Battle for Budapest Krisztián Ungváry, 2011-08-30 This title is presented with a new foreword by Istvan Deak. The battle of Budapest in the bleak winter of 1944-45 was one of the longest and bloodiest city sieges of World War II. From the appearance of the first Soviet tanks on the outskirts of the capital to the capture of Buda Castle, 102 days elapsed. In terms of human trauma, it comes second only to Stalingrad, comparisons to which were even being made by soldiers, both German and Soviet, fighting at the time. This definitive history covers their experiences, and those of the 800,000 non-combatants around whom the battle raged.

*That Winter* Pamela Gillilan, 1986 Pamela Gillilan was born in London in 1918, married in 1948

and moved to Cornwall in 1951. When she sat down to write her poem *Come Away* after the death of her husband David, she had written no poems for a quarter of a century. Then came a sequence of incredibly moving elegies. Other poems followed, and two years after starting to write again, she won the Cheltenham Festival poetry competition. Her first collection *That Winter* (Bloodaxe, 1986) was shortlisted for the Commonwealth Poetry Prize.

*War on the Eastern Front* James Lucas, 2014-10-30 This classic WWII history presents a comprehensive yet vividly detailed account of the Third Reich's epic and bitter clash with the Red Army. The opening onslaughts of Operation Barbarossa began on June 22nd, 1941, as German forces stormed into the Soviet Union. Few of them were to survive the five long years of bitter struggle. A posting to the Eastern Front during the Second World War was rightly regarded with dread by the German soldiers. They faced the unremitting hostility of the climate, the people and even, at times, their own leadership. There were epic conflicts, such as the battles of Stalingrad and Kursk. But surrounding these famous events was a daily war of attrition which ultimately ground Hitler's war

machine to a halt. In this classic account, military historian James Lucas examines the Eastern Front from trench warfare to a bicycle-mounted antitank unit fighting against the oncoming Russian hordes. Told through the experiences of the German soldiers who endured these nightmarish years of warfare, War on the Eastern Front is a unique record of this cataclysmic campaign.

**The Soviet Union: A Very Short Introduction** Stephen Lovell, 2009-07-23 Almost twenty years after the Soviet Union's end, what are we to make of its existence? Was it a heroic experiment, an unmitigated disaster, or a viable if flawed response to the modern world? What was the Soviet Union like? How did it evolve over seven decades? What was the relationship between the regime and the general population? This introduction blends political history with an investigation into the society and culture at the time. The author examines aspects of patriotism, mass culture, political violence, poverty, and ideology; and provides answers to some of the big questions about the Soviet experience.

Brave New Car Karl Smith, 2021-09-27 The best years of the automobile lie before us. But it will be a new kind of car and a new kind of automotive experience. There will be a new powertrain

dominating the motoring world. Driving will gradually be ceded to the on-board electronics, and, in response, interiors will become more luxurious and sociable. The car will connect with other cars, and infrastructure, a community and ecology of mobility. Brave New Car outlines the possibilities, and opportunities, that lie before us. A premium quality book for the professional, student, and enthusiast alike, Brave New Car is sure to challenge and inspire new thinking in the automotive world and beyond.

**An English Car Designer Abroad** Peter Birtwhistle, 2020-04-14 **An English Car Designer Abroad** is the humorous and personal account of a life spent working on the design of some of the world's best known cars. Commencing his career as a designer at Vauxhall Motors, Luton in 1973, Peter Birtwhistle then left the UK in 1977 to take a position abroad, at Audi in Germany, where he lived for the rest of his working life. From Audi, his career took him to Porsche in Stuttgart, and eventually, in 1988, to the Japanese company Mazda, with whom he would help develop a Design Centre close to Frankfurt, eventually becoming Chief Designer for Mazda Motor Europe. During his career, Birtwhistle was involved in the design of some very significant cars and in his work and travels, crossed the paths of many significant personalities from the car industry. Car design has changed enormously since the time he commenced his career, and for Birtwhistle it was clear, his story needed to be documented before it was lost in time. Featuring original photographs and illustrations from the author's own collection, this highly humorous and very personal story creates a fascinating collage of anecdotes and

historical facts, not only from the secretive world of car design, but also his private life.

Design Between the Lines Patrick Le Quément, 2019-08-28 The car industry and the way in which cars are created have changed beyond all recognition over the last half-century. Automotive styling was once the grudging afterthought when the engineers had finished their work. Now, following a short flirtation with exotic Italian design houses, it has evolved into sophisticated design carried out by multitalented in-house teams honing carefully crafted brand identities. One of the visionary designers at the forefront of that revolution has been Patrick le Quément. Most widely acclaimed for his 22 years in charge of Renault Design, resulting in such standout models as the Twingo, Scénic and Avantime, le Quément has enjoyed a 50-year career that has also taken in Simca, Ford and Volkswagen-Audi. In his foreword to the book, Stephen Bayley calls le Quément 'perhaps the very most original designer working in the conservative car business at the turn of the millennium'. Some 60 million cars across the world now bear the unmistakable stamp of le Quément. *Design: Between the Lines* is not a straightforward autobiography; rather, le Quément charts his journey through five decades of thoughts,

actions, failures and successes. He offers fascinating commentaries on design and the creative process, and on some of the extraordinary automotive brands that make up our shared cultural heritage. As Bayley notes, for le Quément, design is 'as much a matter of thinking as a matter of drawing'. On a broader, more philosophical level, le Quément also shares his views about life in general and that remarkable contraption called 'the automobile', which has so influenced the lives of millions of people the world over from the late 1800s to the present day. Presented as a series of 50 brief essays or 'perspectives', le Quément's thoughtful and astute observations from the street, from the design studio and from his seat in the boardroom give the reader a penetrating and often amusing insight into the high-level workings of a global industry, its triumphs and tragedies, and the foibles of the decision-makers responsible for running it. A lively complementary text by the automotive journalist Stéphane Geffray accompanies each of le Quément's perspectives, and illustrations are provided by the automobile designer Gernot Bracht. *Design: Between the Lines* will appeal to all motoring fans and enthusiasts of good design. As Chris Bangle, the former Director of BMW Design, remarks: 'Few car

designers have had a career so filled with innovative successes that they have inspired a whole industry; fewer still have the skills to share it. Engaging and revealing, Patrick relates his personal experience and deep knowledge of car design in a very enjoyable manner.'

*Postal Services Bill* Great Britain. Parliament. House of Commons, Great Britain. Parliament. House of Lords, 2000 The Bill provides for the Post Office to be converted from a statutory corporation to a public limited company, with ownership remaining with the Crown. It introduces a new system of licensing and regulation for postal services operators and providers, and gives the independent regulator, the new Postal Services Commission, new powers and duties to protect and promote the interests of users. The Post Office Users' National Council is replaced by the Consumer Council for Postal Services, to bring postal services into line with consumer representation in the other utilities.

*Vertical Living* Robert Klanten, Elli Stuhler, Gestalten, 2021 Mass urbanization. Population growth. All happening faster than we can build for. As global populations are projected to shift to 80-90% urban in the next 30 years, architects are faced with a growing challenge: how to accommodate all this

growth in limited space? At the same time, movements around downsizing and living with less are redefining how we live. Vertical Living explores the future of residential architecture in growing cities. The book looks at ingenious architectural solutions: impossibly skinny houses wedged into narrow plots, spacious homes built into neglected infill sites and comfortable homes created in tiny spaces. By combining inspirational projects, in-depth features and engaging profiles of architects around the world, Vertical Living will offer a new way of looking at how we live in the built environment.

Progressive Capitalism Ro Khanna, 2023-02-07 Congressman Ro Khanna offers a revolutionary, “progressive” (James J. Heckman, Nobel Prize winner and professor of economics at the University of Chicago) roadmap to facing America’s digital divide, offering greater economic prosperity to all. In Khanna’s vision, “just as people can move to technology, technology can move to people” (from the foreword by Amartya Sen, Nobel Laureate in Economics) where “Khanna envisions redistributing opportunities from coastal cities to rural middle-America...An exciting vision, brilliantly rendered.” (Arlie Russell Hochschild, author of Strangers in Their Own Land). Unequal access to technology and the

revenue it creates is one of the most pressing issues in the United States. An economic gulf exists between those who have struck gold in the tech industry and those left behind by the digital revolution; a geographic divide between those in the coastal tech industry and those in the heartland whose jobs have been automated; and existing inequalities in the technological access—students without computers, rural workers with spotty WiFi, and many workers without the luxury to work remotely. Congressman Ro Khanna’s *Progressive Capitalism* tackles these challenges head-on and imagines how the digital economy can create opportunities for people across the country without uprooting them. Anchored by an approach Khanna calls “progressive capitalism,” he shows how democratizing access to tech can strengthen every sector of economy and culture. By expanding technological jobs nationwide through public and private partnerships, we can close the wealth gap in America and begin to repair the fractured, distrusting relationships that have plagued our country for fall too long. Inspired by his own story born into an immigrant family, Khanna understands how economic opportunity can change the course of a person’s life. Moving deftly between storytelling, policy, and some of the

country's greatest thinkers in political philosophy and economics, Khanna presents a vision we can't afford to ignore. Progressive Capitalism is a "practical and aspirational" (Kimberlé Crenshaw, professor of law at UCLA and Columbia University) roadmap to how we can seek dignity for every American in an era in which technology shapes every aspect of our lives.

**System Identification** R. Isermann, 2014-05-23 System Identification is a special section of the International Federation of Automatic Control (IFAC)-Journal Automatica that contains tutorial papers regarding the basic methods and procedures utilized for system identification. Topics include modeling and identification; step response and frequency response methods; correlation methods; least squares parameter estimation; and maximum likelihood and prediction error methods. After analyzing the basic ideas concerning the parameter estimation methods, the book elaborates on the asymptotic properties of these methods, and then investigates the application of the methods to particular model structures. The text then discusses the practical aspects of process identification, which includes the usual, general procedures for process identification; selection of input signals and sampling time; offline and

on-line identification; comparison of parameter estimation methods; data filtering; model order testing; and model verification. Computer program packages are also discussed. This compilation of tutorial papers aims to introduce the newcomers and non-specialists in this field to some of the basic methods and procedures used for system identification.

**Digital Renaissance** Joel Waldfogel, 2020-12-08 How digital technology is upending the traditional creative industries—and why that’s a good thing The digital revolution poses a mortal threat to the major creative industries—music, publishing, television, and the movies. Cheap, easy self-producing is eroding the position of the gatekeepers and guardians of culture. Does this revolution herald the collapse of culture, as some commentators claim? Far from it. In *Digital Renaissance*, Joel Waldfogel argues that digital technology is enabling a new golden age of popular culture—a digital renaissance. Analyzing decades of production and sales data, as well as bestseller and best-of lists, Waldfogel finds that the new digital model is just as powerful at generating high-quality, successful work as the old industry model, and in many cases more so.
