Battletech Technical Readout: 3055 Upgrade Herbert A Beas, II,Randall N Bills,Loren Coleman,Warner Doles,Chris Hartford,David L McCullough,2012-01-18

Battletech Technical Readout 3085 Catalyst Game Labs,2010-10-13 In December 3076, Devlin Stone marshaled the nations of the Inner Sphere and began Operation SCOUR. The two-year final push to Terra was the bloodiest fighting seen in centuries. In the end, Terra had been freed with the Word of Blake scattered to the darkest corners of the universe. Stepping into that vacuum, Stone forged a new Terran Hegemony in The Republic of the Sphere. With the end of the Jihad, the survivors are rebuilding their shattered armies, introducing new machines to replace those whose factories ceased to exist in the fires of the Jihad. BattleTech Technical Readout: 3085 gives a detailed look at the machines introduced during the waning days of the Jihad and into the founding days of Devlin Stones Republic of the Sphere. This book includes the latest Mechs, battle armor, aerospace and vehicles as well as new late-Jihad support vehicles. In addition, this sourcebook heralds the long-awaited update of Technical Readout: Project Phoenix, featuring brand-new art and additional variants. Conventional infantry make their Technical Readout debut with fifty-six individual infantry formations from classic foot infantry to xeno-planetary soldiers. And finally, after more than twenty years of silence, Land-Air BattleMechs explode back into a Technical Readout with a look at the original four LAMs and their Star League history.

Affective Health and Masculinities in South Africa Hans Reihling,2020-04-03 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate

and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

La+ Design Upenn Design,2019-04-15 From the stone blade and the fire stick to the latest algorithms of genetic code, we shape our world through the act of design. With its roots in the Renaissance notion disegno, design is the ability not only to make something, but also to conceive of its invention and reflect on its meaning. Whether we valorize it as the democratization of design or critique it as the perversion of the commodity fetish, designed things are now ubiquitous. Not only things but entire systems must now be designed and objects reconceived and redesigned as mere moments in unfathomably complex ecological flows. The planet itself, and even space beyond, is now presented as a design problem. What does landscape architecture bring to the broader culture of design? What lessons can be learned from other disciplines at the cutting edge of design? What role does design play in a time of transformative technological change? In LA+ DESIGN we move beyond the designed outcome to explore the myths, methods, meanings, and futures of design. In this issue: - Engineer and physicist Adrian Bejan outlines his constructal theory, which predicts natural design and its evolution in engineering, scientific, and social systems. - Design researchers Craig Bremner + Paul Rodgers take us through an A-Z of design ecology. - Architects Lizzie Yarina + Claudia Bode open our eyes to new ways of seeing things through subject-object relations. - Jenni Zell explores life as a woman landscape architect through a Kafkaesque lens. - Daniel Pittman interviews MoMA's curator of architecture and design, Paola Antonelli. - Architect David Salomon explores methods of using data as both fact and fiction. - Christopher Marcinkoski interviews Anthony Dunne + Fiona Raby (Dunne + Raby) to discuss how their practice continuously redefines the role of design in society. - Thomas Oles challenges stereotypes of landscape architecture's professional identity. - Richard Weller discusses the terrarium as the ultimate design experiment. - Dane Carlson goes deep into the culture of Nepal's hinterlands to explore new modes and geographies for landscape architecture beyond the first world. - Through LA's signage, anthropologist Keith Murphy shows how different groups of people interact with and give meaning to the landscapes they inhabit. - Interviewed by Colin Curley, architect Andrés Jaque (Office for Political Innovation) discusses the role of technology and agency of architecture in society today. - Game designer Colleen Macklin shows how public space can be redefined and subverted through the agency of play. - Javier Arpa interviews urban design guru Winy Maas (MVRDV, The Why Factory) to discuss his views on the

future of design and design education. - Experimental psychologist Thomas Jacobsen describes current neurological research into the subjectivity of beauty.
