The Box Marc Levinson,2016-04-05 In April 1956, a refitted oil tanker carried fifty-eight shipping containers from Newark to Houston. From that modest beginning, container shipping developed into a huge industry that reshaped manufacturing. But the container didn't just happen. Its adoption required huge sums of money, years of high-stakes bargaining, and delicate negotiation on standards. Now with a new chapter, *The Box* tells the dramatic story of how the drive and imagination of an iconoclastic entrepreneur turned containerization from an impractical idea into a phenomenon that transformed economic geography, slashed transportation costs, and made the boom in global trade possible. -- from back cover.

Mindshift Barbara Oakley, PhD,2017-04-18 Mindshift reveals how we can overcome stereotypes and preconceived ideas about what is possible for us to learn and become. At a time when we are constantly being asked to retrain and reinvent ourselves to adapt to new technologies and changing industries, this book shows us how we can uncover and develop talents we didn't realize we had—no matter what our age or background. We're often told to "follow our passions." But in Mindshift, Dr. Barbara Oakley shows us how we can broaden our passions. Drawing on the latest neuroscientific insights, Dr. Oakley shepherds us past simplistic ideas of "aptitude" and "ability," which provide only a snapshot of who we are now—with little consideration about how we can change. Even seemingly "bad" traits, such as a poor memory, come with hidden advantages—like increased creativity. Profiling people from around the world who have overcome learning limitations of all kinds, Dr. Oakley shows us how we can turn perceived weaknesses, such as impostor syndrome and advancing age, into strengths. People may feel like they're at a disadvantage if they pursue a new field later in life; yet those who change careers can be fertile cross-pollinators: They bring valuable insights from one discipline to another. Dr. Oakley teaches us strategies for learning that are backed by neuroscience so that we can realize the joy and benefits of a learning lifestyle. Mindshift takes us deep inside the world of how people change and grow. Our biggest stumbling blocks can be our own preconceptions, but with the right mental insights, we can tap into hidden potential and create new opportunities.

City Design, Planning & Policy Innovations Tomas Bermudez,Diane E. Davis,Tatiana Gallego-Lizón,Sarah Benton,Andrés Blanco Blanco,David Razu,Diego Arcia,Enrique Silva,Gabriela Soto Laveaga,Douglas Barrios,Miguel Ángel Santos,Juan Santamaría,Rubén Segovia,Jorge Silva,Claudia Tomateo,Felipe Vera,Cesar Castro,Neha B. Joseph,Konstantina Tzemou,Patricia Álvarez,Theodore Kofman,Samuel Matthew,Aaron Ramirez,Andreina Seijas,Claire Summers,Kate Wolf,Diana Zwetich,Belinda Tato,Jorge Toledo,José Luis Vallejo,Adriana Chávez,Daniel Stagno,2019-07-02 This publication summarizes the outcomes and lessons learned from the Fall 2017 course titled "Emergent Urbanism: Planning and Design Visions for the City of Hermosillo, Mexico" (ADV-9146). Taught by professors Diane Davis and Felipe Vera, this course asked a group of 12 students to design a set of projects that could lay the groundwork for a sustainable future for the city of Hermosillo—an emerging city located in northwest Mexico and the capital of the state of Sonora. Part of a larger initiative funded by the Inter-American Development Bank and the North-American Development Bank in partnership with Harvard University, ideas developed for this class were the product of collaboration between faculty and students at the Graduate School of Design, the Kennedy School's Center for International Development and the T.H. Chan School of Public Health.

The Basques of New York Gloria Pilar Totoricaguena,2004 Depicting Basque mutual aid societies, language courses, musical and dance troupes, cuisine classes, community activities, sport, political involvement, and ties to homeland institutions are just a few of the ingredients which mix to compose the chapters of this work. Readers will learn about the history and reasons why Basques left the Pyrenees of northern Spain and southern France from the personal experiences of political and economic exiles' oral histories. Original archival research allows us to discover the features of the early 1900s Centro Vasco-Americano, the Basque Government-in-exile Delegation in New York, and the development of Basque organizations. Basqueness is being redefined in this transnational cosmopolitan community, and with the pioneer spirit of their ancestors, latter generation Basques are nurturing and promoting Basque culture and identity to the world.--BOOK JACKET.

The Democracy Development Machine Nicholas Copeland,2019-05-15 Nicholas Copeland sheds new light on rural politics in Guatemala and across neoliberal and post-conflict settings in *The Democracy Development Machine*. This historical ethnography examines how governmentalized spaces of democracy and development fell short, enabling and disfiguring an ethnic Mayan resurgence. In a passionate and politically engaged book, Copeland argues that the transition to democracy in Guatemalan Mayan communities has led to a troubling paradox. He finds that while liberal democracy is celebrated in most of the world as the ideal, it can subvert political desires and channel them into illiberal spaces. As a result, Copeland explores alternative ways of imagining liberal democracy and economic and social amelioration in a traumatized and highly unequal society as it strives to transition from war and authoritarian rule to open elections and free-market democracy. The Democracy Development Machine follows Guatemala's transition, reflects on Mayan involvement in politics during and after the conflict, and provides novel ways to link democratic development with economic and political development. Thanks to generous funding from Virginia Tech and its participation in TOME (Toward an Open Monograph Ecosystem), the ebook editions of this book are available as Open Access (OA) volumes from Cornell Open (cornellpress.cornell.edu/cornell-open) and other Open Access repositories.

Troia and the Troad Günther A. Wagner,Ernst Pernicka,Hans-Peter Uerpmann,2013-03-09 It is my pleasure to welcome you here on the occasion of the International Symposium, Landscape Troia between Earth History and Culture. The topic Troia has stimulated many scientists, historians and experts in the history of arts to interpret data and adjust concepts regarding the development of early Troia. In the past two decades the Heidelberg Academy of Sciences and Humanities has supported several research activities which are related to the Troia project. One of the aims of the archaeometry laboratory is to localize Aegean and Anatolian sources for the procurement of prehistoric metals such as gold, silver, lead, copper and tin. In particular in the Troad, numerous mining and smelting sites have been found and characterized, allowing one to investigate to which extent they might have been exploited by the ancient Troians. When analytically comparing ores and slags with Troian metal artifacts, early trade connections can be traced. The landscape around Troia underwent rather fast and drastic changes.

China's and India's Challenge to Latin America Daniel Lederman,Marcelo Olarreaga,Guillermo E. Perry,2008-10-31 The economic successes of China and India are viewed with admiration but also with concern because of the effects that the growth of these Asian economies may have on the Latin American and Caribbean (LAC) region. The evidence in 'China's and India's Challenge to Latin America' indicates that certain manufacturing and service industries in some countries have been negatively affected by Chinese and Indian competition in third markets and that LAC imports from China and India have been associated with modest unemployment and adjustment costs in manufacturing industries. The book also provides substantial evidence of positive aggregate effects for LAC economies associated with China's and India's greater presence in world exports, financial flows, and innovation. Chinese and Indian growth is creating new production possibilities for LAC economies, particularly in sectors that rely on natural resources and scientific knowledge.

Social Policies and Institutional Reform in Post-COVID Cuba Bert Hoffmann,2021-08-09 The economic crisis in the wake of the COVID pandemic is putting Cuba's socialism to a severe test. The government in Havana has added a fundamental reform of the economy, institutional structure and social policies to the agenda. This volume brings together contributions from leading international experts as well as from the island

itself, analysing the economic, political and social challenges Cuba is facing today.

General Theory of the Precariat Alex Foti,2017-10-12 From the fast-food industry to the sharing economy, precarious work has become the norm in contemporary capitalism, like the anti-globalization movement predicted it would. This book describes how the precariat came into being under neoliberalism and how it has radicalized in response to crisis and austerity. It investigates the political economy of precarity and the historical sociology of the precariat, and discusses movements of precarious youth against oligopoly and oligarchy in Europe, America, and East Asia.

The Palgrave Handbook of Wine Industry Economics Adeline Alonso Ugaglia,Jean-Marie Cardebat,Alessandro Corsi,2019-03-15 This Palgrave Handbook offers the first international comparative study into the efficiency of the industrial organization of the global wine industry. Looking at several important vineyards of the main wine countries, the contributors analyze differences in implementation and articulation of three key stages: grape production, wine making and distribution (marketing, selling and logistics). By examining regulations, organization theory, industry organizational efficiency and vertical integration, up to date strategies in the sector are presented and appraised. Which models are most efficient? What are the most relevant factors for optimal performance? How do reputation and governance impact the industry? Should different models co-exist within the wine countries for global success? This comprehensive volume is essential reading for students, researchers and professionals in the wine industry.

Renaissance Vision from Spectacles to Telescopes Vincent Ilardi,2007 Deals with the history of eyeglasses from their invention in Italy ca. 1286 to the appearance of the telescope three cent. later. By the end of the 16th cent. eyeglasses were as common in western and central Europe as desktop computers are in western developed countries today. Eyeglasses served an important technological function at both the intellectual and practical level, not only easing the textual studies of scholars but also easing the work of craftsmen/small bus. During the 15th cent. two crucial developments occurred: the ability to grind convex lenses for various levels of presbyopia and the ability to grind concave lenses for the correction of myopia. As a result, eyeglasses could be made almost to prescription by the early 17th cent. Illus.

Early film theories in Italy, 1896-1922 Silvio Alovio,Francesco Casetti,Luca Mazzei,2017-07-07 How did Italian writers, scholars, clergymen, psychologists, members of parliament, and philosophers react to the advent of cinema? How did they establish a common language to discuss an invention that exceeded habits and expectations, and that transcended existing forms and categories of thought? This anthology gathers for the first time a large number of social discourses that in Italy tried to define and contextualize cinema from the 1890s to 1920s. What results is an impressive picture of a culture in distress at a 'scandalous' event and eager to appropriate it for the sake of modernization.

Reyita María de los Reyes Castillo Bueno,Daisy Rubiera Castillo,2000 Assisted by her daughter, Daisy Rubiera Castillo, the author recounts her life as a black woman struggling with prejudice and change in Cuba over the span of 90 years. Known as Reyita, Maria de Los Reyes Castillo Bueno starts her story with the abduction of her grandmother by slave traders and shares her own experiences as a mother, laborer, and revolutionary.

Museum Activism Robert R. Janes,Richard Sandell,2019-01-10 Only a decade ago, the notion that museums, galleries and heritage organisations might engage in activist practice, with explicit intent to act upon inequalities, injustices and environmental crises, was met with scepticism and often derision. Seeking to purposefully bring about social change was viewed by many within and beyond the museum community as inappropriately political and antithetical to fundamental professional values. Today, although the idea remains controversial, the way we think about the roles and responsibilities of museums as knowledge based, social institutions is changing. Museum Activism examines the increasing significance of this activist trend in thinking and practice. At this crucial time in the evolution of museum thinking and practice, this ground-breaking volume brings together more than fifty contributors working across six continents to explore, analyse and critically reflect upon the museum's relationship to activism. Including contributions from practitioners, artists, activists and researchers, this wide-ranging examination of new and divergent expressions of the inherent power of museums as forces for good, and as activists in civil society, aims to encourage further experimentation and enrich the debate in this nascent and uncertain field of museum practice. Museum Activism elucidates the largely untapped potential for museums as key intellectual and civic resources to address inequalities, injustice and environmental challenges. This makes the book essential reading for scholars and students of museum and heritage studies, gallery studies, arts and heritage management, and politics. It will be a source of inspiration to museum practitioners and museum leaders around the globe.

Power Kills R. J. Rummel,2017-07-12 This volume, newly published in paperback, is part of a comprehensive effort by R. J. Rummel to understand and place in historical perspective the entire subject of genocide and mass murder, or what he calls democide. It is the fifth in a series of volumes in which he offers a detailed analysis of the 120,000,000 people killed as a result of government action or direct intervention. In Power Kills, Rummel offers a realistic and practical solution to war, democide, and other collective violence. As he states it, The solution...is to foster democratic freedom and to democratize coercive power and force. That is, mass killing and mass murder carried out by government is a result of indiscriminate, irresponsible Power at the center. Rummel observes that well-established democracies do not make war on and rarely commit lesser violence against each other. The more democratic two nations are, the less likely is war or smaller-scale violence between them. The more democratic a nation is, the less severe its overall foreign violence, the less likely it will have domestic collective violence, and the less its democide. Rummel argues that the evidence supports overwhelmingly the most important fact of our time: democracy is a method of nonviolence.
