**Conservation Biology for All** Navjot S. Sodhi,Paul R. Ehrlich,2010-01-08 Conservation Biology for All provides cutting-edge but basic conservation science to a global readership. A series of authoritative chapters have been written by the top names in conservation biology with the principal aim of disseminating cutting-edge conservation knowledge as widely as possible. Important topics such as balancing conservation and human needs, climate change, conservation planning, designing and analyzing conservation research, ecosystem services, endangered species management, extinctions, fire, habitat loss, and invasive species are covered. Numerous textboxes describing additional relevant material or case studies are also included. The global biodiversity crisis is now unstoppable; what can be saved in the developing world will require an educated constituency in both the developing and developed world. Habitat loss is particularly acute in developing countries, which is of special concern because it tends to be these locations where the greatest species diversity and richest centres of endemism are to be found. Sadly, developing world conservation scientists have found it difficult to access an authoritative textbook, which is particularly ironic since it is these countries where the potential benefits of knowledge application are greatest. There is now an urgent need to educate the next generation of scientists in developing countries, so that they are in a better position to protect their natural resources.

**Dictionary of Languages** Andrew Dalby,2015-10-28 Covering the political, social and historical background of each language, Dictionary of Languages offers a unique insight into human culture and communication. Every language with official status is included, as well as all those that have a written literature and 175 'minor' languages with special historical or anthropological interest. We see how, with the rapidly increasing uniformity of our culture as media's influence spreads, more languages have become extinct or are under threat of extinction. The text is highlighted by maps and charts of scripts, while proverbs, anecdotes and quotations reveal the features that make a language unique.

**Living Fossils** N. Eldredge,S. M. Stanley,2012-12-06 The case history approach has an impressive record of success in a variety of disciplines. Collections of case histories, casebooks, are now widely used in all sorts of specialties other than in their familiar application to law and medicine. The case method had its formal beginning at Harvard in 1871 when Christopher Lagdell developed it as a means of teaching. It was so successful in teaching law that it was soon adopted in medical education, and the collection of cases provided the raw material for research on various diseases. Subsequently, the case history approach spread to such varied fields as business, psychology, management, and economics, and there are over 100 books in print that use this approach. The idea for a series of Casebooks in Earth Science grew from my experience in organizing and editing a collection of examples of one variety of sedimentary deposits. The project began as an effort to bring some order to a large number of descriptions of these deposits that were so varied in presentation and terminology that even specialists found them difficult to compare and analyze. Thus, from the beginning, it was evident that something more than a simple collection of papers was needed. Accordingly, the nearly fifty contributors worked together with George de Vries Klein and me to establish a standard format for presenting the case histories.

*Encounters with the nagual* Armando Torres,2004-11-26 Every human being is by right a warrior who has achieved his place in the world in a battle of life and death. Look at it this way, at least once, as sperm, we all fight the bullfight for life - a unique contest against millions of other competitors - and we win! Now the battle continues... A warrior knows that there is no guarantee of triumph over death. Even so, he fights his battle, not because he believes he will win, but because of the emotion of the war itself. For him, to give his war is already a victory. And while he fights he rejoices, because, for those who have already died, every second of life is a gift. I love my children because they are deposits of my energy, my wife because she washes my clothes, she cooks and I catch her, my dog because he takes care of the house, my country because I was born here, my god because he's going to save me.... The sorcerers have discovered the most refined form of love, because they love themselves. They have put the power of passion at the service of being, and it gives them the impetus to undertake the only quest that counts: that of oneself.

**Sacred Worlds** Chris Park,2002-11-01 This book, the first in the field for two decades, looks at the relationships between geography and religion. It represents a synthesis of research by geographers of many countries, mainly since the 1960s. No previous book has tackled this emerging field from such a broad, interdisciplinary perspective, and never before have such a variety of detailed case studies been pulled together in so comparative or illuminating a way. Examples and case studies have been drawn from all the major world religions and from all continents from both a historical and contemporary perspective. Major themes covered in the book include the distribution of religion and the processes by which religion and religious ideas spread through space and time. Some of the important links between religion and population are also explored. A great deal of attention is focused on the visible manifestations of religion on the cultural landscape, including landscapes of worship and of death, and the whole field of sacred space and religious pilgrimage.

**Wonderland** ,2022-05-03 The first commercial collection of work by Nanaco Yashiro, an illustrator who has attracted international attention for her fluid lines, vivid colors, and vintage style. Nanaco Yashiro's illustrations feature various motifs such as a woman in a feathered robe from Japanese mythology, a large tiger reminiscent of Arabia, a man in a spacesuit, and concept art for an imaginary movie about heaven and hell that the illustrator created herself and are each drawn sometimes in delicately refined watercolor brushwork and at other times in bold strokes with acrylic gouache. While the themes and motifs may vary, all of them depict Nanaco Yashiro's signature style which is sure to continue fascinating her audience forever. This book contains nearly 120 carefully selected illustrations, including many that have been newly drawn for this book, which are grouped in different themes, such as plants, animals, beautiful women, and fairytales, allowing readers to enjoy the lovely and mysterious world of Yashiro's works. This book will not only appeal to Nanaco Yashiro's current fans but will also captivate those who are new to her beautiful, delicate, and colorful illustrations.

**The Arapaho Language** Andrew Cowell,Alonzo Moss Sr.,2011-05-18 The Arapaho Language is the definitive reference grammar of an endangered Algonquian language. Arapaho differs strikingly from other Algonquian languages, making it particularly relevant to the study of historical linguistics and the evolution of grammar. Andrew Cowell and Alonzo Moss Sr. document Arapaho's interesting features, including a pitch-based accent system with no exact Algonquian parallels, radical innovations in the verb system, and complex contrasts between affirmative and non-affirmative statements. Cowell and Moss detail strategies used by speakers of this highly polysynthetic language to form complex words and illustrate how word formation interacts with information structure. They discuss word order and discourse-level features, treat the special features of formal discourse style and traditional narratives, and list gender-specific particles, which are widely used in conversation. Appendices include full sets of inflections for a variety of verbs. Arapaho is spoken primarily in Wyoming, with a few speakers in Oklahoma. The corpus used in The Arapaho Language spans more than a century of documentation, including multiple speakers from Wyoming and Oklahoma, with emphasis on recent recordings from Wyoming. The book cites approximately 2,000 language examples drawn largely from natural discourse - either recorded spoken language or texts written by native speakers. With The Arapaho Language, Cowell and Moss have produced a comprehensive document of a language that, in its departures from its nearest linguistic neighbors, sheds light on the evolution of grammar.

**Islamic Identity, Postcoloniality, and Educational Policy** Jeffrey Ayala Milligan,2020-02-26 This book theorizes a philosophical framework for educational policy and practice in the southern Philippines where decades of religious and political conflict between a minority Muslim community and the Philippine state has plagued the educational and economic development of the region. It offers a critical historical and ethnographic analysis of a century of failed attempts under successive U.S. colonial and independent Philippine governments to deploy education as a tool to mitigate the conflict and assimilate the Muslim minority into the mainstream of Philippine society and examines recent efforts to integrate state and Islamic education before proposing a philosophy of prophetic pragmatism as a more promising framework for educational policy and practice that respects the religious identity and fosters the educational development of Muslim Filipinos. It represents a timely contribution to the search for educational policies and practices more responsive to the needs and religious identities of Muslim communities emerging from conflict, not only in the southern Philippines, but in other international contexts as well.
