**Achtung-Panzer!** Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

**In Other Worlds** A.A. Attanasio, 2014-02-27 One star-chained evening in a Manhattan bathroom, Carl Schirmer spontaneously combusts! His body transforms into light, mysteriously snatched from his banal life by an alien intelligence 130 billion years in the future. There, all spacetime is collapsing into a cosmic black hole, the Big Crunch - and a bold, cosmic destiny awaits Carl. Rebuilt from the remnants of his light by extraterrestrials for a cryptic purpose, he awakens in time's last world, the strangest of all - the World. At the edge of infinity, Carl discovers the Foke, nomadic humans who travel among the floating islands of the World. The Foke teach him how to live - and love - at the end of time, and he loses his heart to his plucky guide, the beautiful Evoë. Their life together in this blissful kingdom that knows no aging or disease brings them to rapture - until Evoë falls prey to the zotl, a spidery intelligence who hunt the Foke and eat the chemical by-products of their pain. In order to save his beloved from a gruesome death, Carl must return to Earth - 130 billion years earlier - where he is shocked to discover that the Earth he's come back to is not the one he left. Can he meet the harsh demands of his task before the zotl find him and begin ravishing the Earth? Author's Note: The volumes of this series can each be read independently of the others. The feature that unifies them is their individual observations of science fiction's sub-genre: space opera, which the editors David G. Hartwell and Kathryn Cramer define as colorful, dramatic, large-scale science fiction adventure, competently and sometimes beautifully written, usually focused on a sympathetic, heroic central character and plot action, and usually set in the relatively distant future, and in space or on

other worlds, characteristically optimistic in tone. It often deals with war, piracy, military virtues, and very large-scale action, large stakes.
