Talking to Strangers Malcolm Gladwell,2019-09-10 Malcolm Gladwell, host of the podcast Revisionist History and author of the #1 New York Times bestseller *Outliers*, offers a powerful examination of our interactions with strangers and why they often go wrong—now with a new afterword by the author. A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Press How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to one another that isn't true? Talking to Strangers is a classically Gladwellian intellectual adventure, a challenging and controversial excursion through history, psychology, and scandals taken straight from the news. He revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, the suicide of Sylvia Plath, the Jerry Sandusky pedophilia scandal at Penn State University, and the death of Sandra Bland—throwing our understanding of these and other stories into doubt. Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we don't know. And because we don't know how to talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world. In his first book since his #1 bestseller *David and Goliath*, Malcolm Gladwell has written a gripping guidebook for troubled times.

Postwar Tony Judt,2006-09-05 Finalist for the Pulitzer Prize • Winner of the Council on Foreign Relations Arthur Ross Book Award • One of the New York Times' Ten Best Books of the Year “Impressive . . . Mr. Judt writes with enormous authority.” —The Wall Street Journal “Magisterial . . . The Funding of School Education Organization for Economic Cooperation and Development,2017 This report on the funding of school education constitutes the first in a series of thematic comparative reports bringing together findings from the OECD School Resources Review. School systems have limited financial resources with which to pursue their objectives and the design of school funding policies plays a key role in ensuring that resources are directed to where they can make the most difference. As OECD school systems have become more complex and characterised by multi-level governance, a growing set of actors are increasingly involved in financial decision-making. This requires designing funding allocation models that are aligned to a school system's governance structures, linking budget planning procedures at different levels to shared educational goals and evaluating the use of school funding to hold decision makers accountable and ensure that resources are used effectively and equitably. This report was co-funded by the European Commission. .

Artificial Hells Claire Bishop,2012-07-24 Since the 1990s, critics and curators have broadly accepted the notion that participatory art is the ultimate political art: that by encouraging an audience to take part an artist can promote new emancipatory social relations. Around the world, the champions of this form of expression are numerous, ranging from art historians such as Grant Kester, curators such as Nicolas Bourriaud and Nato Thompson, to performance theorists such as Shannon Jackson. *Artificial Hells* is the first historical and theoretical overview of socially engaged participatory art, known in the US as social practice. Claire Bishop follows the trajectory of twentieth-century art and examines key moments in the development of a participatory aesthetic. This itinerary takes in Futurism and Dada; the Situationist International; Happenings in Eastern Europe, Argentina and Paris; the 1970s Community Arts Movement; and the Artists Placement Group. It concludes with a discussion of long-term educational projects by contemporary artists such as Thomas Hirschhorn, Tania Bruguera, Paweł Althamer and Paul Chan. Since her controversial essay in *Artforum* in 2006, Claire Bishop has been one of the few to challenge the political and aesthetic ambitions of participatory art. In *Artificial Hells*, she not only scrutinizes the emancipatory claims made for these projects, but also provides an alternative to the ethical (rather than artistic) criteria invited by such artworks. *Artificial Hells* calls for a less prescriptive approach to art and politics, and for more compelling, troubling and bolder forms of participatory art and criticism.

Innovative case studies of underground cities and floating city bridges are presented in this book. Two concepts relevant to conventional buildings including private open spaces and place attachments are also included, and these topics can be upgraded in the future by smart technologies.

Post-Communist Mafia State B lint Magyar,2016-03-01 Having won a two-third majority in Parliament at the 2010 elections, the Hungarian political party Fidesz removed many of the institutional obstacles of exerting power. Just like the party, the state itself was placed under the control of a single individual, who since then has applied the techniques used within his party to enforce submission and obedience onto society as a whole. In a new approach the author characterizes the system as the 'organized over-world', the 'state employing mafia methods' and the 'adopted political family', applying these categories not as metaphors but elements of a coherent conceptual framework. The actions of the post-communist mafia state model are closely aligned with the interests of power and wealth concentrated in the hands of a small group of insiders. While the traditional mafia channeled wealth and economic players into its spheres of influence by means of direct coercion, the mafia state does the same by means of parliamentary legislation, legal prosecution, tax authority, police forces and secret service. The innovative conceptual framework of the book is important and timely not only for Hungary, but also for other post-communist countries subjected to autocratic rules. Ÿ

The Thirty Years War Peter H. Wilson,2019-08-20 A deadly continental struggle, the Thirty Years War devastated seventeenth-century Europe, killing nearly a quarter of all Germans and laying waste to towns and countryside alike. Peter Wilson offers the first new history in a generation of a horrifying conflict that transformed the map of the modern world. When defiant Bohemians tossed the Habsburg emperor's envoys from the castle windows in Prague in 1618, the Holy Roman Empire struck back with a vengeance. Bohemia was ravaged by mercenary troops in the first battle of a conflagration that would engulf Europe from Spain to Sweden. The sweeping narrative encompasses dramatic events and unforgettable individuals—the sack of Magdeburg; the Dutch revolt;

the Swedish militant king Gustavus Adolphus; the imperial generals, opportunistic Wallenstein and pious Tilly; and crafty diplomat Cardinal Richelieu. In a major reassessment, Wilson argues that religion was not the catalyst, but one element in a lethal stew of political, social, and dynastic forces that fed the conflict. By war's end a recognizably modern Europe had been created, but at what price? The Thirty Years War condemned the Germans to two centuries of internal division and international impotence and became a benchmark of brutality for centuries. As late as the 1960s, Germans placed it ahead of both world wars and the Black Death as their country's greatest disaster. An understanding of the Thirty Years War is essential to comprehending modern European history. Wilson's masterful book will stand as the definitive account of this epic conflict. For a map of Central Europe in 1618, referenced on page XVI, please visit this book's page on the Harvard University Press website.

A Therapist's View of Personal Goals Carl Rogers, 2021-08-12 2021 Reprint of the 1960 Edition. Facsimile of the original edition and not reproduced with Optical Recognition Software. In this essay, delivered as an address at Haverford College, Pennsylvania in 1959, Rogers discusses man's purpose and goal in life. In his therapeutic work Rogers sees clients take such directions as: away from facades; away from oughts; away from meeting expectations; away from pleasing others; toward being a process; toward being a complexity; toward openness to experience; toward acceptance of others; toward trust of self. Given a therapeutic climate of warmth, acceptance, and empathic understanding, the client moves from what he is not toward being, toward becoming that which he inwardly and actually is. Quoting Kierkegaard, to be that self which one truly is. A worthy goal indeed.

European Drawings 2 George R. Goldner, Lee Hendrix, Kelly Pask, 1992-10-08 The Getty Museum's collection of drawings was begun in 1981 with the purchase of a Rembrandt nude and has since become an important repository of European works from the fifteenth through the nineteenth century. As in the first volume devoted to the collection (published in 1988 in English and Italian editions), the text is here organized first by national school, then alphabetically by artist, with individual works arranged chronologically. For each drawing, the authors provide a discussion of the work's style, dating, iconography, and relationship to other works, as well as provenance and a complete bibliography.

Transforming Communication in Leadership and Teamwork Renate Motschnig, David Ryback, 2016-11-07 This accessible, highly interactive book presents a transformative approach to communication in leadership to meet workplace challenges at both local and global levels. Informed by neuroscience, psychology, as well as leadership science, it explains how integrating and properly balancing two key focal points of management—the tasks at hand and the concerns of others and self—can facilitate decision-making, partnering with diverse colleagues, and handling of crises and conflicts. Case examples, a self-test, friendly calls for reflection, and practical exercises provide readers with varied opportunities to assess, support, and evoke their readiness to apply these real-world concepts to their own style and preferences. Together, these chapters demonstrate the best outcomes of collaborative communication: greater effectiveness, deeper empathy with improved emotional fulfillment, and lasting positive change. Included in the coverage: · As a manager, can I be human? Using the two-agenda approach for more effective—and humane—management. · Being and becoming a person-centered leader and manager in a crisis environment. · Methods for transforming communication: dialogue. · Open Case: A new setting for problem-solving in teams. · Integrating the two agendas in agile management. · Tasks and people: what neuroscience reveals about managing both more effectively. · Transforming communication in multicultural contexts for better understanding across cultures. As a skill-building resource, Transforming Communication in Leadership and Teamwork offers particular value: · to diverse business professionals, including managers, leaders, and team members seeking to become more effective · business consultants and coaches working with people in executive positions and/or teams · leaders and members of multi-national teams · executives, decision makers and organizational developers · instructors and students of courses on effective communication, social and professional skills, human resources, communication and digital media, leadership, teamwork, and related subjects.

Diaspora and Transnationalism Rainer Bauböck, Thomas Faist, 2010 Diaspora & transnationalism are widely used concepts in academic & political discourses. Although originally referring to quite different phenomena, they increasingly overlap today. Such inflation of meanings goes hand in hand with a danger of essentialising collective identities. This book analyses this topic.

Archispeak Tom Porter, 2004-08-02 Widely used in architectural circles in the heat of discussion, the recurrent use of particular words and terms has evolved into a language of design jargon. Commonly found in architectural literature and journalism, in critical design debate and especially in student project reviews, Archispeak can seem insular and perplexing to others and -- particularly to the new architectural student -- often incomprehensible. There is a need to translate architectural design concepts into spoken and written commentary -- each word in use embodying a precise and universally accepted architectural

meaning. If we explore the vocabulary of this language we gain insight into good design practice and into collective understanding of what constitutes a refined architecture. This unique illustrated guide will help students understand the nuances of this specialized language and help them in communicating their own design ideas.
