Frances Harrison Marr

An Introduction to Modern Vehicle Design Julian Happian-Smith, 2001 An Introduction to Modern Vehicle Design starts from basic principles and builds up analysis procedures for all major aspects of vehicle and component design. Subjects of current interest to the motor industry - such as failure prevention, designing with modern material, ergonomics, and control systems - are covered in detail, with a final chapter discussing future trends in automotive design. Extensive use of illustrations, examples, and case studies provides the reader with a thorough understanding of design issues and analysis methods.

Branded Entertainment Jean-Marc Lehu, 2007-03-03 Branded Entertainment explains how product placement, a long-time phenomenon in films, has gone beyond this to now embrace all media. Citing examples from film to music video, to computer games, the author explains the: history and development of product placement; advantages of this form of brand advertising; and methods employed by different brands. Most importantly, Branded Entertainment discusses the future possibilities for using this form of promotion to recreate an emotional connection with customers and exploiting the opportunities afforded by advances in technology to spread the message across multimedia channels.

A Sociology of the World Rally Championship H. Naess, 2014-09-23 Drawing upon interviews with key people in the World Rally Championship as well as trans-local ethnographic research, this book explores questions of commerciality and sporting identity, tackling the sport's controversial handling of the shift into 'the commercial age'. It is essential reading on combining sporting heritage and commercial progress.

Impact and Explosion M. Y. H. Bangash,1993-07-15 Impact and Explosion: Structural Analysis and Design presents a comprehensive study of the structural dynamics of impact and explosion by providing a survey of types of aircraft, missiles, bombs, and detonators. Impact dynamics, including empirical models developed for different materials, water surfaces, and soil/rock mediums, is discussed. Other topics include load time history; explosion dynamics related to material damage capabilities; dynamic finite elements with provisions for impact and explosions; a discussion of solution procedures, acceleration, and convergence criteria; methods for designing structures resistant to impact and explosions; and how damage results due to impact or explosions. Case histories, comparative studies, numerous examples, appendices, and extensive references reinforce information presented in this important book for engineers and researchers working in government and private industry laboratories concerned with blast or impact loading effects on structures. Small firms that deal with impact loading (e.g., automobile collisions) will also find this book valuable.
