**Postwar** Tony Judt, 2006-09-05 Finalist for the Pulitzer Prize • Winner of the Council on Foreign Relations Arthur Ross Book Award • One of the New York Times' Ten Best Books of the Year "Impressive . . . Mr. Judt writes with enormous authority." —The Wall Street Journal "Magisterial . . . It is, without a doubt, the most comprehensive, authoritative, and yes, readable postwar history." —The Boston Globe Almost a decade in the making, this much-anticipated grand history of postwar Europe from one of the world's most esteemed historians and intellectuals is a singular achievement. Postwar is the first modern history that covers all of Europe, both east and west, drawing on research in six languages to sweep readers through thirty-four nations and sixty years of political and cultural change—all in one integrated, enthralling narrative. Both intellectually ambitious and compelling to read, thrilling in its scope and delightful in its small details, Postwar is a rare joy. Judt's book, *Ill Fares the Land*, republished in 2021 featuring a new preface by bestselling author of *Between the World and Me* and *The Water Dancer*, Ta-Nehisi Coates.

**Brand Admiration** C. Whan Park, Deborah J. MacInnis, Andreas B. Eisingerich, 2016-09-16 Brand Admiration uses deep research on consumer psychology, marketing, consumer engagement and communication to develop a powerful, integrated perspective and innovative approach to brand management. Using numerous real-world examples and backed by research from top notch academics, this book describes how companies can turn a product, service, corporate, person or place brand into one that customers love, trust and respect; in short, how to make a brand admired. The result? Greater brand loyalty, stronger brand advocacy, and higher brand equity. Admired brands grow more revenue in a more efficient way over a longer period of time and with more opportunities for growth. The real power of Brand Admiration is that it provides concrete, actionable guidance on how brand managers can make customers (and employees) admire a brand. Admired brands don't just do the job; they offer exactly what customers need (enabling benefits), in way that's pleasing, fun, interesting, and emotionally involving (enticing benefits), while making people feel good about themselves (enriching benefits). Providing these benefits, called 3 Es, is foundational to building, strengthening and leveraging brand admiration. In addition, the authors articulate a common-sense and action based measure of brand equity, and they develop dashboard metrics to diagnose if there are any 'canaries in the coal mine', and if so, what to do next. In short, Brand Admiration provides a coherent, cohesive approach to helping the brand stand the test of time. A well-designed, well-managed brand becomes a part of the public consciousness, and ultimately, a part of the culture. This trajectory is the fruit of decisions made from an integrated strategic standpoint. This book shows you how to shift the process for your brand, with practical guidance and an analytical approach.

### **Toward a Reference Grammar of Tok Pisin** John W. M. Verhaar,1995-01-01

### **Ents, Elves, and Eriador** Matthew T. Dickerson,Jonathan Evans,2006-11-17

Many readers drawn into the heroic tales of J. R. R. Tolkien's imaginary world of Middle-earth have given little conscious thought to the importance of the land itself in his stories or to the vital roles played by the flora and fauna of that land. As a result, *The Hobbit*, *The Lord of the Rings*, and *The Silmarillion* are rarely considered to be works of environmental literature or mentioned together with such authors as John Muir, Rachel Carson, or Aldo Leopold. Tolkien's works do not express an activist agenda; instead, his environmentalism is expressed in the form of literary fiction. Nonetheless, Tolkien's vision of nature is as passionate and has had as profound an influence on his readers as that of many contemporary environmental writers. The burgeoning field of agrarianism provides new insights into Tolkien's view of the natural world and environmental responsibility. In *Ents, Elves, and Eriador*, Matthew Dickerson and Jonathan Evans show how Tolkien anticipated some of the tenets of modern environmentalism in the imagined world of Middle-earth and the races with which it is peopled. The philosophical foundations that define Tolkien's environmentalism, as well as the practical outworking of these philosophies, are found throughout his work. Agrarianism is evident in the pastoral lifestyle and sustainable agriculture of the Hobbits, as they harmoniously cultivate the land for food and goods. The Elves practice aesthetic, sustainable horticulture as they shape their forest environs into an elaborate garden. To complete Tolkien's vision, the Ents of Fangorn Forest represent what Dickerson and Evans label feraculture, which seeks to preserve wilderness in its natural form. Unlike the Entwives, who are described as cultivating food in tame gardens, the Ents risk eventual extinction for their beliefs. These ecological philosophies reflect an aspect of Christian stewardship rooted in Tolkien's Catholic faith. Dickerson and Evans define it as stewardship of the kind modeled by Gandalf, a stewardship that nurtures the land rather than exploiting its life-sustaining capacities to the point of exhaustion. Gandalfian stewardship is at odds with the forces of greed exemplified by Sauron and Saruman, who, with their lust for power, ruin the land they inhabit, serving as a dire warning of what comes to pass when stewardly care is corrupted or ignored. Dickerson and Evans examine Tolkien's major works as well as his lesser-known stories and essays, comparing his writing to that of the most important naturalists of the past century. A vital contribution to environmental literature and an essential addition to Tolkien scholarship, *Ents, Elves, and Eriador* offers both Tolkien fans and environmentalists an understanding of Middle-earth that has profound implications for environmental stewardship in the present and the future of our own world.

**Globalism, Nationalism, Tribalism** Paul James,2006-04-20 `Paul James has written a magnificent account of the world's current condition, one that highlights the complexities and contradictions with which people, communities, and nations must contend and that does so in a compelling and creative style. Stressing the interaction between global and local forces, his writing style is lively and compelling as well as peppered with a wide range of citations, from *Woman's Day* to the *Cambodian Daily* (on the same page!)- James N Rosenau, University Professor of International Affairs, The George Washington University *Globalism, Nationalism, Tribalism* establishes a new basis for understanding the changing nature of polity and community and offers unprecedented attention to these dominant trends. Paul James charts the contradictions and tensions we all encounter in an era of increasing globalization, from genocide and terrorism to television and finance capital. Globalism is treated as an uneven and layered process of spatial expansion, not simply one of disorder, fragmentation or rupture. Nor is it simply a force of homogenization. Nationalism is taken seriously as a continuing and important formation of contemporary

identity and politics. James rewrites the modernism theories of the nation-state without devolving into the postmodernist assertion that all is invention or surface gloss. Tribalism is given the attention it has long warranted and is analyzed as a continuing and changing formation of social life, from the villages of Rwanda to the cities of the West. Theoretically adept and powerfully argued, this is the first comprehensive analysis that brings these crucial themes of contemporary life together.

**Civilization** Niall Ferguson, 2011-11-01 From the bestselling author of *The Ascent of Money* and *The Square and the Tower* "A dazzling history of Western ideas." —The Economist "Mr. Ferguson tells his story with characteristic verve and an eye for the felicitous phrase." —Wall Street Journal "[W]ritten with vitality and verve . . . a tour de force." —Boston Globe Western civilization's rise to global dominance is the single most important historical phenomenon of the past five centuries. How did the West overtake its Eastern rivals? And has the zenith of Western power now passed? Acclaimed historian Niall Ferguson argues that beginning in the fifteenth century, the West developed six powerful new concepts, or "killer applications"—competition, science, the rule of law, modern medicine, consumerism, and the work ethic—that the Rest lacked, allowing it to surge past all other competitors. Yet now, Ferguson shows how the Rest have downloaded the killer apps the West once monopolized, while the West has literally lost faith in itself. Chronicling the rise and fall of empires alongside clashes (and fusions) of civilizations, *Civilization: The West and the Rest* recasts world history with force and wit. Boldly argued and teeming with memorable characters, this is Ferguson at his very best.

**The Reformed Doctrine of Predestination** Loraine Boettner, 2011-07-01 One of the 20th-century's most reasoned explanations of the sovereignty of God and the Reformed interpretation of salvation. Whoever really wants to know what Calvinism teaches cannot do better than to read this book from cover to cover.--United Presbyterian magazine.

**Art and Knowledge** James O. Young, 2003-09-02 Almost all of us would agree that the experience of art is deeply rewarding. Why this is the case remains a puzzle; nor does it explain why many of us find works of art much more important than other sources of pleasure. *Art and Knowledge* argues that the experience of art is so rewarding because it can be an important source of knowledge about ourselves and our relation to each other and to the world. The view that art is a source of knowledge can be traced as far back as Aristotle and Horace. Artists as various as Tasso, Sidney, Henry James and Mendelssohn have believed that art contributes to knowledge. As attractive as this view may be, it has never been satisfactorily defended, either by artists or philosophers. *Art and Knowledge* reflects on the essence of art and argues that it ought to provide insight as well as pleasure. It argues that all the arts, including music, are importantly representational. This kind of representation is fundamentally different from that found in the sciences, but it can provide insights as important and profound as available from the sciences. Once we recognise that works of art can contribute to knowledge we can avoid thorough relativism about aesthetic value and we can be in a position to evaluate the avant-garde art of the past 100 years. *Art and Knowledge* is an exceptionally clear and interesting, as well as controversial, exploration of what art is and why it is valuable. It will be of interest to all philosophers of art, artists and art critics.

**The Rise of China and India in Africa** Fantu Cheru, Cyril Obi, 2010-03-11 In recent years, China and India have become the most important economic partners of Africa and their footprints are growing by leaps and bounds, transforming Africa's international relations in a dramatic way. Although the overall impact of China and India's engagement in Africa has been positive in the short-term, partly as a result of higher returns from commodity exports fuelled by excessive demands from both countries, little research exists on the actual impact of China and India's growing involvement on Africa's economic transformation. This book examines in detail the opportunities and challenges posed by the

increasing presence of China and India in Africa, and proposes critical interventions that African governments must undertake in order to negotiate with China and India from a stronger and more informed platform.

Industrial Efficiency and State Intervention Dr Nick Tiratsoo, Nick Tiratsoo, Jim Tomlinson, 2005-09-30 Nick Tiratsoo and Jim Tomlinson describe and assess the Labour Party's development of a policy of improving industrial efficiency. They concentrate on the debates and initiatives of the wartime period and subsequent implementation of policy under Attlee. The book modifies existing historiography in two ways - it shows that the Labour Party of 1945-51 was concerned mainly with industrial modernization, not with creating the Welfare State, and it tackles the consequently necessary re-evaluation of wider theories about Britain's economic decline.

*Riviera to the Rhine* Robert Ross Smith, Jeffrey Clarke, 2015-07-27 With the publication of *Riviera to the Rhine*, the Center of Military History completes its series of operational histories treating the activities of the U.S. Army's combat forces during World War II. This volume examines the least known of the major units in the European theater, General Jacob L. Devers' 6th Army Group. Under General Devers' leadership, two armies, the U.S. Seventh Army under General Alexander M. Patch and the First French Army led by General Jean de Lattre de Tassigny, landing on the Mediterranean coast near Marseille in August 1944, cleared the enemy out of southern France and then turned east and joined with army groups under Field Marshal Sir Bernard L. Montgomery and General Omar N. Bradley in the final assault on Germany. In detailing the campaign of these Riviera-based armies, the authors have concentrated on the operational level of war, paying special attention to the problems of joint, combined, and special operations and to the significant roles of logistics, intelligence, and personnel policies in these endeavors. They have also examined in detail deception efforts at the tactical and operational levels, deep battle penetrations, river-crossing efforts, combat in built-up areas, and tactical innovations at the combined arms level.

Contemporary Conflict Resolution Oliver Ramsbotham, Hugh Miall, Tom Woodhouse, 2011-04-11 Offering an assessment of the theory and practice of conflict resolution in post-Cold War conflicts, this book addresses a number of questions. It explores the nature of contemporary conflict and the development of conflict resolution.

**Industrial Efficiency and State Intervention** Nick Tiratsoo, Jim Tomlinson, 1993 Nick Tiratsoo and Jim Tomlinson describe and assess the Labour Party's development of a policy of improving industrial efficiency. They concentrate on the debates and initiatives of the wartime period and subsequent implementation of policy under Attlee. The book modifies existing historiography in two ways - it shows that the Labour Party of 1945-51 was concerned mainly with industrial modernization, not with creating the Welfare State, and it tackles the consequently necessary re-evaluation of wider theories about Britain's economic decline.

**Employing Bureaucracy** Sanford M. Jacoby, 2004 The present revised edition is an attempt to understand how industrial labor was transformed and to identify the historical process by which good jobs were created. It is, therefore, an account of the bureaucratization of employment, since many of the features that define good jobs; stability, internal promotion, and rule-bound procedures are characteristic of bureaucratic organizations. The book also examines the upheaval in the labor markets of the 1980's and 1990's, which has caused a reduction in the number of good jobs. Chapter 9 in this revised edition carries the narrative forward from 1945 to the present time, examining both the high-point of the bureaucratic system in the 1950's and 1960's--the golden years--and its erosion since then.

**The Lion and the Springbok** Ronald Hyam, Peter Henshaw, 2003-05-15 The Lion and the Springbok presents an account of the dynamics and divergences of the 'uneasy special relationship' of Britain and South Africa. From the bruising experience of the South African War (1899-1902) to South Africa's withdrawal from the Commonwealth in 1961, the authors chart this relationship in all its political, economic, cultural and geostrategic aspects. All the major disputes are discussed including the struggle for the High Commission Territories, the crisis over Seretse Khama's marriage and the transfer of the Simon's Town naval base. These issues trace, for the most part, a continuing deterioration in relations, as Afrikaner nationalist identity hardened and South African politics slid into the extremes of apartheid. The perceptions each side had of the other after 1948 are examined through representations in the media, and an epilogue considers the reasons for the return of the 'New South Africa' to the Commonwealth in 1994.
