The Chinese Navy Institute for National Strategic Studies,2011-12-27 Tells the story of the growing Chinese Navy - The People's Liberation Army Navy (PLAN) - and its expanding capabilities, evolving roles and military implications for the USA. Divided into four thematic sections, this special collection of essays surveys and analyzes the most important aspects of China's navel modernization.

Echelon Defense Ryan D. Martinson,2018 This monograph examines China's approach to using sea power to defend and advance its maritime claims in the East China Sea and South China Sea. This approach, which Chinese strategists sometimes called echelon defense, involves the use of non-military instruments of sea power--especially maritime law enforcement forces--to vie with other states for control over disputed maritime space. These non-military forces operate on the first line (or echelon) of China's expanding frontier. Behind them, on the second line, China employs naval forces to deter foreign leaders from using force, thereby compelling them to compete on China's own terms. The echelon defense approach allows China to gradually achieve its objectives without risking a conflict or giving other great powers such as the United States sufficient grounds to intervene. Since 2006, when this approach was pioneered, it has enabled China to expand its influence and control in maritime East Asia. But it has also harmed China's relations with its neighbors and other great powers. China's Incomplete Military Transformation Michael S. Chase,Jeffrey Engstrom,Tai Ming Cheung,Kristen A. Gunness,Scott Warren Harold,Susan Puska,Samuel K. Berkowitz,2015-02-13 Through extensive primary source analysis and independent analysis, this report seeks to answer a number of important questions regarding the state of China's armed forces. The authors found that the PLA is keenly aware of its many weaknesses and is vigorously striving to correct them. Although it is only natural to focus on the PLA's growing capabilities, understanding the PLA's weaknesses--and its self-assessments--is no less important.

Assessing the People's Liberation Army in the Hu Jintao Era Roy Kamphausen,David Lai,Travis Tanner,2014-06-14 It is my pleasure to introduce this 2013 publication by the Strategic Studies Institute (SSI) of the U.S. Army War College, the National Bureau of Asian Research (NBR), and the United States Pacific Command, focusing on A Retrospective of the People's Liberation Army in the Hu Jintao Era (2002-12). The papers in this book provide a valuable and insightful review of the People's Liberation Army's (PLA) many impressive advances over the past decade. Solid scholarship on changes taking place in the PLA helps us understand how the Chinese view the employment of military power to support broader policy aims. A historical review of patterns and developments in training, operations, acquisitions, and political military relations can greatly assist that understanding. The outstanding work in this jointly sponsored study is an important contribution toward this end. This volume provides unique insights into the PLA's achievements over the span of Hu Jintao's tenure...

Chinese Military Modernization and Force Development Anthony H. Cordesman,Ashley Hess,Nicholas S. Yarosh,2013-10-22 This report from the CSIS Burke Chair in Strategy examines trends in Chinese strategy, military spending, and military forces based on Chinese defense white papers and other official Chinese sources; US reporting by the Department of Defense and other defense agencies; and other government sources, including Japanese and Korean defense white papers and the International Monetary Fund.

The People's Liberation Army and Contingency Planning in China Arthur S. Ding,Phillip C. Saunders,Scott W. Harold,2019-02-17 All militaries have a responsibility to plan for contingencies, and China's military, the People's Liberation Army (PLA), is no exception. PLA contingency planning takes place primarily within the General Staff Department's (GSD's) First Department, also known as the GSD Operations Department. China's seven military regions participate in drafting and reviewing the plans relevant to their areas of responsibility, albeit under heavy supervision from the GSD. U.S. joint doctrine defines a contingency as a situation that likely would involve military forces in response to natural and manmade disasters, terrorists, subversives, military operations by foreign powers, or other situations. U.S. doctrine distinguishes between deliberate planning (advance preparation of campaign and contingency plans in non-crisis situations) and crisis action planning (rapid planning in response to a developing incident or situation). Deliberate planning is typically used to develop campaign and contingency plans for a broad range of activities based on requirements identified in strategic guidance for military commanders. Crisis action planning is conducted with less advance warning (hours, days, or up to 12 months) and focuses on developing alternative courses of action or refining existing campaign or contingency plans to adapt to current circumstances. Why publish a book you can download for free? We print this book so you don't have to. Some documents are only available in electronic format. The print versions may be 6 inch by 9 inch (or smaller) so they are difficult to read. We print books a full 8 1/2 inches by 11 inches with large text and wide margins so you can jot down notes. Some documents found on the web are missing some pages or the image quality is so poor, they are difficult to read. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document, no problem, but if it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the latest version from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. We print these large documents as a service so you don't have to. The books are compact, tightly-bound, full-size (8 1/2 by 11 inches), with large text and glossy covers. We publish short-run books (limited numbers) so they are not the least expensive available. However, we strive to issue a high-quality product with large text that is clear and crisp. Of course, color printing is expensive, so we pass that cost along to the customer. 4th Watch Publishing is a Service Disabled Veteran Owned Small Business (SDVOSB) located in a HUBZONE. China's Actions in South and East China Seas Congressional Research Service,2019-02-03 Summary China's actions in recent years in the South China Sea (SCS)--particularly its island-building and base-construction activities at sites that it occupies in the Spratly Islands--have heightened concerns among U.S. observers that China is rapidly gaining effective control of the SCS, an area of strategic, political, and economic importance to the United States and its allies and partners, particularly those in the Indo-Pacific region. U.S. Navy Admiral Philip Davidson, in his responses to advance policy questions from the Senate Armed Services Committee for an April 17, 2018, hearing to consider his nomination to become Commander, U.S. Pacific Command (PACOM), stated that China is now capable of controlling the South China Sea in all scenarios short of war with the United States. Chinese control of the SCS--and, more generally, Chinese domination of China's near-seas region, meaning the SCS, the East China Sea (ECS), and the Yellow Sea--could substantially affect U.S. strategic, political, and economic interests in the Indo-Pacific region and elsewhere. China is a party to multiple territorial disputes in the SCS and ECS, including, in particular, disputes with multiple neighboring countries over the Paracel Islands, Spratly Islands, and Scarborough Shoal in the SCS, and with Japan over the Senkaku Islands in the ECS. Up through 2014, U.S. concern over these disputes centered more on their potential for causing tension, incidents, and a risk of conflict between China and its neighbors in the region, including U.S. allies Japan and the Philippines and emerging partner states such as Vietnam. While that concern remains, particularly regarding the potential for a conflict between China and Japan involving the Senkaku Islands, U.S. concern since 2014 (i.e., since China's island-building activities in the Spratly Islands were first publicly reported)

has shifted increasingly to how China's strengthening position in the SCS may be affecting the risk of a U.S.-China crisis or conflict in the SCS and the broader U.S.-Chinese strategic competition. In addition to territorial disputes in the SCS and ECS, China is involved in a dispute, particularly with the United States, over whether China has a right under international law to regulate the activities of foreign military forces operating within China's exclusive economic zone (EEZ). The position of the United States and most other countries is that while international law gives coastal states the right to regulate economic activities (such as fishing and oil exploration) within their EEZs, it does not give coastal states the right to regulate foreign military activities in the parts of their EEZs beyond their 12-nautical-mile territorial waters. The position of China and some other countries (i.e., a minority group among the world's nations) is that UNCLOS gives coastal states the right to regulate not only economic activities, but also foreign military activities, in their EEZs. The dispute appears to be at the heart of multiple incidents between Chinese and U.S. ships and aircraft in international waters and airspace since 2001, and has potential implications not only for China's EEZs, but for U.S. naval operations in EEZs globally, and for international law of the sea. A key issue for Congress is how the United States should respond to China's actions in the SCS and ECS-particularly its island-building and base-construction activities in the Spratly Islands-and to China's strengthening position in the SCS. A key oversight question for Congress is whether the Trump Administration has an appropriate strategy-and an appropriate amount of resources for implementing that strategy-for countering China's salami-slicing strategy or gray zone operations for gradually strengthening its position in the SCS, for imposing costs on China for its actions in the SCS and ECS, and for defending and promoting U.S. interests in the region.

China's Maritime Gray Zone Operations Andrew S. Erickson,Ryan D. Martinson,2019-03-15 China's maritime "gray zone" operations represent a new challenge for the U.S. Navy and the sea services of our allies, partners, and friends in maritime East Asia. There, Beijing is waging what some Chinese sources term a "war without gunsmoke." Already winning in important areas, China could gain far more if left unchecked. One of China's greatest advantages thus far has been foreign difficulty in understanding the situation, let alone determining an effective response. With contributions from some of the world's leading subject matter experts, this volume aims to close that gap by explaining the forces and doctrines driving China's paranaul expansion, operating in the "gray zone" between war and peace. The book covers China's major maritime forces beyond core gray-hulled Navy units, with particular focus on China's second and third sea forces: the "white-hulled" Coast Guard and "blue-hulled" Maritime Militia. Increasingly, these paranaul forces, and the "gray zone" in which they typically operate, are on the frontlines of China's seaward expansion.

Naval Warfare, 1815-1914 Lawrence Sondhaus,2012-10-12 This book looks at the transition of wooden sailing fleets to the modern steel navy. It details the technological breakthroughs that brought about this change - steampower, armour, artillery and torpedoes, and looks at their affect on naval strategy and tactics. Part of the ever-growing and prestigious Warfare and History series, this book is a must for enthusiasts of military history.

The Modernisation of the Republic of Korea Navy Ian Bowers,2018-08-11 This book sheds light on one of the most under-studied but powerful navies in the world. Using a multifaceted approach, it examines how the Republic of Korea Navy (ROKN) has sought to transform itself from a coastal naval force focused solely on deterring North Korea to a navy capable of operating in the blue waters of East Asia and beyond. The project argues that peninsular and regional security dynamics, technological developments, the US-South Korea alliance and internal politics combine to inform and shape ROKN modernisation.

Chinese Naval Shipbuilding Andrew S. Erickson,2017-02-15 China's shipbuilding industry has grown more rapidly than any other in modern history. Commercial shipbuilding output jumped thirteen-fold from 2002-12, ensuring that Beijing has largely reached its goal of becoming the world's leading shipbuilder. Yet progress is uneven, with military shipbuilding leading overall but with significant weakness in propulsion and electronics for military and civilian applications. It has never been more important to assess what ships China can supply its navy and other maritime forces with, today and in the future. Chinese Naval Shipbuilding answers three pressing questions: What are China's prospects for success in key areas of naval shipbuilding? What are the likely results for China's navy? What are the implications for the U.S. Navy? To address these critical issues, this volume assembles some of the world's leading experts and linguistic analysts, often pairing them in research teams. These sailors, scholars, industry professionals, and government specialists have commanded ships at sea, led shipbuilding programs ashore, toured Chinese vessels and production facilities, invested in Chinese shipyards, and analyzed and presented important data to top-level decision-makers in times of crisis. In synthesizing their collective insights, this book fills a key gap in our understanding of China, its shipbuilding industry, its navy, and what it all means.

China Goes to Sea Andrew S. Erickson,Lyle J Goldstein,Carnes Lord,2009-07-01 In modern history, China has been primarily a land power, dominating smaller states along its massive continental flanks. But China's turn toward the sea is now very much a reality, as evident in its stunning rise in global shipbuilding markets, its vast and expanding merchant marine, the wide offshore reach of its energy and minerals exploration companies, its growing fishing fleet, and indeed its increasingly modern navy. Yet, for all these achievements, there is still profound skepticism regarding China's potential as a genuine maritime power. Beijing must still import the most vital subcomponents for its shipyards, maritime governance remains severely bureaucratically challenged, and the navy evinces, at least as of yet, little enthusiasm for significant blue water power projection capabilities. This volume provides a truly comprehensive assessment of prospects for China's maritime development by situating these important geostrategic phenomena within a larger world historical context. China is hardly the only land power in history to attempt transformation by fostering sea power. Many continental powers have elected or been impelled to transform themselves into significant maritime powers in order to safeguard their strategic position or advance their interests. We examine cases of attempted transformation from the Persian Empire to the Soviet Union, and determine the reasons for their success or failure. Too many works on China view the nation in isolation. Of course, China's history and culture are to some extent exceptional, but building intellectual fences actually hinders the effort to understand China's current development trajectory. Without underestimating the enduring pull of China's past as it relates to threats to the country's internal stability and its landward borders, this comparative study provides reason to believe that China has turned the

corner on a genuine maritime transformation. If that proves indeed to be the case, it would be a remarkable if not singular event in the history of the last two millennia.

Seapower in Global Politics, 1494-1993 George Modelski,William R. Thompson,1988-06-18

The Kremlin Letters David Reynolds,Vladimir Pechatnov,2018-11-27 A penetrating account of the dynamics of World War II’s Grand Alliance through the messages exchanged by the Big Three Stalin exchanged more than six hundred messages with Allied leaders Churchill and Roosevelt during the Second World War. In this riveting volume—the fruit of a unique British-Russian scholarly collaboration—the messages are published and also analyzed within their historical context. Ranging from intimate personal greetings to weighty salvos about diplomacy and strategy, this book offers fascinating new revelations of the political machinations and human stories behind the Allied triumvirate. Edited and narrated by two of the world’s leading scholars on World War II diplomacy and based on a decade of research in British, American, and newly available Russian archives, this crucial addition to wartime scholarship illuminates an alliance that really worked while exposing its fractious limits and the issues and egos that set the stage for the Cold War that followed.
