*History of Czechs in America* Jan Habenicht,1996 This valuable resource book was written by Dr. Jan Habenicht of Chicago and published by the Hlas Publishing company of St. Louis in 1910. The research of Dr. Habenicht included extensive travel across the entire United States and writing thousands of letters. It was translated into English by Miroslav Koudelka, a member of CGSI, and edited and arranged by Paul M. Makousky, Publication Chair of CGSI. The book has 595 pages (8 1/2 x 11), is bound by a hardcover and features a beautifully finished metallic blue and white jacket containing a photograph of the Dvorak family in the raspberry field in Minnetonka Township, Minnesota on the front and the Vasko family on their farm near Sun Prairie, Wisconsin on the back. Additions to the book include an index to the illustrations (276 of them), a foreword to the English edition by Paul M. Makousky, a list of the Czech fraternal organizations (appendix II), maps of the 14 states with the largest Czech populations (appendix I), a complete surname index (over 2,400 names), a geographical name index, and a biography of the author. Even if you don't find your family name(s) in this book, it is very valuable in describing the living conditions and experiences of our Czech forbearers from the mid 1800's to 1910. This book provides the most extensive description of Czech life; in religion, among fraternal organizations, in the press, in theater, and in the struggle for maintaining the Czech heritage versus becoming part of the American melting pot. An index listing all surnames in *History of Czechs in America* was added as a feature to the English edition.

**Small-scale Aquaponic Food Production** Christopher Somerville,Food and Agriculture Organization of the United Nations,2015 This technical paper begins by introducing the concept of aquaponics, including a brief history of its development and its place within the larger category of soil-less culture and modern agriculture. It discusses the main theoretical concepts of aquaponics, including the nitrogen cycle and the nitrification process, the role of bacteria, and the concept of balancing an aquaponic unit. It then moves on to cover important considerations of water quality parameters, water testing, and water sourcing for aquaponics, as well as methods and theories of unit design, including the three main methods of aquaponic systems: media beds, nutrient film technique, and deep water culture. The publication discusses in detail the three groups of living organisms (bacteria, plants and fish) that make up the aquaponic ecosystem. It also presents management strategies and troubleshooting practices, as well as related topics, specifically highlighting local and sustainable sources of aquaponic inputs. The publication also includes nine appendixes that present other key topics: ideal conditions for common plants grown in aquaponics; chemical and biological controls of common pests and diseases including a compatible planting guide; common fish diseases and related symptoms, causes and remedies; tools to calculate the ammonia produced and biofiltration media required for a certain fish stocking density and amount of fish feed added; production of homemade fish feed; guidelines and considerations for establishing aquaponic units; a cost-benefit analysis of a small-scale, media bed aquaponic unit; a comprehensive guide to building small-scale versions of each of the three aquaponic methods; and a brief summary of this publication designed as a supplemental handout for outreach, extension and education.
