Warrior Michael A. Stackpole,1998 Stripped of his rank, exiled Justin Allard is given one last chance to save his honor--by risking his life in the gladiatorial arenas of Solaris VII. But his newest Game World opponent--more skilled at 'Mech-to-Mech' combat than any other rival--raises the stakes even higher. It's Justin's own half brother, Daniel, lance commander in the dreaded Kell Hounds mercenary battalion. But Daniel has more serious worries than dealing with his estranged and bitter brother. Princess Melissa Steiner, heir apparent of the Lyran Commonwealth, has been hijacked--and the future of the Inner Sphere depends on her fate. Both Daniel and Justin face fierce battles, but in the Inner Sphere, where nobles have schemed for centuries to win the ultimate power, those who interfere with the Successor Lords are sometimes called heroes, and sometimes called victims.

Affective Health and Masculinities in South Africa Hans Reihling,2020-04-03 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.
