In spite of this - or because of it - play constitutes an essential element of human social and spiritual development. In this study, the author defines play as a free and voluntary activity that occurs in a pure space, isolated and protected from the rest of life.

No previous knowledge of the language is required to follow the text or complete the lessons. The work covers three major areas: 1) descriptions of Chinese characters and their components, including stroke types, layout patterns, and indications of sound and meaning; 2) basic brush techniques; and 3) the social, cultural, historical, and philosophical underpinnings of Chinese calligraphy—all of which are crucial to understanding and appreciating this art form. Students practice brush writing as they progress from tracing to copying to

free-hand writing. Model characters are marked to indicate meaning and stroke order, and well-known model phrases are shown in various script types, allowing students to practice different calligraphic styles. Beginners will find the author's advice on how to avoid common pitfalls in writing brush strokes invaluable. Chinese Writing and Calligraphy will be welcomed by both students and instructors in need of an accessible text on learning the fundamentals of the art of writing Chinese characters.

*The Plague Year* Lawrence Wright, 2021-06-08 From the Pulitzer Prize-winning author of *The Looming Tower*, and the pandemic novel *The End of October*: an unprecedented, momentous account of Covid-19—its origins, its wide-ranging repercussions, and the ongoing global fight to contain it A book of panoramic breadth ... managing to surprise us about even those episodes we ... thought we knew well ... [With] lively exchanges about spike proteins and nonpharmaceutical interventions and disease waves, Wright's storytelling dexterity makes all this come alive." —The New York Times Book Review From the fateful first moments of the outbreak in China to the storming of the U.S. Capitol to the extraordinary vaccine rollout, Lawrence Wright's *The Plague Year* tells the story of Covid-19 in

authoritative, galvanizing detail and with the full drama of events on both a global and intimate scale, illuminating the medical, economic, political, and social ramifications of the pandemic. Wright takes us inside the CDC, where a first round of faulty test kits lost America precious time . . . inside the halls of the White House, where Deputy National Security Adviser Matthew Pottinger's early alarm about the virus was met with confounding and drastically costly skepticism . . . into a Covid ward in a Charlottesville hospital, with an idealistic young woman doctor from the town of Little Africa, South Carolina . . . into the precincts of prediction specialists at Goldman Sachs . . . into Broadway's darkened theaters and Austin's struggling music venues . . . inside the human body, diving deep into the science of how the virus and vaccines function—with an eye-opening detour into the history of vaccination and of the modern anti-vaccination movement. And in this full accounting, Wright makes clear that the medical professionals around the country who've risked their lives to fight the virus reveal and embody an America in all its vulnerability, courage, and potential. In turns steely-eyed, sympathetic, infuriated, unexpectedly comical, and always precise, Lawrence Wright is a formidable

guide, slicing through the dense fog of misinformation to give us a 360-degree portrait of the catastrophe we thought we knew.

*The Tao of Craft* Benebell Wen, 2016-09-27 For the first time in English, Benebell Wen reveals the rich history and theoretical principles underlying the ancient practice of crafting Fu talismans, or magical sigils, in the Chinese Taoist tradition and gives detailed instructions for modern practitioners who would like to craft their own Fu. Fu talismans are ideograms and writings typically rendered on paper and empowered by means of invocations, ritual, and transferences of energy, or Qi. Talismans can be used for many purposes, such as strengthening or weakening personality characteristics, finding love, earning more money, or easing emotional tensions in the home. The Tao of Craft shows how metaphysical energy can be harnessed to amplify, strengthen, weaken, dispel, or block other metaphysical energy and to rectify perceived imbalances in the material plane. Supported by an abundance of detailed charts and images, this book serves as a step-by-step handbook that gives readers the knowledge and confidence to craft their own Fu talismans for personal empowerment.

Wen, author of *Holistic Tarot*, delves into historic and cultural contexts of the Fu, from the neolithic period of Chinese history to contemporary practices of esoteric Taoism. Providing a solid foundation in the principles of Eastern spellcrafting, she highlights the blending of Taoist metaphysical practices with Western approaches to magic by pointing out eclectic, integrating, and harmonizing facets from other cultures and religions. Historically, Fu talismans were used by medieval Chinese for alleviating illness; averting misfortune, magical attacks, and curses; defending against assaults; and avoiding poverty. This book shows Western practitioners that the skill and knowledge to develop an interactive relationship with spirit realms are still available to them today, and serves as a practical handbook for accumulating Qi energy from sources in the environment and channeling it in concentrated form into their own Fu talismans.

*Astronomy and Calendars – The Other Chinese Mathematics* Jean-Claude Martzloff, 2016-09-01

Presented from the viewpoint of the history of mathematics, this book explores both epistemological aspects of Chinese traditional mathematical astronomy and lunisolar calendrical calculations. The following issues are addressed: (1) connections with non-Chinese cultural areas; (2) the possibility or impossibility of using mathematics to predict astronomical phenomena, a question that was constantly raised by the Chinese from antiquity through medieval times; (3) the modes of representation of numbers, and in particular the zero, found in the context of Chinese calendrical calculations; and (4) a detailed analysis of lunisolar calendrical calculations. Fully worked-out examples and comparisons between the results of calculations and the content of Chinese historical calendars from various

periods are provided. Traditional Chinese calendrical and mathematical astronomy consists of permanently reformed mathematical procedures designed to predict, but not explain, phenomena pertaining to astronomy and related areas. Yet, despite appearances, models of the mathematical techniques hidden behind this voluminous corpus reveal that they depend on a limited number of clear-cut mathematical structures. Although only a small fraction of these techniques have been fully studied, what is known surprisingly broadens our knowledge of the history of Chinese mathematics. Sinologists interested in the history of Chinese science, and anyone interested in the history of Chinese mathematics, the Chinese calendar, and the history of Chinese mathematical astronomy from its origin (104 BC) to its European reform (AD 1644) will find this book very useful. The present English language edition is a fully revised and updated version of the French original. Even though this is a research monograph in sinology, no particular sinological background is required, although a basic understanding of ‘concrete mathematics’ is needed. From the reviews of the French edition: This is a demanding, rigorous book to read ... worth the concentrated study it requires. The rewards are not

only in the details but in the general overview that ...[it] provides. Joseph Dauben, EASTM, 2011 ...first Work in a Western language to turn to for anyone interested in the details of Chinese calendrical computations. Benno Van Dalen, ISIS, 2011 Martzloff's careful scholarship and his overall look at the calendar beyond astronomical calculations, ..., make this book a most valuable contributions to a field of increasing interest. Noun+Noun Compounds in Italian Radimský Jan, 2015-12-28 This book investigates one concrete compounding pattern in present-day Italian within a larger overview of Italian compounding. Various accounts and classifications of Noun + Noun combinations in Italian are reviewed, with special focus on the status of the lexical integrity hypothesis. The author sets out to propose an integrated approach to the Noun + Noun compounding pattern, rigorously based on large representative data sets that were extracted from the Italian web corpus ItWaC as both automatically and manually post-processed frequency lists. On the basis of such data, it is aimed to show the behaviour of various subtypes of Noun + Noun compounds. Starting out with the Bisetto-Scalise classification, the author carefully

examines the status of coordinate compounds, ATAP compounds (i.e., the group comprising attributive and appositive structures) and subordinate compounds (comprising verbal-nexus and grounding compounds), discussing both theoretical and empirical implications of this classification scheme. Moreover, the original Bisetto-Scalise model is supplemented with further classification levels in order to capture specific compounding types such as relational (i.e. inherently trinominal) compounds. A major merit of the present study lies in the quantitative dimension of the data it deals with. In light of this data, the author emphasizes the gradient nature of the traditional dichotomy between syntax and compounding. The book will thus appeal not only to the linguists interested specifically in Italian word-formation, but also to a larger community of scholars who seek a more general view of the word-formation phenomena.

*Facebook Democracy* José Marichal, 2016-04-15 In July 2010, Facebook had over 500 million subscribers worldwide and the rapid rise of the site prompted Time magazine to name Facebook's founder Mark Zuckerberg its person of the year for 2010. This novel book advances our understanding of how democratic citizens are transformed by the Facebook revolution. Despite increasing interest in politics and popular media, there has been little academic work on the impact of Facebook on politics in general, and on democratic processes in particular. The work that does exist has been limited to Facebook's impact on politics as a mobilization tool used by social movement activists. In this book, José Marichal argues that understanding Facebook's impact on political processes requires an understanding of how Facebook's architecture of disclosure shapes the construction of individuals' political identities by drawing users further into their pre-selected social networks. Drawing on a number of disciplines and an ethnographic analysis of 250 Facebook political groups, Marichal

explores how Facebook's emphasis on social connection impacts key dimensions of political participation: e.g., mobilization, deliberation, and attitude formation.
