**Francis Ford Coppola's The Godfather Trilogy** Nick Browne,1999-11-13 The Godfather trilogy is among the most significant works of Hollywood cinema of the last quarter century. They provide a richly complex look at a whole segment of American life and culture spanning almost the whole century. In six essays, written especially for this volume, The Godfather trilogy is re-examined from a variety of perspectives. Providing analyses on the form and significance of Coppola's achievement, they demonstrate how the filmmaker revised the conventions of the American crime film in the Viet Nam era, his treatment of the capitalism of the criminal underworld and its inherent violence, the power struggles within Hollywood over the film, and the contribution of opera to the epic force and cinematic style of Coppola's vision of an American criminal dynasty. The Godfather articulates the themes, styles, mythologies, performances, and underlying cultural values that have made the film a modern classic.

**Restoration of Tropical Forest Ecosystems** Helmut Lieth,M. Lohmann,1914 The destruction of the tropical forests continues rapidly. We all know that this has global, ecological and economic consequences. The problem is of such magnitude that it can only be compared to warfare. The destruction of tropical forests is both detrimental to the global ecology as well as posing a serious threat to the people living in these areas. Furthermore, the overutilization of such a valuable resource poses a serious threat to the next generations. Besides the problem generated for the people in these regions, and for the earth in general, there is a moral obligation to preserve the vast biological diversity in the tropical forests. We have a commitment to all species on earth as well as man and, therefore, need to preserve as many as possible, if not all. This book discusses the problem from different angles: from forestry, ecology and nature conservation. The two main problem areas are: first the wise utilization of that portion of the forest which will be used - especially the introduction of planned forestry in such areas and second the development of a good plan for nature conservation in the tropics.

**100 Great War Movies** Robert J. Niemi,2018-04-04 This book serves as a fascinating guide to 100 war films from 1930 to the present. Readers interested in war movies will learn surprising anecdotes about these films and will have all their questions about the films' historical accuracy answered. This cinematic guide to war movies spans 800 years in its analysis of films from those set in the 13th century Scottish Wars of Independence (Braveheart) to those taking place during the 21st-century war in Afghanistan (Lone Survivor). World War II has produced the largest number of war movies and continues to spawn recently released films such as Dunkirk. This book explores those, but also examines films set during such conflicts as the Napoleonic Wars, the American Civil War, World War I, the Vietnam War, and the wars in Afghanistan and Iraq. The book is organized alphabetically by film title, making it easy to navigate. Each entry is divided into five sections: Background (a brief discussion of the film's genesis and financing); Production (information about how, where, and when the film was shot); Synopsis (a detailed plot summary); Reception (how the film did in terms of box office, awards, and reviews) and Reel History vs. Real History (a brief analysis of the film's historical accuracy). This book is ideal for readers looking to get a vivid behind-the-scenes look at the greatest war movies ever made.

**Ending Social Promotion Without Leaving Children Behind** Jennifer Sloan McCombs,Sheila Nataraj Kirby,Louis T. Mariano,2009-10-15 The New York City Department of Education asked RAND to conduct an independent longitudinal evaluation of its 5th-grade promotion policy. The findings of that study, conducted between March 2006 and August 2009, provide a comprehensive view of the policy's implementation and its impact on student outcomes, particularly for students at risk of retention and those who were retained in grade.

**Sustainable Bioeconomy** V. Venkatramanan,Shachi Shah,Ram Prasad,2020-11-06 Sustainable development is the most important challenge facing humanity in the 21st century. The global economic growth in the recent past has indeed exhibited marked progress in many countries. Nevertheless, the issues of income disparity, poverty, gender gaps, and malnutrition are not uncommon in the global landscape, in spite of the upward growth of the economy and technological advances. This grim picture is further exacerbated by our growing human population, unmindful resource use, ever-increasing consumption trends, and changing climate. In order to protect humanity and preserve the planet, the United Nations issued the “2030 agenda for sustainable development,” which includes but is not limited to sustainable production and consumption practices, e.g. in a sustainable bioeconomy. The hallmark of the sustainable bioeconomy is a paradigm shift from a fossil-fuel-based economy to a biological-based one, which is driven by the virtues of sustainability, efficient utilization of resources, and “circular economy.” As the sustainable bioeconomy is based on the efficient utilization of biological resources and societal transformations, it holds the immense potential to achieve the UN’s Sustainable Development Goals. This book shares valuable insights into the linkages between the sustainable bioeconomy and Sustainable Development Goals, making it an essential read for policymakers, researchers and students of environmental studies.

**Lithium-ion Battery Materials and Engineering** Malgorzata K. Gulbinska,2014-09-06 Gaining public attention due, in part, to their potential application as energy storage devices in cars, Lithium-ion batteries have encountered widespread demand, however, the understanding of lithium-ion technology has often lagged behind production. This book defines the most commonly encountered challenges from the perspective of a high-end lithium-ion manufacturer with two decades of experience with lithium-ion batteries and over six decades of experience with batteries of other chemistries. Authors with years of experience in the applied science and engineering of lithium-ion batteries gather to share their view on where lithium-ion technology stands

now, what are the main challenges, and their possible solutions. The book contains real-life examples of how a subtle change in cell components can have a considerable effect on cell's performance. Examples are supported with approachable basic science commentaries. Providing a unique combination of practical know-how with an in-depth perspective, this book will appeal to graduate students, young faculty members, or others interested in the current research and development trends in lithium-ion technology.

*A dictionary and grammatical sketch of Ruruuli-Lunyala* Saudah Namyalo, Alena Witzlack-Makarevich, Anatole Kiriggwajjo, Amos Atuhairwe, Zarina Molochieva, Ruth Gimbo Mukama, Margaret Zellers, This book is a dictionary and grammar sketch of Ruruuli-Lunyala, a Great Lakes Bantu language spoken by over 200,000 people in central Uganda. The dictionary part includes about 10,000 entries. Each lexical entry provides translations into English, example sentences, and basic grammatical information. The dictionary part is supplemented with an outline of the Ruruuli-Lunyala grammar, which treats most of the phonological and morpho-syntactic topics. This book is a result of a joined effort of a large team of linguists and many speakers of Ruruuli-Lunyala and is intended as a resource for linguists and Ruruuli-Lunyala speakers, learners, and educators.

Psychology Rose M Spielman, 2018-08 The images in this textbook are in color. There is a less-expensive non-color version available - search for ISBN 9781680922363. Psychology is designed to meet scope and sequence requirements for the single-semester introduction to psychology course. Psychology incorporates discussions that reflect the diversity within the discipline, as well as the diversity of cultures and communities across the globe.

**Urban Smellscapes** Victoria Henshaw, 2013-07-31 We see the city, we hear the city, but above all: we smell the city. Scent has unique qualities: ubiquity, persistence, and an unparalleled connection to memory, yet it has gone overlooked in discussions of sensory design. What scents shape the city? How does scent contribute to placemaking? How do we design smell environments in the city? Urban Smellscapes makes a notable contribution towards the growing body of literature on the senses and design by providing some answers to these questions and contributing towards the wider research agenda regarding how people sensually experience urban environments. It is the first of its kind in examining the role of smell specifically in contemporary experiences and perceptions of English towns and cities, highlighting the perception of urban smellscapes as inter-related with place perception, and describing odour's contribution towards overall sense of place. With case studies from factories, breweries, urban parks, and experimental smell environments in Manchester and Grasse, Urban Smellscapes identifies processes by which urban smell environments are managed and controlled, and gives designers and city managers tools to actively use smell in their work.

**Shinto Shrines** Joseph Cali, John Dougill, 2012-11-30 Of Japan's two great religious traditions, Shinto is far less known and understood in the West. Although there are a number of books that explain the religion and its philosophy, this work is the first in English to focus on sites where Shinto has been practiced since the dawn of Japanese history. In an extensive introductory section, authors Joseph Cali and John Dougill delve into the fascinating aspects of Shinto, clarifying its relationship with Buddhism as well as its customs, symbolism, and pilgrimage routes. This is followed by a fully illustrated guide to 57 major Shinto shrines throughout Japan, many of which have been designated World Heritage Sites or National Treasures. In each comprehensive entry, the authors highlight important spiritual and physical features of the individual shrines (architecture, design, and art), associated festivals, and enshrined gods. They note the prayers offered and, for travelers, the best times to visit. With over 125 color photographs and 50 detailed illustrations of archetypal Shinto objects and shrines, this volume will enthrall not only those interested in religion but also armchair travelers and visitors to Japan alike. Whether you are planning to visit the actual sites or take a virtual journey, this guide is the perfect companion. **The Inland Sea** Donald Richie, 2015-09-28 An elegiac prose celebration . . . a classic in its genre.—Publishers Weekly In this acclaimed travel memoir, Donald Richie paints a memorable portrait of the island-studded Inland Sea. His existential ruminations on food, culture, and love and his brilliant descriptions of life and landscape are a window into an Old Japan that has now nearly vanished. Included are the twenty black and white photographs by Yoichi Midorikawa that accompanied the original 1971 edition. Donald Richie (1924–2013) was an internationally recognized expert on Japanese culture and film. Yoichi Midorikawa (1915–2001) was one of Japan's foremost nature photographers.

Visible Learning for Literacy, Grades K-12 Douglas Fisher, Nancy Frey, John Hattie, 2016-03-22 Every student deserves a great teacher, not by chance, but by design — Douglas Fisher, Nancy Frey, & John Hattie What if someone slipped you a piece of paper listing the literacy practices that ensure students demonstrate more than a year's worth of learning for a year spent in school? Would you keep the paper or throw it away? We think you'd keep it. And that's precisely why acclaimed educators Douglas Fisher, Nancy Frey, and John Hattie wrote Visible Learning for Literacy. They know teachers will want to apply Hattie's head-turning synthesis of more than 15 years of research involving millions of students, which he used to identify the instructional routines that have the biggest impact on student learning. These practices are visible for teachers and students to see, because their

purpose has been made clear, they are implemented at the right moment in a student's learning, and their effect is tangible. Yes, the aha moments made visible by design. With their trademark clarity and command of the research, and dozens of classroom scenarios to make it all replicable, these authors apply Hattie's research, and show you: How to use the right approach at the right time, so that you can more intentionally design classroom experiences that hit the surface, deep, and transfer phases of learning, and more expertly see when a student is ready to dive from surface to deep. Which routines are most effective at specific phases of learning, including word sorts, concept mapping, close reading, annotating, discussion, formative assessment, feedback, collaborative learning, reciprocal teaching, and many more. Why the 8 mind frames for teachers apply so well to curriculum planning and can inspire you to be a change agent in students' lives—and part of a faculty that embraces the idea that visible teaching is a continual evaluation of one's impact on student's learning. Teachers, it's time we embrace the evidence, update our classrooms, and impact student learning in wildly positive ways, say Doug, Nancy, and John. So let's see Visible Learning for Literacy for what it is: the book that renews our teaching and reminds us of our influence, just in time.

*Plant Tissue Culture: Propagation, Conservation and Crop Improvement* Mohammad Anis, Naseem Ahmad, 2016-10-08 This book presents basic concepts, methodologies and applications of biotechnology for the conservation and propagation of aromatic, medicinal and other economic plants. It caters to the needs and challenges of researchers in plant biology, biotechnology, the medical sciences, pharmaceutical biotechnology and pharmacology areas by providing an accessible and cost-effective practical approach to micro-propagation and conservation strategies for plant species. It also includes illustrations describing a complete documentation of the results and research into particular plant species conducted by the authors over the past 5 years. Plant Biotechnology has been a subject of academic interest for a considerable time. In recent years, it has also become a useful tool in agriculture and medicine, as well as a popular area of biological research. Current economic growth is globally projected in a highly positive manner, but the challenges many countries face with regard to food, feed, malnutrition, infectious diseases, the newly identified life-style diseases, and energy shortages, all of which are worsened by an ever-deteriorating environment, continue to pull the growth digits back. The common thread that connects all of the above challenges is biotechnology, which could provide many answers. Molecular biology and biotechnology have now become an integral part of tissue culture research. The tremendous impact generated by genetic engineering and consequently of transgenics now allows us to manipulate plant genomes at will. There has indeed been a rapid development in this area with major successes in both developed and developing countries. The book introduces several new and exciting areas to researchers who are unfamiliar with plant biotechnology and also serves as a review of ongoing research and future directions for scholars. The book highlights numerous methods for in vitro propagation and utilization of techniques in raising transgenics to help readers reproduce the experiments discussed.

**Advances in Computer Entertainment** Anton Nijholt, Teresa Romão, Dennis Reidsma, 2012-10-12 This book constitutes the refereed conference proceedings of the 9th International Conference on Advances in Computer Entertainment, ACE 2012, held in Kathmandu, Nepal, in November 2012. The 10 full paper and 19 short papers presented together with 5 papers from the special track Arts and Culture and 35 extended abstracts were carefully reviewed and selected from a total of 140 submissions in all categories. The papers cover topics across a wide spectrum of disciplines including computer science, design, arts, sociology, anthropology, psychology, and marketing. Focusing on all areas related to interactive entertainment they aim at stimulating discussion in the development of new and compelling entertainment computing and interactive art concepts and applications.
