With 35 different robots to choose from, you are sure to get hooked on making paper toys—the latest trend to sweep the internet—and want to make them all. Then there's Mechanus the robodoctor, giving an oil change to any droids in need of a tune-up. Not everyone in Robot City is a good citizen however, like Omerton, boss of the underworld crime families, but luckily UltraBot and his sidekicks Terra, Firma, and Mare are around to keep things under control. Every project comes with a template that's ready to be popped out of the book and folded into something amazing. We've even scored the creases, ready for you to get started straight away. You'll be amazed at the variety of robots you can create using just a few folds, and it's so simple; all you will need is this book and a glue stick.

Cartoon and TV Robots Prof Charria, 2013-12-15 Caution: This book requires that both, parents and children, work together at least 15 minutes a day on reading texts and assembling some robot pieces (only the printed version). Parents will remember all those TV and animated series where a robot was part of the cast. Children will learn about the robots and the importance of science. This is a reading book and also a historic compilation of robots appearing in Cartoon and TV Series. Do you like ROBOTS? This book is a reading book for children from 5 to 80 years old (OK, OK...from 5 to your age). The idea is that every parent and his/her child spend some few minutes every day practicing reading, explaining the concepts for reading comprehension and learning about robotics. Every book has vocabulary for parents to help children to understand some terms from the world of Robots. Additionally, with very simple tools like glue and scissors, parents and children build the robot's parts, but again it's recommended to make just one robot part per day. This activity helps to build children's imagination and creativity. It is a wonderful way to develop fine motor skills and something very important nowadays: patience. Some cutting and folding is a good exercise to help children to figure out geometric figures. Every reading session becomes a fun activity while kids see their own progress in several ways. The more they read the closer they get to have their paper-craft robot as a final reward. Automated printing has limitations and though the desire is to have the paper-craft robot on a sheet with good thickness, we had to use the same paper thickness of the interior pages.

Making Simple Robots Kathy Ceceri, 2014

Paper Toys: Robots Arnaud Roi, 2016-10 Paper Toys is a wonderful new series of interactive craft books that allow children to pop out and build their

own paper toys. While complimentary, each volume in the series is designed by a different talented artist, lending a stylized look to their fanciful creations. With several themes to choose from including Robots, Monsters, Fantasy Creatures, and Animals, the options for imaginative play are endless. Printed on durable cardstock and die-cut, each toy is easy to assemble with no glue or scissors needed.

*Making Simple Robots* Kathy Ceceri,2014 Making Simple Robots is based on one idea: Anybody can build a robot! That includes kids, school teachers, parents, and non-engineers. If you can knit, sew, or fold a flat piece of paper into a box, you can build a no-tech robotic part. If you can use a hot glue gun, you can learn to solder basic electronics into a low-tech robot that reacts to its environment. And if you can figure out how to use the apps on your smart phone, you can learn enough programming to communicate with a simple robot. Written in language that non-engineers can understand, Making Simple Robots helps beginners move beyond basic craft skills and materials to the latest products and tools being used by artists and inventors. Find out how to animate folded paper origami, design a versatile robot wheel-leg for 3D printing, or program a rag doll to blink its cyborg eye. Each project includes step-by-step directions as well as clear diagrams and photographs. And every chapter offers suggestions for modifying and expanding the projects, so that you can return to the projects again and again as your skill set grows.

*Make: Paper Inventions* Kathy Ceceri,2015-09-08 Paper is incredible stuff. It's easy to cut, but incredibly strong. It's disposable, but can last for centuries. It can stand as stiff as a board, pop up like a spring, or float like a leaf. And its invention changed the world forever. Perfect for kids, parents, and educators, Paper Inventions is a project-based book with full color illustrations, step-by-step instructions, supply lists, and templates that allow you to follow along with the book or devise something entirely new. Each chapter features new projects that will challenge and intrigue everyone, from beginning to experienced Makers. In this book, you'll learn to make: A light-up paper cat that shows how switches and sensors work An action origami robot worm Edible rice paper perfect for secret messages A space rover that moves thanks to paper machinery A paper generator that creates electricity when you tap or rub it Heat-activated paper models that fold themselves A geodesic dome big enough to crawl into--from newspaper!

**Papertoy Monsters** Brian Castleforte,2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that’s hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.
