Adipose-Derived Stem Cells Jeffrey M. Gimble,Bruce A. Bunnell,2011-08-24 During the past decade, a wide range of scientific disciplines have adopted the use of adipose-derived stem/stromal cells (ASCs) as an important tool for research and discovery. In *Adipose-Derived Stem Cells: Methods and Protocols*, experts from the field, including members of the esteemed International Federation of Adipose Therapeutics and Science (IFATS), provide defined and established protocols in order to further codify the utilization of these powerful and accessible cells. With chapters organized around approaches spanning the discovery, pre-clinical, and clinical processes, much of the emphasis is placed on human ASC, while additional techniques involving small and large animal species are included. As a volume in the highly successful *Methods in Molecular Biology*™ series, the detailed contributions include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and notes on troubleshooting and avoiding known pitfalls. Comprehensive and cutting-edge, *Adipose-Derived Stem Cells: Methods and Protocols* serves as a vital reference text for experienced researchers as well as new students on the path to further exploring the incredible potential of ASCs.

Religion and the COVID-19 Pandemic in Southern Africa Fortune Sibanda,Tenson Muyambo,Ezra Chitando,2022-02-24 This book investigates the role of religion in the context of the COVID-19 pandemic in Southern Africa. Remember Love Mary Balogh,2022-07-12 "One of the best." – Julia Quinn The beloved queen of Regency romance is back with a brand-new story perfect for fans of *Bridgerton*. The handsome and charismatic Earl of Stratton, Caleb Ware, has been exposed to the

ton for his clandestine affairs—by his own son. As a child, Devlin Ware thought his family stood for all that was right and good in the world. They were kind, gracious, and shared the beauty of Ravenswood, their grand country estate, by hosting lavish parties for the entire countryside. But at twenty-two, he discovered his whole world was an elaborate illusion, and when Devlin publicly called his family to account for it, he was exiled as a traitor. So be it. He enlisted in the fight against Napoleon and didn't look back for six years. But now his father is dead, the Ware family is broken, and as the heir he is being called home. It's only when Gwyneth Rhys—the woman he loved and then lost after his family banished him—holds out her hand to help him that he is able make the difficult journey and try to piece together his fractured family. It is Gwyneth's loyalty, patience, and love that he needs. But is Devlin's war-hardened heart even capable of offering her love in return?

Satellite Lifelines Isabel Löfgren, 2020-11-12 Isabel Löfgren takes us to the Stockholm high-rise suburbs to show us how art projects and transnational media intermingle with the multicultural urban reality. In this book, she discusses the architecture of her project Satellitstaden, where her artistic interventions with the satellite dishes on façades highlight the voices of its inhabitants through participatory and co-generative artistic processes. In these peripheries, satellite subjects emerge, orbiting around multiple identifications, foregrounding the notion of spatial justice, the subaltern and the importance of grassroots movements. The book outlines a philosophy of hospitality in response to the turn in Europe against refugees, which Löfgren considers to be a crisis of hospitality, not a crisis of migration. Löfgren discusses the ethics that govern the relationship between guest and host, the self and Other. Who has the right to belong? On what terms? She argues for a hospitable turn in art, urban planning and media, in which guest-host relationships are performed, mediated and problematized. We urgently need to re-imagine the ethics of hospitality and habitability for the near future. The 2020 pandemic forces us to reassess our philosophy and practice of human contact, re-engineering how we relate to the Other, and what hospitality means in the face of a global halt. Isabel Löfgren is a Swedish-Brazilian artist, researcher and educator based in Stockholm and Rio de Janeiro. She is currently working at the Media and Communication Studies Department at Södertörn University in Sweden, next to her artistic practice. Her research interests include cultural politics, aesthetics, and the philosophy of diaspora in the fields of contemporary art, media philosophy, and media activism.

Recent Trends in Medicinal Plants Research, 2012-11-13 Plants and other living organisms have great potential to treat human disease. There are two distinct types of biomedical research that seek to develop this potential. One type of research explores the value of medicinal plants as traditionally used and studies of these plants have the potential to determine which plants are most potent, optimize dosages and dose forms, and identify safety risks. Another type of research uses bioassays to identify single molecules from plants that have interesting bioactivities in isolation and might be useful lead compounds for the development of pharmaceutical drugs. This new volume of *Advances in Botanical Research* covers the recent trends in Medicinal Plants Research over 11 chapters. Topics that are covered include Development of Drugs from Plants - Regulation and Evaluation, Chinese Herbal Medicines for Rheumatoid Arthritis, and Taxol, camptothecin and beyond for cancer therapy. Heritage Sites of Astronomy and Archaeoastronomy in the Context of the UNESCO World Heritage Convention Clive L. N. Ruggles, Michel Cotte, 2017-11-30 This joint venture between ICOMOS, the advisory body to UNESCO on cultural sites, and the International Astronomical Union is the second volume in an ongoing exploration of themes and issues relating to astronomical heritage in particular and to science and technology heritage in general. It examines a number of key questions relating to astronomical heritage sites and their potential recognition as World Heritage, attempting to identify what might constitute outstanding universal value in relation to astronomy. *Heritage Sites of Astronomy and Archaeoastronomy--Volume 2* represents the culmination of several years' work to address some of the most challenging issues raised in the first ICOMOS-IAU Thematic Study, published in 2010. These include the recognition and preservation of the value of dark skies at both cultural and natural sites and landscapes; balancing archaeoastronomical considerations in the context of broader archaeological and cultural values; the potential for serial nominations; and management issues such as preserving the integrity of astronomical sightlines through the landscape. Its case studies are developed in greater depth than those in volume 1, and generally structured as segments of draft nomination dossiers. They include seven-stone antas (prehistoric dolmens) in Portugal and Spain, the thirteen towers of Chankillo in Peru, the astronomical timing of irrigation in Oman, Pic du Midi de Bigorre Observatory in France, Baikonur Cosmodrome in Kazakhstan, and Aoraki-Mackenzie International Dark Sky Reserve in New Zealand. A case study on Stonehenge, already a World Heritage Site, focuses on preserving the integrity of the solstitial sightlines. As for the first ICOMOS-IAU Thematic Study, a international team of authors including historians, astronomers and heritage professionals is led by Professor Clive Ruggles for the IAU and Professor Michel Cotte for ICOMOS.
