The Paper Home Labeena Ishaque,2008 Paper is readily available, versatile and inexpensive. It is also, as Labeena Ishaque brilliantly demonstrates here, an easy-to-work with material that can be used to create stylish, yet practical, objects for the home. Drawing on ancient Asian skills and influences, The Paper Home shows how perfectly paper can function within a modern interior environment. Using a variety of materials ranging from tissue paper to corrugated cardboard, Labeena Ishaque offers a fresh approach to the traditional crafts of paper folding, cutting, layering, and weaving. Her designs demonstrate the enormous versatility of paper and include a simple papier mâché vessel, organic in shape and fluid in texture, a simple woven bowl made from newspaper, an elegant origami mobile of paper cranes, as well as a wall hanging fashioned from decorative cards and a clock made from corrugated cardboard. Beginning with a brief history of paper, the varied ways in which it has been used in interiors and the different techniques involved, the book goes on to provide directions for 20 beautiful objects for the home - some quick and easy, others requiring more time and skill - each of which is accompanied by easy-to-follow, step-by-step instructions and beautiful photographs. Labeena Ishaque grew up in Manchester. She was both the style editor and a founding member of Asian Woman magazine. Since leaving the publication in 2001, she has worked as an interiors stylist & writer. It was whilst living in Tokyo that she picked up her interest in the art of paper and origami. Labeena has written two other paper related titles.

Mahogany in Scale ,2007 The classic mahogany runabout is a universally popular modeling subject, but many newcomers to the modeling hobby are apprehensive about completing a build. Will they be able to fit the planks perfectly? And how about the glass-smooth clear finish, which tolerates no mistakes in woodwork or polishing? It's really not so hard, just follow the steps outlined here! Model boat buff Patrick Matthews covers the entire process, from choosing a project from one of the many available kits, through building and finishing a mahogany marvel-- even the basics of Radio Control are covered. Additional suggestions are included for simple but effective customizations, as well as a gallery of models from some real masters of the craft-- temptation and encouragement

for the modeler to stretch further yet. Patrick Matthews shares his enthusiasm for model boats through contributions to Ships in Scale magazine, where he covers Radio Control scale model boats. In his spare time, Patrick is an automotive engineer in Detroit.

Papertoy Monsters Brian Castleforte, 2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

Design Energy Simulation for Architects Kjell Anderson,2014-01-23 Leading architectural firms are now using in-house design simulation to help make more sustainable design decisions. Taking advantage of these new tools requires understanding of what can be done with simulation, how to do it, and how to interpret the results. This software-agnostic book, which is intended for you to use as a professional architect, shows you how to reduce the energy use of all buildings using simulation for shading, daylighting, airflow, and energy modeling. Written by a practicing architect who specializes in design simulation, the book includes 30 case studies of net-zero buildings, as well as of projects with less lofty goals, to demonstrate how energy simulation has helped designers make early decisions. Within each case study, author Kjell Anderson mentions the software used, how the simulation was set up, and how the project team used the simulation to make design decisions. Chapters and case studies are written so that you learn general concepts without being tied to particular software. Each chapter builds on the theory from previous chapters, includes a summary of concept-level hand calculations (if applicable), and gives comprehensive explanations with graphic examples. Additional topics include simulation basics, comfort, climate analysis, a discussion on how simulation is integrated into some firms, and an overview of some popular design simulation software.

Soaps, Detergents and Disinfectants Technology Handbook (3rd Revised Edition) Ajay Kumar Gupta,2021-01-01 Soaps are cleaning agents that are usually made by reacting alkali (e.g., sodium hydroxide) with naturally occurring fat or fatty acids. A soap is a salt of a compound known as a fatty acid. A soap molecule consists of a long hydrocarbon chain (composed of carbons and hydrogens) with a carboxylic acid group on one end which is ionic bonded to a metalion, usually a sodium or potassium. The hydrocarbon end is nonpolar and is soluble in nonpolar substances (such as fats and oils), and the ionic end (the salt of a carboxylic acid) is soluble in water. Soap is made by combining tallow (or other hard animal fat) or vegetable or fish oil with an alkaline solution. The two most important alkalis in use are caustic soda and caustic potash. A detergent is an effective cleaning product because it contains one or more surfactants. Because of their chemical makeup, the surfactants used in detergents can be engineered to perform well under a variety of conditions. Such surfactants are less sensitive than soap to the hardness minerals in water and most will not form a film. Disinfectants are chemical agents applied to non-living objects in order to destroy bacteria, viruses, fungi, mold or mildews living on the objects. Disinfectants are chemical substances used to destroy viruses and microbes (germs), such as bacteria and fungi, as opposed to an antiseptic which can prevent the growth and reproduction of various microorganisms, but does not destroy them. The ideal disinfectant would offer complete sterilization, without harming other forms of life, be inexpensive, and non-corrosive. The global soap and detergent market is expected to reach USD 207.56 billion by 2025. The industrial soaps & detergents are extensively used by the commercial laundries, hotels, restaurants, and healthcare providers. Increasing demand from healthcare and food industries will continue to drive the market. Aerosol and liquid products are the common disinfectants used in hospitals, although growing number of healthcare facilities are implementing ultraviolet disinfection systems as further measure. Increasing demand for disinfectants from water treatment and healthcare industries is fuelling growth of the global disinfectants market. The major contents of the book are Liquid Soaps and Hand Wash, Liquid Soap and Detergents, Washing Soap: Laundry Soap Formulation, Antiseptic and Germicidal Liquid Soap, Manufacturing Process And Formulations Of Various Soaps, Handmade Soap, Detergent Soap, Liquid

Detergent, Detergent Powder, Application and Formulae Of Detergents, Detergent Bar, Detergents Of Various Types, Formulating Liquid Detergents, Phenyl, Floor Cleaner, Toilet Cleaner, Mosquito Coils, Naphthalene Balls, Air Freshener (Odonil Type), Liquid Hand Wash and Soaps, Hand Sanitizer, Aerosols-Water and Oil Based Insecticide (Flies, Mosquitoes Insect and Cockroach Killer Spray), Ecomark Criteria for Soaps & Detergents, Plant Layout, Process Flow Chart and Diagram, Raw Material Suppliers List and Photographs of Machinery with Supplier's Contact Details. This book will be a mile stone for its readers who are new to this sector, will also find useful for professionals, entrepreneurs, those studying and researching in this important area.
