Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US,on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Suburbanizing the Masses Colin Divall,Winstan Bond,2017-09-29 This title was first published in 2003. Suburbanizing the Masses examines how collective forms of transport have contributed to the spatial and social evolution of towns and cities in various countries since the mid nineteenth century. Divided into two sections, the volume develops first the classic tradition on transport and the city, public transport's 'impact' on urban development. The contextualisation of transport is one important factor in the historical debates surrounding urban development. As well as analysing the discourse employed by urban political and business elites in favour of public transport, these contributions show the degree to which practice often fell short of ideals. The second section tackles the professional paradigms of urban transport: the circulation of traffic in cities and the technological modes appropriate to its realization. In particular these contributions explore the paradigms held by professional planners and managers, and the political classes associated with them. From a variety of perspectives Suburbanizing the Masses demonstrates the continuing relevance of socio-historical inquiry on the relationship between public transport and urban development. By differentiating between the many roles of urban transport in the nineteenth century, it confirms that public transport was not directly linked to urban growth, and instead often had only a limited effect on the wider urban structure. Suburbanizing the Masses forces a reassessment of the received historiography that maintains cheap public transport was essential to the spectacular growth of cites in the nineteenth century.

Tramway Renaissance in Western Europe Dejan Petkov,2019-12-13 Dejan Petkov explores the tramway renaissance in Western Europe from a socio-technical standpoint and focuses on the development in Germany, France, and England. A multiple case analysis reveals the drivers, impact forces, actors and interest constellations behind the tramway renaissance in these countries and demonstrates the large variations in local systems and their style. A key finding is that there can be quite different paths to the success of tramway systems, but this success usually comes at a cost and can have a comprehensive character only if the systems are considered an integral part of the overarching strategies and concepts for urban and regional development.

Computers in Railways XIV C. A. Brebbia,N. Tomii,P. Tzieropoulos,J. M. Mera,2014-06-24 This book contains the 14th proceedings of the, very successful, International conference on Railway Engineering Design and Optimization (COMPRAIL 2014), which began in 1987. Encouraging the update and use of advanced systems, the book promotes their general awareness throughout the business management, design, manufacture and operation of railways and other emerging passenger, freight and transit systems. It particularly emphasises the use of computer systems in advanced railway engineering. Topics covered include: Timetable planning; Computer techniques and simulations; Actual train control; Operations quality; Risk management; Planning; Monitoring and maintenance; Energy supply and consumption; Communications and signalling; Rescheduling; Safety and security; Railway vehicle dynamics; Driverless and automatic train operation.

The Socialist Car Lewis H. Siegelbaum,2013-04-18 Across the Soviet Bloc, from the 1960s until the collapse of communism, the automobile exemplified the tension between the ideological imperatives of political authorities and the aspirations of ordinary citizens. For the latter, the automobile was the ticket to personal freedom and a piece of the imagined consumer paradise of the West. For the authorities, the personal car was a private, mobile

space that challenged the most basic assumptions of the collectivity. The socialist car-and the car culture that built up around it-was the result of an always unstable compromise between official ideology, available resources, and the desires of an increasingly restless citizenry. In *The Socialist Car*, eleven scholars from Europe and North America explore in vivid detail the interface between the motorcar and the state socialist countries of Eastern Europe, including the USSR. In addition to the metal, glass, upholstery, and plastic from which the Ladas, Dacias, Trabants, and other still extant but aging models were fabricated, the socialist car embodied East Europeans' longings and compromises, hopes and disappointments. The socialist car represented both aspirations of overcoming the technological gap between the capitalist first and socialist second worlds and dreams of enhancing personal mobility and status. Certain features of automobility-shortages and privileges, waiting lists and lack of readily available credit, the inadequacy of streets and highways-prevailed across the Soviet Bloc. In this collective history, the authors put aside both ridicule and nostalgia in the interest of trying to understand the socialist car in its own context.
