**Sustainable Energy – without the hot air** David JC MacKay,2016-05-14 The enlightening, best-selling book on understanding sustainable energy and how we can make energy plans that add up. If you've ever wondered how much energy we use, and where it comes from – and where it could come from – but are fed up with all the hot air and 'greenwash', this is the book for you. Renewable resources are 'huge', but our energy consumption is also 'huge'. To compare 'huge' things with each other, we need numbers, not adjectives. Sustainable Energy – without the hot air addresses the energy crisis objectively, cutting through all the contradictory statements from the media, government, and lobbies of all sides. It gives you the numbers and the facts you need, in bite-sized chunks, so you can understand the issues yourself and organises a plan for change on both a personal level and an international scale – for Europe, the United States, and the world. In case study format, this informative book also answers questions surrounding nuclear energy, the potential of sustainable fossil fuels, and the possibilities of sharing renewable power with foreign countries. Written by David MacKay, who was an esteemed Professor of Engineering at the University of Cambridge and Chief Scientific Advisor to the UK Department of Climate Change, this is an uplifting, jargon-free and informative read for all. In it, David debunks misinformation and clearly explains the calculations of expenditure per person to encourage people to make individual changes that will benefit the world at large. If you've thrown your hands up in despair thinking no solution is possible, then read this book - it's an honest, realistic, and humorous discussion of all our energy options.

**Brand Gender** Theo Lieven,2017-10-06 This book explores ways to drive and increase a brand's most important property, its equity. Focussing on gender, the author analyses the impact of assigning personalities and characteristics to products and how this can affect the management of brands on a global scale. Using detailed examples, the author argues that brands with low masculine and feminine characteristics have the lowest equity, whilst brands with both high feminine and masculine characteristics are shown to have the strongest equity. Including notions of androgyny in brands, this significant study reveals the different factors which can affect a brand being perceived as either masculine or feminine. Aiming to develop a comprehensive theory and provide practitioners with a guide to increasing the equity of their brands, this controversial and pioneering book lays the foundation for creating a global brand personality model.

**Describing Discourse** Nicola Woods,2014-05-12 For anyone approaching Discourse Analysis for the first time, theory means little when it is not related to actual knowledge and experience of language in use. Describing Discourse takes the unique approach of introducing discourse studies through the hands-on analysis of linguistic data. The book introduces students to specific discourses constructed for particular purposes, for example, from the domains of advertising, law, medicine and education. Each chapter provides examples, exercises and commentary designed to develop the analytical abilities needed in describing the characteristic forms and typical functions of different discourses. Describing Discourse provides the ideal entry into the study of discourse for students new to the subject.

**Brand Meaning** Mark Batey,2015-12-07 This second edition of Brand Meaning lays out new territory for the understanding of how brands both acquire and provide meaning. The author draws on his experience with leading international companies to propose a compelling framework for the conscious and unconscious ways in which people connect with products and brands. Revised and updated, it contains contemporary as well as classic examples of brand meaning in practice from various countries, and expands on the theory, methods and applications of brand meaning. The book's multidisciplinary approach and concise yet comprehensive content makes it an ideal supplemental reader for undergraduate, graduate, and MBA courses, as well as valuable reading for practitioners in the fields of marketing, advertising and consumer research. **B2B Brand Management** Philip Kotler,Waldemar Pfoertsch,2006-09-22 This is one of the first books to probe deeply into the art and science of branding industrial products. The book comes at a time when more industrial companies need to start using branding in a sophisticated way. It provides the concepts, the theory, and dozens of cases illustrating the successful branding of industrial goods. It offers strategies for a successful development of branding concepts for business markets and explains the benefits and the value a business, product or service provides to industrial customers. As industrial companies are turning to branding this book provides the best practices and hands-on advice for B2B brand management.

**Advertising as Communication** Gillian Dyer,2008-03-07 Advertising is a form of communication that constantly impinges on our daily lives, yet we are often unaware of its more subtle form of persuasion, or of the extent to which it manipulates our (consumer) culture. This book sets out to examine advertising as a form of communication in contemporary society and also places it in its wider cultural and economic context.

**Out of Gas** David L. Goodstein,2005 David Goodstein explains the scientific principles of the inevitable fossil fuel shortage and the closely related peril to the earth's climate.

Georges Perec: A Life in Words David Bellos,2010-11-30 It's hard to see how anyone is ever going to better this User's Manual to the life of Georges Perec - Gilbert Adair, Sunday Times Winner of the Prix Goncourt for Biography, 1994 George Perec (1936-82) was one of the most significant European writers of the twentieth century and undoubtedly the most versatile and innovative writer of his generation. David Bellos's comprehensive biography - which also provides the first full survey of Perec's irreverent, polymathic oeuvre - explores the life of an anguished, comical and endearingly modest man, who worked quietly as an archivist in a medical research library. The French son of Jewish immigrants from Poland, he remained haunted all of his life by his father's death in the war, fighting to defend France, and his mother's in Auschwitz-Birkenau. His acclaimed novel *A Void* (1969) - written without using the letter e - has been seen as an attempt to escape from the words père, mere, and even George Perec. His career made an auspicious start with *Things: A Story of the Sixties* (1965), which won the Prix Renaudot. He then pursued an idiosyncratic and ambitious literary itinerary through the intellectual ferment of Paris in the 1960s and 1970s. He belonged to the Ouvrier de Littérature Potentielle (Oulipo), a radically inventive group of writers whose members included Raymond Queneau and Italo Calvino. Perec achieved international celebrity with *Life A User's Manual* (1978), which won the Prix Medcis and was voted Novel of the Decade by the Salon du Livre. He died in his mid-forties after a short illness, leaving a truly puzzling detective novel, *53 Days*, incomplete. Professor Bellos's book enables us at once to relish the most wilfully bizarre aspects of Perec's oeuvre and to understand the whys and wherefores of his protean nature - Jonathan Romney, Literary Review

Yugoslavia's Sunny Side Hannes Grandits,Karin Taylor,2010-01-01 This book undertakes a critical analysis of the history of domestic tourism in Yugoslavia under Communism. Despite the central role of tourism in the political making of the Yugoslav socialist state after WWII and in everyday life, the topic has remained neglected as an object of historical research, which has tended to dwell on war and ethnic conflict in the past two decades. For many former citizens of Yugoslavia, however, memories of holidaymaking, as well as tourism as a means of livelihood, today evoke a sense of the good life people enjoyed before the economy, and subsequently the country, fell apart. The story evolved from the popularization of tourism and holidaymaking among Yugoslav citizens in the 1950s and 1960s to the consumer practices of the 1970s and 1980s. The essays review tourism as a political, economic and social project of the Yugoslav federal state, and as a crucial field of social integration; it is investigated how ideologies aimed to turn workers into consumers of purposeful leisure, and how these ideas were set against actual practices of recreation and holidaymaking.

*Brands and Branding* Rita Clifton, 2009-04-01 With contributions from leading brand experts around the world, this valuable resource delineates the case for brands (financial value, social value, etc.) and looks at what makes certain brands great. It covers best practices in branding and also looks at the future of brands in the age of globalization. Although the balance sheet may not even put a value on it, a company's brand or its portfolio of brands is its most valuable asset. For well-known companies it has been calculated that the brand can account for as much as 80 percent of their market value. This book argues that because of this and because of the power of not-for-profit brands like the Red Cross or Oxfam, all organisations should make the brand their central organising principle, guiding every decision and every action. As well as making the case for brands and examining the argument of the anti-globalisation movement that brands are bullies which do harm, this second edition of Brands and Branding provides an expert review of best practice in branding, covering everything from brand positioning to brand protection, visual and verbal identity and brand communications. Lastly, the third part of the book looks at trends in branding, branding in Asia, especially in China and India, brands in a digital world and the future for brands. Written by 19 experts in the field, Brands and Branding sets out to provide a better understanding of the role and importance of brands, as well as a wealth of insights into how one builds and sustains a successful brand.

**Internal Combustion Engines** Institution of Mechanical Engineers, 2014-10-10 This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and
