India's Mental Healthcare Act, 2017 Richard M. Duffy, Brendan D. Kelly, 2020-05-18 This book comprehensively discusses the background to the passing of India's revolutionary Mental Healthcare Act, 2017, offering a detailed description of the Act itself and a rigorous analysis in the context of the CRPD and the World Health Organization (WHO) standards for mental health law. It examines the fine balance, between complying with the CRPD while still delivering practical, humane, and implementable legislation. It explores how this legislation was shaped by the WHO standards and provides insights into areas where the Indian legislators deviated from these guidelines and why. Taking India as an example, it highlights what is possible in other low- and middle-income countries. Further it covers key issues in mental health, identifying potential competing interests and

exploring the difficulties and limitations of international guidelines. The book is a valuable resource for psychiatrists, nurses, social workers, non-governmental organizations and all mental healthcare workers in India and anyone studying human rights law.

**Confronting Commercial Sexual Exploitation and Sex Trafficking of Minors in the United States** National Research Council, Institute of Medicine, Committee on Law and Justice, Board on Children, Youth, and Families, Committee on the Commercial Sexual Exploitation and Sex Trafficking of Minors in the United States, 2013-11-12 Every day in the United States, children and adolescents are victims of commercial sexual exploitation and sex trafficking. Despite the serious and long-term consequences for victims as well as their families, communities, and society, efforts to prevent, identify, and respond to these crimes are largely under supported, inefficient, uncoordinated, and unevaluated. **Confronting Commercial Sexual Exploitation and Sex Trafficking of Minors in the United States** examines commercial sexual exploitation and sex trafficking of U.S. citizens and lawful permanent residents of the United States under age 18. According to this report, efforts to prevent, identify, and respond to these crimes require better collaborative approaches that build upon the capabilities of people and entities from a range of sectors. In addition, such efforts need to confront demand and the individuals who commit and benefit from these crimes. The report recommends increased awareness and understanding, strengthening of the law's response,

strengthening of research to advance understanding and to support the development of prevention and intervention strategies, support for multi-sector and interagency collaboration, and creation of a digital information-sharing platform. A nation that is unaware of these problems or disengaged from solutions unwittingly contributes to the ongoing abuse of minors. If acted upon in a coordinated and comprehensive manner, the recommendations of *Confronting Commercial Sexual Exploitation and Sex Trafficking of Minors in the United States* can help advance and strengthen the nation's emerging efforts to prevent, identify, and respond to commercial sexual exploitation and sex trafficking of minors in the United States.

*Two Caravans* Marina Lewycka, 2008-03-05 *Two Caravans* is the hilarious and engaging second novel from bestselling author Marina Lewycka. A field of strawberries in Kent... And sitting in it are two caravans - one for the men and one for the women. The residents are from all over: miner's son Andriy is from the old Ukraine, while sexy young Irina is from the new: they each other warily. There are the Poles, Tomasz and Yola; two Chinese girls; and Emauel from Malawi. They're all here to pick strawberries in England's green and pleasant land. But these days England's not so pleasant for immigrants. Not with Russian gangster-wannabes like Vulk, who's taken a shine to Irina and thinks kidnapping is a wooing strategy. And so Andriy - who really doesn't fancy Irina, honest - must set off in search of that girl he's not in love with. 'Immensely appealing. All but sings with zest for life...could hardly be more engaging, shrewd and winningly perceptive' Sunday Times 'Extremely funny, closely observed insights, scenes of farce, tragedy and horror' The

Times Literary Supplement 'Hilarious and horrifying, Two Caravans is funny, clever and well observed' Guardian Bestselling author Marina Lewkyca has received great critical acclaim since the publication of her hilarious first novel A Short History of Tractors in Ukrainian in 2005, which was the winner of the Bollinger Everyman Prize for Comic Fiction 2005, winner of the Saga Award for Wit 2005, shortlisted for the Orange Prize for Fiction 2005 and longlisted for the Booker prize 2005. **Investigating Animal Burials** Dr. James Morris, 2011 In recent years zooarchaeology has started to move beyond the purely economic towards social interpretations. In particular, these 'social' interpretations have often concentrated upon complete or partial animal burials rather than upon the disarticulated and fragmented faunal remains more commonly recovered from archaeological sites. This book presents a study of these associated bone groups from the Neolithic to late Medieval periods of southern England and Yorkshire. Not only does it present data on over 2000 deposits, it also discusses their interpretation, arguing that most are based on generalised period-based assumptions. It is proposed that a biographical approach to these types of deposit, allows the investigation of the specific above ground actions behind their creation, moving away from generalisations towards individual interpretations. The study shows the value of not only utilising

specialist data, but integrating such knowledge with other archaeological evidence and theoretical approaches. The book is divided into three main sections. The first two chapters discuss the history of associated bone groups in the archaeological record and how they are created by human and natural actions. The second section consists of detailed chapters (three to nine) discussing the evidence from each region and period. The third section discusses trends in the data and the problems with how they are interpreted. It outlines and tests the use of a biographical approach and discusses the implications of these findings for wider research.

**Boats of the World** Sean McGrail, 2004 Maritime archaeology, the study of man's early encounter with the rivers and seas of the world, only came to the fore in the last decades of the twentieth century, long after its parent discipline, terrestrial archaeology, had been established. Yet there were seamen long before there were farmers, navigators before there were potters, and boatbuilders before there were wainwrights. In this book Professor McGrail attempts to correct some of the imbalance in our knowledge of the past by presenting the evidence for the building and use of early water transport: rafts, boats, and ships.

**Aggression and Violence** Brad J. Bushman, 2016-10-14 This book provides a broad and contemporary overview of aggression and violence by some of the most internationally renowned researchers in the field. It begins with an integrative theoretical understanding of aggression and shows how animal

models shed light on human aggression and violence. Individual risk factors for aggression and violence from different research perspectives are then examined. First, there is a cognitive neuroscientific, neuropsychological, and psychophysiological study of the brain. It then explores the developmental psychological factors in aggressive behavior, incorporating work on gender and the family. Other perspectives include the role of testosterone, individual differences, and whether humans are innately wired for violence. The following sections moves from the individual to the contextual risk factors for aggression, including work on the effects of adverse events and ostracism, guns and other aggressive cues including violent media, and drugs and alcohol. Targets of aggression and violence are covered in the next section, including violence against women and loved ones; aggression between social groups; and the two very contemporary issues of cyberbullying and terrorism. The book concludes with work showing how we may make the world a more peaceful place by preventing and reducing aggression and violence. The volume is essential reading for upper-level students and researchers of psychology and related disciplines interested in a rigorous and multi-perspective overview of work on aggression and violence.

Wise, 2012 Expands and refines the psychosomatic approach in clinical practice Psychosomatic medicine has developed methods to increase diagnostic accuracy and improve targeted therapeutic approaches in all fields of medicine. In

this context, clinimetrics, the science of clinical measurements, provides unprecedented opportunities for psychosomatic assessment. Each chapter provides practical illustrations as to how crucial information can be obtained with specific methods individualized according to the patients' needs. A hyperlink is provided to a website that contains many of the instruments assessed in the volume.
