**Parametricism 2.0** Patrik Schumacher,2016-04-25 Parametricism is an avant-garde architecture and design movement that has been growing and maturing over the last 15 years, emerging as a remarkable global force. The tendency started in architecture but now encompasses all design disciplines, from urban design to fashion. In architecture, the style has an international following and is currently progressing beyond its experimental roots to make an impact on a broader scale, with practices like Zaha Hadid Architects (ZHA) winning and completing large-scale architectural projects worldwide. Parametricism implies that all elements and aspects of an architectural composition or product are parametrically malleable; and the style owes its original, unmistakable physiognomy to its unprecedented use of computational design tools and fabrication methods. All design parameters are conceived as variables that allow the design to vary and adapt to the diverse, complex and dynamic requirements of contemporary society. Although Parametricism has been talked about and hotly debated for a number of years, so far there has been no publication dedicated to Parametricism. The issue is guest-edited by Patrik Schumacher, partner at ZHA, and one of the world's most highly renowned advocates of Parametricism. Contributors: Philippe Block, Shajay Bhooshan, Mark Burry, Mario Carpo, Manuel DeLanda, John Frazer, Mark Foster Gage, Enriqueta Llabres and Eduardo Rico, Achim Menges, Theo Spyropoulos, Robert Stuart-Smith, Philip F Yuan. Featured architects and designers: Arup, Mark Fornes/THEVERYMANY, Zaha Hadid Architects (ZHA) and Ross Lovegrove.

**Iron Landscapes** Felix Jeschke,2021-07-01 Throughout the 1920s and 1930s, the newly formed country of Czechoslovakia built an ambitious national rail network out of what remained of the obsolete Habsburg system. While conceived as a means of knitting together a young and ethnically diverse nation-state, these railways were by their very nature a transnational phenomenon, and as such they simultaneously articulated and embodied a distinctive Czechoslovak cosmopolitanism. Drawing on evidence ranging from government documents to newsreels to train timetables, Iron Landscapes gives a nuanced account of how planners and authorities balanced these two imperatives, bringing the cultural history of infrastructure into dialogue with the spatial history of Central Europe.

Historic Mortars John J. Hughes,Jan Válek,Caspar J. W. P. Groot,2018-07-06 This book presents a state of the art in mortar characterisation, experimentation with and applications of new mortars for conservation and repair of historic buildings. This volume includes the following topics: characterisation of historic mortars (methods, interpretation, application of results), development of new materials for conservation (compatibility, durability, mix designs), the history of mortar technology and fundamental experimental studies of material properties. The papers have been selected from those presented at the 3rd Historic Mortars Conference, held in Glasgow, Scotland, September 11-14th 2013. All the papers here underwent a two stage peer review process, for the conference and again for this volume. In some cases this has resulted in a revision and updating of content.

**Accessible Tourism** Dimitrios Buhalis,Simon Darcy,2011 Inclusion, disability, an ageing population and tourism are increasingly important areas of study due to their implications for both tourism demand and supply. This book therefore sets out to explore and document the current theoretical approaches, foundations and issues in the study of accessible tourism. In drawing together the contributions to this volume the editors have applied broader social constructionist approaches to understanding the accessible tourism phenomena. Accessible tourism, as with any area of academic study is an evolving field of academic research and industry practice. As with other areas of tourism, the field is multidisciplinary, and is influenced by various disciplines including geography, disability studies, economics, public policy, psychology and marketing. As one would expect from two scholars at the height of their academic abilities, Dimitrios Buhalis and Simon Darcy have delivered a timely and much needed contribution to the under-served area of accessible tourism. Harnessing the best conceptual developments on the topic, Accessible Tourism is a scholarly yet hugely readable collection and readily communicates the various contributors' passion for and command of their subject. This collection is a must have text for anyone engaged in the theory, practice and policy of accessible tourism and will be essential reading on undergraduate and postgraduate courses across a range of disciplines and fields. I cannot speak highly enough of this endeavour and I'm sure it will take accessible tourism and universal design debates into the mainstream of academic enquiry and industry practice. Professor Nigel Morgan, The Welsh Centre for Tourism Research, University of Wales Institute, Cardiff, Wales
