“The Sting of Death” and Other Stories Toshio Shimao,2020-06-01 Until a recent “boom,” Shimao Toshio, writer of short fiction, critic, and essayist, was not widely known, even in Japan. He has never won the Akutagawa or the Naoki Prize, and none of his works had previously appeared in English translation. He is less well known than other writers (Yasuoka Shotaro, Kojima Nobuo, and Shono Junzo) with whom he has associated and whose works have been liberally translated into English. Yet, there are those who consider him to be one of the best contemporary writers in Japan. This volume by no means exhausts the scope of Shimao's fiction. There are no stories here, for instance, about childhood or student life, and none of his many travel stories. Some of his most famous stories-- When we Never Left Port, for example--have not been included. But the stories presented here do offer a considerable variety of style, from the pristine storybook language of The Farthest Edge of the Islands, to the young intellectual's jargon of Everyday Life in a Dream, to the visionary, hysterical, occasionally ritualistic prose of the sick wife stories, to the sober, difficult, almost ponderous narration of This Time That Summer. Shimao's approach to his material varies as well. Everyday Life in a Dream is the only representative here of a large number of stories usually called surrealist by the critics, stories whose plots progress by the logic of dreams. The individual experience of real life are lived through a combination of conscious and unconscious perception. These stories are the least approachable and the least charming to the casual reader, but they serve, among other things, to highlight patterns in the more realistic fiction. The Farthest Edge of the Islands is a symbolic heightening of reality in another way, a romantic fairy tale beginning at the extremity of experience, at the farthest edge of the world. The other stories are presented as precise, close chronicles of reality by a participant in that reality whose attention never waivers and who never allows himself to avert his eyes from a world that he sees as his responsibility and in a sense his fault. All but the first story, The Farthest Edge of the Islands, which is in third-person narration, are told in the first person by the character who plays Shimao's role in the life that inspired the fiction.

Magic as Metaphor in Anime Dani Cavallaro,2010-03-08 Since its inception as an art form, anime has engaged with themes, symbols and narrative strategies drawn from the realm of magic. In recent years, the medium has increasingly turned to magic specifically as a metaphor for a wide range of cultural, philosophical and psychological concerns. This book first examines a range of Eastern and Western approaches to magic in anime, addressing magical thinking as an overarching concept which unites numerous titles despite their generic and tonal diversity. It then explores the collusion of anime and magic with reference to specific topics. A close study of cardinal titles is complemented by allusions to ancillary productions in order to situate the medium's fascination with magic within an appropriately broad historical context.

“Happiness” and “Pain” across Languages and Cultures Cliff Goddard,Zhengdao Ye,2016-07-26 In the fast-growing fields of happiness studies and pain research, which have attracted scholars from diverse disciplines including psychology, philosophy, medicine, and economics, this volume provides a much-needed cross-linguistic perspective. It centres on the question of how much ways of talking and thinking about happiness and pain vary across cultures, and seeks to answer this question by empirically examining the core vocabulary pertaining to “happiness” and “pain” in many languages and in different religious and cultural traditions. The authors not only probe the precise meanings of the expressions in question, but also provide extensive cultural contextualization, showing how these meanings are truly cultural. Methodologically, while in full agreement with the view of many social scientists and economists that self-reports are the bedrock of happiness research, the volume presents a body of evidence highlighting the problem of translation and showing how local concepts of “happiness” and “pain” can be understood without an Anglo bias. The languages examined include (Mandarin) Chinese, Danish, English, French, German, Japanese, Koromu (a Papua New Guinean language), and Latin American Spanish. Originally published in International Journal of Language and Culture Vol. 1:2 (2014).
