Graphic Design Theory Helen Armstrong,2012-08-10 Graphic Design Theory is organized in three sections: Creating the Field traces the evolution of graphic design over the course of the early 1900s, including influential avant-garde ideas of futurism, constructivism, and the Bauhaus; Building on Success covers the mid- to late twentieth century and considers the International Style, modernism, and postmodernism; and Mapping the Future opens at the end of the last century and includes current discussions on legibility, social responsibility, and new media. Striking color images illustrate each of the movements discussed and demonstrate the ongoing relationship between theory and practice. A brief commentary prefaces each text, providing a cultural and historical framework through which the work can be evaluated. Authors include such influential designers as Herbert Bayer, L'szlo Moholy-Nagy, Karl Gerstner, Katherine McCoy, Michael Rock, Lev Manovich, Ellen Lupton, and Lorraine Wild. Additional features include a timeline, glossary, and bibliography for further reading. A must-have survey for graduate and undergraduate courses in design history, theory, and contemporary issues, Graphic Design Theory invites designers and interested readers of all levels to plunge into the world of design discourse.

**Imagine No Possessions** Christina Kiaer,2005 These artists, heeding the call of Constructivist manifestos to abandon the nonobjective painting and sculpture of the early Russian avant-garde and enter into Soviet industrial production, aimed to work as artist-engineers to produce useful objects for everyday life in the new socialist collective. Kiaer shows how these artists elaborated on the theory of the socialist object-as-comrade in the practice of their art. They broke with the traditional model of the autonomous avant-garde, Kiaer argues, in order to participate more fully in the political project of the Soviet state. She analyzes Constructivism's attempt to develop modernist forms to forge a new comradely relationship between human subjects and the mass-produced objects of modernity.--BOOK JACKET.

*The Adult Learner* Malcolm S. Knowles,Elwood F. Holton III,Richard A. Swanson,Petra A. Robinson,2020-12-21 How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of The Adult Learner has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of The Adult Learner will provide basic instructor aids. For each chapter, there will be a PowerPoint presentation, learning exercises, and added study questions. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.

Knowledge and Critical Pedagogy Joe L. Kincheloe,2008-06-19 In a globalized neo-colonial world an insidious and often debilitating crisis of knowledge not only continues to undermine the quality of research produced by scholars but to also perpetuate a neo-colonial and oppressive socio-cultural, political economic, and educational system. The lack of attention such issues receive in pedagogical institutions around the world undermines the value of education and its role as a force of social justice. In this context these knowledge issues become a central concern of critical pedagogy. As a mode of education that is dedicated to a rigorous form of knowledge work, teachers and students as knowledge producers, anti-oppressive educational and social practices, and diverse perspectives from multiple social locations, critical pedagogy views dominant knowledge policies as a direct assault on its goals. Knowledge and Critical Pedagogy: An Introduction takes scholars through a critical review of the issues facing researchers and educators in the last years of the first decade of the twenty-first century. Refusing to assume the reader's familiarity with such issues but concurrently rebuffing the tendency to dumb down such complex issues, the book serves as an excellent introduction to one of the most important and complicated issues of our time.

Constructivism : origins and evolution George Rickey,1995

**Constructivism in Central Europe** Esther Levinger,2022-01-31 The book tells the story of individual artists in Central Europe who believed in art's power to change the world; they imagined a collective of human beings living happily in a free society liberated of injustice and inequality.

**Representing Cultural Diplomacy** César Villanueva Rivas,2007

**Modern Swedish Design** Uno Åhrén,2008 Although Swedish design has exercised an extraordinary influence on modern architecture and interior furnishings internationally since the early twentieth century, the intellectual background from which it emerged is far less wellknown, for some of the crucial, generative writings on the subject by Swedish thinkers of the time have never been widely translated. Modern Swedish Design Theory collects three of these seminal essays for the first time in English. Accompanying these texts in the book are introductory essays and a postscript by the renowned architectural historian Kenneth Frampton.

**Craft Horizons** ,1972

**All that is Solid Melts Into Air** Marshall Berman,1983 The experience of modernization -- the dizzying social changes that swept millions of people into the capitalist world -- and modernism in art, literature and architecture are brilliantly integrated in this account.

**Gan's Constructivism** Kristin Romberg,2019-01-08 This compelling new account of Russian constructivism repositions the agitator Aleksei Gan as the movement's chief protagonist and theorist. Primarily a political organizer during the revolution and early Soviet period, Gan brought to the constructivist project an intimate acquaintance with the nuts and bolts of "making revolution." Writing slogans, organizing amateur performances, and producing mass-media objects define an alternative conception of "the work of art"—no longer an autonomous object but a labor process through which solidarities are built. In an expansive analysis touching on aesthetic and architectural theory, the history of science and design, sociology, and feminist and political theory, Kristin Romberg invites us to consider a version of modernism organized around the radical flattening of hierarchies, a broad distribution of authorship, and the negotiation of constraints and dependencies. Moving

beyond Cold War abstractions, Gan’s Constructivism offers a fine-grained understanding of what it means for an aesthetics to be political.

*Inside the White Cube* Brian O'Doherty,1999 These essays explicitly confront a particular crisis in postwar art, seeking to examine the assumptions on which the modern commercial and museum gallery was based.

*Slides for Students* Gary D. Fisk,2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that.Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

**Learning in the Museum** George E. Hein,2002-09-11 Learning in the Museum examines major issues and shows how research in visitor studies and the philosophy of education can be applied to facilitate a meaningful educational experience in museums. Hein combines a brief history of education in public museums, with a rigorous examination of how the educational theories of Dewey, Piaget, Vygotsky and subsequent theorists relate to learning in the museum. Surveying a wide range of research methods employed in visitor studies is illustrated with examples taken from museums around the world, Hein explores how visitors can best learn from exhibitions which are physically, socially, and intellectually accessible to every single visitor. He shows how museums can adapt to create this kind of environment, to provide what he calls the 'constructivist museum'. Providing essential theoretical analysis for students, this volume also serves as a practical guide for all museum professionals on how to adapt their museums to maximize the educational experience of every visitor.

**The Coding Manual for Qualitative Researchers** Johnny Saldana,2012-10-04 The Second Edition of Johnny Saldaña's international bestseller provides an in-depth guide to the multiple approaches available for coding qualitative data. **Rodchenko** Selim Omarovich Khan-Magomedov,1987 The Russian Constructivist Aleksandr Rodchenko (1891-1936) cannot be categorized by any one of his remarkable activities. His prodigious career in photography, graphic design, industrial design, painting, stage set and theater design, fashion and costume design, and architecture is at last given its full recognition in this splendidly illustrated and exhaustive study of the complete range of his work. Rodchenko's artistic production is considered against the complex background of the political, social, personal, and artistic circumstances of the period, from the beginning of his studies at the Art School of Kazan to his encounter with Mayakovsky and the Futurists, from the famous Moscow Exhibitions where Rodchenko took part in the founding phase of abstract art to the arguments with Kandinsky over cultural supremacy with the Institute of Artistic Culture (INCHUK) and the definitive embracing of Constructivism. Among the book's unusual contributions is the serious consideration given to Rodchenko's architectural projects and its generous treatment of unknown documents - newspaper reports, commentaries, debates, articles, letters - of the time. These give a lively sense of what was actually happening in Moscow art circles during the crucial formative years of the avant-garde movement. The visual material is particularly stunning. Five hundred illustrations, many in full color, are taken from Russian archives or from Rodchenko's private archive now owned by his nephew. The author, Selim Omarovich Khan-Magomedov is a Soviet architectural historian and critic who has achieved an enviable record of championing the rehabilitation of modern Soviet architecture from the 1920s. He almost single-handedly launched the bold campaign in 1962 to revive the historical legacy of Soviet modernism. Magomedov's studies of modern Soviet architecture, institutions, and personalities represent an impressive body of work in the face of formidable odds and official resistance and they are highly regarded in the West.
