Make Time Jake Knapp, John Zeratsky, 2018-09-25 From the New York Times bestselling authors of *Sprint* comes “a unique and engaging read about a proven habit framework [that] readers can apply to each day” (Insider, Best Books to Form New Habits). “If you want to achieve more (without going nuts), read this book.”—Charles Duhigg, author of *The Power of Habit* Nobody ever looked at an empty calendar and said, The best way to spend this time is by cramming it full of meetings! or got to work in the morning and thought, Today I'll spend hours on Facebook! Yet that's exactly what we do. Why? In a world where information refreshes endlessly and the workday feels like a race to react to other people's priorities faster, frazzled and distracted has become our default position. But what if the exhaustion of constant busyness wasn't mandatory? What if you could step off the hamster wheel and start taking control of your time and attention? That's what this book is about. As creators of Google Ventures'

renowned design sprint, Jake and John have helped hundreds of teams solve important problems by changing how they work. Building on the success of these sprints and their experience designing ubiquitous tech products from Gmail to YouTube, they spent years experimenting with their own habits and routines, looking for ways to help people optimize their energy, focus, and time. Now they've packaged the most effective tactics into a four-step daily framework that anyone can use to systematically design their days. Make Time is not a one-size-fits-all formula. Instead, it offers a customizable menu of bite-size tips and strategies that can be tailored to individual habits and lifestyles. Make Time isn't about productivity, or checking off more to-dos. Nor does it propose unrealistic solutions like throwing out your smartphone or swearing off social media. Making time isn't about radically overhauling your lifestyle; it's about making small shifts in your environment to liberate yourself from constant busyness and distraction. A must-read for anyone who has ever thought, If only there were more hours in the day..., Make Time will help you stop passively reacting to the demands of the modern world and start intentionally making time for the things that matter.

Papertoy Monsters Brian Castleforte,2010-12-29 A breakthrough paper-folding book for kids—paper airplanes meet Origami meets Pokemon. Papertoys, the Internet phenomenon that's hot among graphic designers and illustrators around the world, now comes to kids in the coolest new book. Created and curated by Brian Castleforte, a graphic designer and papertoy

pioneer who rounded up 25 of the hottest papertoy designers from around the world (Indonesia, Japan, Australia, Italy, Croatia, Chile, even Jackson, Tennessee), Papertoy Monsters offers 50 fiendishly original die-cut designs that are ready to pop out, fold, and glue. The book interleaves card stock with paper stock for a unique craft package; the graphics are colorful and hip, combining the edginess of anime with the goofy fun of Uglydolls and other collectibles. Plus each character comes with its own back-story. And the results are delicious: meet Pharaoh Thoth Amon, who once ruled Egypt but is now a mummy who practices dark magic in his sarcophagus. Or Zumbie the Zombie, who loves nothing more than a nice plate of brains and yams. NotSoScary, a little monster so useless at frightening people that he has to wear a scary mask. Yucky Chuck, the lunchbox creature born in the deepest depths of your school bag. Plus Zeke, the monster under your bed, Nom Nom, eater of cities, and Grumpy Gramps, the hairy grandpa monster with his very own moustache collection.

The Thriving Adolescent Louise L. Hayes, Joseph V.

Ciarrochi, 2015-11-01 Adolescents face unique pressures and worries. Will they pass high school? Should they go to college? Will they find love? And what ways do they want to act in the world? The uncertainty surrounding the future can be overwhelming. Sadly, and all too often, if things don't go smoothly, adolescents will begin labeling themselves as losers, unpopular, unattractive, weird, or dumb. And, let's not forget the ubiquitous 'not good enough' story that often begins during these formative years. These labels are often carried forward throughout life. So what can you do, now, to help lighten this lifelong burden? The

Thriving Adolescent offers teachers, counselors, and mental health professionals powerful techniques for working with adolescents. Based in proven- effective acceptance and commitment therapy (ACT), the skills and tips outlined in this book will help adolescents and teens manage difficult emotions, connect with their values, achieve mindfulness and vitality, and develop positive relationships with friends and family. The evidence-based practices in this book focus on developing a strong sense of self, and will give adolescents the confidence they need to make that difficult transition into adulthood. Whether it's school, family, or friend related, adolescents experience a profound level of stress, and often they lack the psychological tools to deal with stress in productive ways. The skills we impart to them now will help set the stage for a happy, healthy adulthood. If you work with adolescents or teens, this is a must-have addition to your professional library.

The Yellow Wallpaper Illustrated Charlotte Perkins

Gilman,2021-05-29 The Yellow Wallpaper is a short story by American writer Charlotte Perkins Gilman, first published in January 1892 in The New England Magazine.

Robotics, AI, and Humanity Joachim von Braun,Margaret S. Archer,Gregory M. Reichberg,Marcelo Sánchez

Sorondo,2021-02-12 This open access book examines recent advances in how artificial intelligence (AI) and robotics have elicited widespread debate over their benefits and drawbacks for humanity. The emergent technologies have for instance implications within medicine and health care, employment, transport, manufacturing, agriculture, and armed conflict. While there has been considerable attention devoted to robotics/AI applications in each of these domains, a fuller picture of their connections and the possible consequences for our shared humanity seems needed. This volume covers multidisciplinary research, examines current research frontiers in AI/robotics and likely impacts on societal well-being, human – robot relationships, as well as the opportunities and risks for sustainable development and peace. The attendant ethical and religious dimensions of these technologies are addressed and implications for regulatory policies on the use and future development of AI/robotics technologies are elaborated.
