks,2021-09-02 As a boy, James Rebanks's grandfather taught him to work the land the old way. Their family farm in the Lake District hills was part of an ancient landscape- a patchwork of crops and meadows, of pastures grazed with livestock, and hedgerows teeming with wildlife. And yet, by the time James inherited the farm, it was barely recognisable. The men and women had vanished from the fields; the old stone barns had crumbled; the skies had emptied of birds and their wind-blown song. *English Pastoral* is the story of an inheritance- one that affects us all. It tells of how rural landscapes around the world were brought close to collapse, and the age-old rhythms of work, weather, community and wild things were lost. And yet this elegy from the Lake District fells is also a song of hope- how, guided by the past, one farmer began to salvage a tiny corner of England that was now his, doing his best to restore the life that had vanished and to leave a legacy for the future. This is a book about what it means to have love and pride in a place, and how, against all the odds, it may still be possible to build a new pastoral- not a utopia, but somewhere decent for us all.

Wonders of Spiritual Unfoldment John Butler,2008-11-01 A personal account of searching for spiritual understanding initially outside Christian teaching, this book takes the position that there are as many ways to God as there are paths up a mountain. Interpreting his own spiritual breakthroughs, the author describes them as windows of realization and likens them to the sensation of being made whole. The book describes his journey from Eastern mantra-style meditation to the Orthodox prayer of the heart and details how a love of nature and a desire to do good played an important part in his spiritual unfoldment.

Strange Concepts and the Stories They Make Possible Lisa Zunshine,2008-07-28 In this fresh and often playful interdisciplinary study, Lisa Zunshine presents a fluid discussion of how key concepts from cognitive science complicate our cultural interpretations of “strange” literary phenomena. From *Short Circuit* to *I, Robot*, from *The Parent Trap* to *Big Business*, fantastic tales of rebellious robots, animated artifacts, and twins mistaken for each other are a permanent fixture in popular culture and have been since antiquity. Why do these strange concepts captivate the human imagination so thoroughly? Zunshine explores how cognitive science, specifically its ideas of essentialism and functionalism, combined with historical and cultural analysis, can help us understand why we find such literary phenomena so fascinating. Drawing from research by such cognitive evolutionary anthropologists and psychologists as Scott Atran, Paul Bloom, Pascal Boyer, and Susan A. Gelman, Zunshine examines the cognitive origins of the distinction between essence and function and how unexpected tensions between these two concepts are brought into play in fictional narratives. Discussing motifs of confused identity and of twins in drama, science fiction’s use of robots, cyborgs, and androids, and nonsense poetry and surrealist art, she reveals the range and power of key concepts from science in literary interpretation and provides insight into how cognitive-evolutionary research on essentialism can be used to study fiction as well as everyday strange concepts.

The Theory of Criticism Murray Krieger,2019-12-01 Originally published in 1976. Representing years of critical reflection, *The Theory of Criticism* attempts to construct a poetics of presence. Within a wide range of critical terminology, Murray Krieger has sought to create a new vision. In language that is passionate and often dramatic, he looks at the multidimensionality of the poetic world through the lens of Western poetics. His work clearly addresses itself to post-New Critical questions: how to preserve the literary object as a thing to be perceived, valued, and enjoyed and yet to account for its presence in, and interaction with, our culture as a whole, always in danger of being dissolved into man's language-making and -forming activity in general. Our awareness of the poem as object must be modified by our awareness that it is an intentional object. Krieger develops his balanced vision in three parts. Part 1 defines the problem and defends the very activity of theorizing both in its own terms and in terms of the critic's function throughout the history of Western criticism. By asking at the outset whether criticism is vain or valuable, Krieger already confronts the basic tension between system and world and the need to account for both. By creating a heuristic system that examines the possibility of form, the critic serves also the world of history and thought as a whole. Part 2 pursues that history from the classical encounter with mimesis in Greek thought to the Romantic and post-Romantic elevation of consciousness as a main criterion of poetic art. Defining a humanistic aesthetic as it has been viewed since Aristotle, the author shows how, during and after the eighteenth century, form was opened up under the impact of a Kantian and post-Kantian view, epitomized finally by Coleridge's imagination and its consequences for recent theorists. Part 3 deals with the image of the world struggling against its enclosure within a poetic context. It expands our view of metaphor as a reflection of the dual nature of poetic language, simultaneously locked into the poem and referring to history and nature outside. Our reading of the poem, Krieger concludes, must be double: we must see the poem as a linear and chronological sequence reflecting real life, and we must read it as a circular, imitative, mutually implicative mode.
