Yasser Ismail

The Story-book of Science Jean-Henri Fabre,1917 A book about metals, plants, animals, and planets.

Corpus linguistics Stefanowitsch, Anatol,1996 Corpora are used widely in linguistics, but not always wisely. This book attempts to frame corpus linguistics systematically as a variant of the observational method. The first part introduces the reader to the general methodological discussions surrounding corpus data as well as the practice of doing corpus linguistics, including issues such as the scientific research cycle, research design, extraction of corpus data and statistical evaluation. The second part consists of a number of case studies from the main areas of corpus linguistics (lexical associations, morphology, grammar, text and metaphor), surveying the range of issues studied in corpus linguistics while at the same time showing how they fit into the methodology outlined in the first part.

Internet of Things (IoT) for Automated and Smart Applications Yasser Ismail,2019-11-27 Internet of Things (IoT) is a recent technology paradigm that creates a global network of machines and devices that are capable of communicating with each other. Security cameras, sensors, vehicles, buildings, and software are examples of devices that can exchange data between each other. IoT is recognized as one of the most important areas of future technologies and is gaining vast recognition in a wide range of applications and fields related to smart homes and cities, military, education, hospitals, homeland security systems, transportation and autonomous connected cars, agriculture, intelligent shopping systems, and other modern technologies. This book explores the most important IoT automated and smart applications to help the reader understand the principle of using IoT in such applications.

Innovations in Food Technology Pragma Mishra, Raghvendra Raman Mishra, Charles Oluwaseun Adetunji, 2020-10-12 This book gathers a collection of essays that describe recent innovations in food technology including food processing, packaging, food safety, and novel ingredients. By 2050, the world will face the challenge of having to feed an estimated 9 billion people. In order to meet that challenge, innovations in food research are of the utmost importance. The book is divided into four sections, each of which explores an important aspect like food processing, food microbiology, and nutritional security. Written by respected scholars in the field, the respective chapters discuss a range of new and enhanced food materials, as well as processing innovations to extend shelf life and reduce toxic effects. The book also addresses the health potential of various nutraceuticals, bio-absorption of metals and their positive impacts on living systems, as well as methods for reducing food wastage, preventing the loss of nutritive value, and preserving or enhancing palatability. Given its scope, the book will be highly interesting for food scientists, both in academia and the food industry. It will also benefit advanced graduate students and senior researchers.

Fabricating Modern Societies: Education, Bodies, and Minds in the Age of Steel, 2019-09-02 Fabricating Modern Societies: Education, Bodies, and Minds in the Age of Steel, edited by Karin Priem and Frederik Herman, offers new interdisciplinary and transnational perspectives on the history of industrialization and societal transformation in early twentieth-century Luxembourg. The individual chapters focus on how industrialists addressed a large array of challenges related to industrialization, borrowing and mixing ideas originating in domains such as corporate identity formation, mediatization, scientification, technological innovation, mechanization, capitalism, mass production, medicalization, educationalization, artistic production, and social utopia, while competing with other interest groups who pursued their own goals. The book looks at different focus areas of modernity, and analyzes how humans created, mediated, and interacted with the technospheres of modern societies. Contributors: Klaus Dittrich, Irma Hadzalic, Frederik Herman, Enric Novella, Ira Plein, Françoise Poos, Karin Priem, and Angelo Van Gorp.

The Old Yellow House Joyce Wright, 2018-11-11 Tyro, Mississippi. Once a thriving community, but like most rural towns go, it dwindled to just close neighbors and a few churches. The oldest house there had fallen into ruin. The man who farmed upon the land had passed. The heirs came together to sell the property. A young family saw an opportunity to homestead in this quiet, loving area. Everyone was so welcoming. But since the house was in shambles, it took close to a year, just to get it livable. After moving into the house, they decided to cheer it up by painting it yellow and trimming it in white. Upon a hill it sat fairly close to the main road leading through Tyro. Little did the young couple know that they were not the only ones to occupy the

house. Unseen and seen forces began to plague them and their visitors. This truer than life story discloses events that at times stretches the imagination from believing to speculation.

Analyzing meaning Paul R. Kroeger, This book provides an introduction to the study of meaning in human language, from a linguistic perspective. It covers a fairly broad range of topics, including lexical semantics, compositional semantics, and pragmatics. The chapters are organized into six units: (1) Foundational concepts; (2) Word meanings; (3) Implicature (including indirect speech acts); (4) Compositional semantics; (5) Modals, conditionals, and causation; (6) Tense & aspect. Most of the chapters include exercises which can be used for class discussion and/or homework assignments, and each chapter contains references for additional reading on the topics

covered. As the title indicates, this book is truly an INTRODUCTION: it provides a solid foundation which will prepare students to take more advanced and specialized courses in semantics and/or pragmatics. It is also intended as a reference for fieldworkers doing primary research on under-documented languages, to help them write grammatical descriptions that deal carefully and clearly with semantic issues. The approach adopted here is largely descriptive and non-formal (or, in some places, semi-formal), although some basic logical notation is introduced. The book is written at level which should be appropriate for advanced undergraduate or beginning graduate students. It presupposes some previous coursework in linguistics, but does not presuppose any background in formal logic or set theory.

Waiting for Nothing Tom Kromer, 2019-11-22 *Waiting for Nothing*, first published in 1935, is a sobering, first-hand account of the author's life as a homeless man during the Great Depression of the 1930s. The book, a classic portrayal of the brutality and inhumanity of the time, was written while author Tom Kromer (1906-1969) was working at a Civilian Conservation Corps camp in California, and was his only completed novel. *Waiting for Nothing* describes Kromer's travels on the rails, his encounters with small-time cooks, prostitutes and homosexuals, and the endless search for enough food to eat and a warm place to sleep. Throughout the book, Kromer describes the plight of a vast army of unemployed workers, left to fend for themselves in a largely uncaring society.

Pronominal Gender in English Peter Siemund, 2013-10-31 This book investigates the use of English third person pronouns (he, she, it) across different varieties of English, where we frequently find he and she used for inanimate objects (the tree – he, the house – he, the bucket – he, but the water – it). It is the first book-length study of this subject. Varieties of English are discussed in the context of Germanic and Romance languages and dialects as well as a small sample of additional languages. The analysis is conducted within the framework set out by functional typology. The book's straightforward and illuminating generalization in terms of the well known hierarchy of individuation provides a systematic link between pronominal usage in Standard English and its varieties.

From Corpus to Classroom Anne O'Keefe, Michael McCarthy, Ronald Carter, 2007-05-03 This book summarises and makes accessible recent work in corpus research, focusing on spoken data and on the place of lexis in grammar and discourse.

Recent Advancement in White Biotechnology Through Fungi Ajar Nath

Yadav,Sangram Singh,Shashank Mishra,Arti Gupta,2019-10-01 Over the last decade considerable progress has been made in white biotechnology research and further major scientific and technological breakthroughs are expected in the future. The first large-scale industrial applications of modern biotechnology have been in the areas of food and animal feed production (agricultural/green biotechnology) and in pharmaceuticals (medical/red biotechnology). In contrast, the productions of bioactive compounds through fermentation or enzymatic conversion are known as industrial or white biotechnology. The fungi are ubiquitous in nature and have been sorted out from different habitats, including extreme environments (high temperature, low temperature, salinity and pH); and associated with plants (Epiphytic, Endophytic and Rhizospheric). The fungal strains are beneficial as well as harmful for human beings. The beneficial fungal strains may play important roles in the agricultural, industrial, and medical sectors. The fungal strains and its product (enzymes, bioactive compounds, and secondary metabolites) are very useful for industry (e.g., the discovery of penicillin from *Penicillium chrysogenum*). This discovery was a milestone in the development of white biotechnology as the industrial production of penicillin and antibiotics using fungi moved industrial biotechnology into the modern era, transforming it into a global industrial technology. Since then, white biotechnology has steadily developed and now plays a key role in several industrial sectors providing both high value nutraceutical and pharmaceutical products. The fungal strains and bioactive compounds also play an important role in environmental cleaning. This volume covers the latest research developments related to value-added products in white biotechnology through fungi.

Goering Cross Examined Jacqueline George,2014-07-13 When Field Marshall

Hermann Goering, Deputy Führer and commander of the Luftwaffe, appeared before the Nuremberg Tribunal in 1946 to answer for his crimes, the world was watching. Much of Europe had directly suffered through the war that he and the Nazi system had brought to the continent, and now he would have to answer for his crimes. On the other hand, Germany was full of Nazis who had been defeated but did not feel any part of the guilt for those terrible events. Would Goering be able to stand up for them, and give them hope for the future? Goering proved to be intelligent and resourceful, a natural leader who dominated the other defendants at the trial and showed no self-doubt at all. The evidence he gave on his own behalf made the unthinkable seem reasonable, the normal reaction of a government and country under threat from outside forces. He denied all knowledge of war crimes, and the crimes against humanity that were now being uncovered. Only cross-examination by American and British prosecutors could force him to admit his complicity, but Goering was far too clever to be pinned down easily. Here, in the actual words spoken by the three adversaries, is the story of the American prosecutor Supreme Court Justice Robert Jackson and his British colleague Sir David Maxwell-Fyfe fighting to bring the true story of Goering's crimes into the light. Using complete court transcripts, with commentaries on each session, this book allows the reader to follow the battle day by day. All three men, and especially Goering, jump from the pages in the words they used seventy years

ago. This is Goering from a different angle, seen not through his deeds but as you might see him at a town hall meeting. He is talkative and charismatic, even when on trial for his life and with the ruins of the Third Reich around him. His trial is followed through to the end, and the book has an Epilogue from his fellow defendant Albert Speer. This very readable book brings together the many strands of the Goering war crimes trial in a way that allows the interested but legally challenged reader to appreciate the hubris and depravity of the Reich's Deputy Führer. The reader is left with the impression that Goering, throughout his trial, believed in the righteousness of the Nazi Cause and was surprised and disappointed in the final outcome. Goering's testimony to the Tribunal is both chilling and a fitting final testimony to the Nazi era. ~ Charles Gillman-Wells
