Archaeology Anthropology and Interstellar Communication Douglas A. Douglas A. Vakoch, 2015-03-24 Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.

Capital Karl Marx, 2023-10-20

The 2030 Spike Colin Mason, 2013-06-17 The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through

the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, *The 2030 Spike* serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.

Glimpses of Tibetan Divination Petra H. Maurer, Donatella Rossi, Rolf Scheuermann, 2020 *Glimpses of Tibetan Divination: Past and Present* is the first book of its kind, in that it contains articles by a group of eminent scholars who approach the subject matter by investigating it through various facets and salient historical figures. Over the centuries, Tibetans developed many practices of prognostication and adapted many others from neighboring cultures and religions. In this way, Tibetan divination evolved into a vast field of ritual expertise that has been largely neglected in Tibetan Studies. The Tibetan repertoire of divinatory techniques is rich and immensely varied. Accordingly, the specimen of practices discussed in this volume--many of which remain in use today--merely serve as examples that offer glimpses of divination in Tibet. Contributors are Per Kværne, Brandon Dotson, Ai Nishida, Dan Martin, Petra Maurer, Charles Ramble, Donatella Rossi, Rolf Scheuermann, Alexander Smith, and Agata Bareja-Starzynska.

Chinese Writing and Calligraphy Wendan Li, 2010-05-31 Suitable for college and high school students and those learning on their own, this fully illustrated coursebook provides comprehensive instruction in the history and practical techniques of Chinese calligraphy. No previous knowledge of the

language is required to follow the text or complete the lessons. The work covers three major areas: 1) descriptions of Chinese characters and their components, including stroke types, layout patterns, and indications of sound and meaning; 2) basic brush techniques; and 3) the social, cultural, historical, and philosophical underpinnings of Chinese calligraphy—all of which are crucial to understanding and appreciating this art form. Students practice brush writing as they progress from tracing to copying to free-hand writing. Model characters are marked to indicate meaning and stroke order, and well-known model phrases are shown in various script types, allowing students to practice different calligraphic styles. Beginners will find the author's advice on how to avoid common pitfalls in writing brush strokes invaluable. Chinese Writing and Calligraphy will be welcomed by both students and instructors in need of an accessible text on learning the fundamentals of the art of writing Chinese characters.

Olmstead, 2022-08-29 Out of a lifetime of study of the ancient Near East, Professor Olmstead has gathered previously unknown material into the story of the life, times, and thought of the Persians, told for the first time from the Persian rather than the traditional Greek point of view. Logical Reasoning Bradley Harris Dowden, 1993 This book is designed to

engage students' interest and promote their writing abilities while teaching them to think critically and creatively. Dowden takes an activist stance on critical thinking, asking students to create and revise arguments rather than simply recognizing and criticizing them. His book emphasizes inductive reasoning and the analysis of individual claims in the beginning, leaving deductive arguments for consideration later in the course.

Rerolling Boardgames Douglas Brown, Esther MacCallum-Stewart, 2020-08-27
Despite the advent and explosion of videogames, boardgames--from fast-paced party games to intensely strategic titles--have in recent years become more numerous and more diverse in terms of genre, ethos and content. The growth of gaming events and conventions such as Essen Spiel, Gen Con and the UK Games EXPO, as well as crowdfunding through sites like Kickstarter, has diversified the evolution of game development, which is increasingly driven by fans, and boardgames provide an important glue to geek culture. In academia, boardgames are used in a practical sense to teach elements of design and game mechanics. Game studies is also recognizing the importance of expanding its focus beyond the digital. As yet, however, no collected work has explored the many different approaches emerging around the critical challenges that boardgaming represents. In this collection, game theorists analyze boardgame play and player behavior, and explore the complex interactions between the sociality, conflict, competition and cooperation that boardgames foster. Game designers discuss the opportunities boardgame system designs offer for narrative and social play. Cultural theorists discuss boardgames' complex history as both beautiful physical artifacts and special places within cultural experiences of play.

Mesopotamian Planetary Astronomy-astrology David Brown, 2000 Pliny wrote of Babylon that here the creator of the science of astronomy was. Excavations have shown this statement to be true. This book argues that the earliest attempts at the accurate prediction of celestial phenomena are indeed to be found in clay tablets dating to the 8th and 7th centuries BC from both Babylon and from Nineveh. The author carefully situates this astronomy within its cultural context, treating all available material from the relevant period, and also analysing the earlier astrological material and the later well-known ephemerides and related texts. A wholly new approach to cuneiform astral concerns emerges - one in which both celestial divination and the later astronomy are shown to be embedded in a prevailing philosophy dealing with the ideal nature of the early universe, and in which the dynamics of the celestial divination industry that surrounded the last Assyrian monarchs account for no less than the first recorded scientific revolution. This work closely adheres to the original textual sources, and argues for the evolution

on the basis of the needs of the ancient scholars and the internal logic of the divinatory and predictive systems employed. To this end, it offers, for the first time, a Mesopotamian contribution to the philosophy, and not only the history, of science.
