Space Shuttle Missions Summary (NASA/TM-2011-216142) Robert D. Legler, Floyd V. Bennett, 2011-09-01 Full color publication. This document has been produced and updated over a 21-year period. It is intended to be a handy reference document, basically one page per flight, and care has been exercised to make it as error-free as possible. This document is basically as flown data and has been compiled from many sources including flight logs, flight rules, flight anomaly logs, mod flight descent summary, post flight analysis of mps propellants, FDRD, FRD, SODB, and the MER shuttle flight data and inflight anomaly list. Orbit distance traveled is taken from the PAO mission statistics.

Presumption of Guilt Martin Schönteich, Open Society Justice Initiative, Robert O. Varenik, 2014 In India, a man spent 54 years behind bars in pretrial detention, waiting for a trial that would never happen because his file had been lost. In Nigeria, one study estimated that the average detainee waits over three years for his day in court. In Russia, pretrial detainees have begged for the chance to plead guilty, just so they can receive medical care. And in the United States, juvenile pretrial detainees have been forced to fight each other for their guards' amusement. Around the world, millions are effectively punished before they are tried. Legally entitled to be considered innocent and released pending trial, many accused are instead held in pretrial detention, where they are subjected to torture, exposed to life threatening disease, victimized by violence, and pressured for bribes. It is literally worse than being convicted: pretrial detainees routinely experience worse conditions than sentenced prisoners. The suicide rate among pretrial detainees is three times higher than among convicted prisoners, and ten times that of the outside community. Pretrial detention harms individuals, families, and communities; wastes state resources and human potential; and undermines the rule of law. The arbitrary and excessive use of pretrial detention is a massive and widely ignored pattern of human rights abuse that affects by a conservative estimate 15 million people a year. The right to be presumed innocent until proven guilty is universal, but at this moment some 3.3 million people are behind bars, waiting for a trial that may be months or even years away. No right is so broadly accepted in theory, but so commonly violated in practice. It is fair to say that the global overuse of pretrial detention is the most overlooked human rights crisis of our time. *Presumption of Guilt* examines the full consequences of the global overuse of pretrial detention. Combining statistical analysis, first-person accounts, graphics, and case studies of successful reforms, the report is the first to comprehensively document this widespread but frequently ignored form of human rights abuse. Poor Economics Abhijit V. Banerjee, Esther Duflo, 2012-03-27 The winners of the Nobel Prize in Economics upend the most common assumptions about how economics works in this gripping and disruptive portrait of how poor people actually live. Why do the poor borrow to save? Why do they miss out on free life-saving immunizations, but pay for unnecessary drugs? In *Poor Economics*, Abhijit V. Banerjee and Esther Duflo, two award-winning MIT professors, answer these questions based on years of field research from around the world. Called marvelous, rewarding by the Wall Street Journal, the book offers a radical rethinking of the economics of poverty and an intimate view of life on 99 cents a day. *Poor Economics* shows that creating a world without poverty begins with understanding the daily decisions facing the poor.

The Age of Sustainability Mark Swilling, 2019-11-06 With transitions to more sustainable ways of living already underway, this book examines how we understand the underlying dynamics of the transitions that are unfolding. Without this understanding, we enter the future in a state of informed bewilderment. Every day we are bombarded by reports about ecosystem breakdown, social conflict,

economic stagnation and a crisis of identity. There is mounting evidence that deeper transitions are underway that suggest we may be entering another period of great transformation equal in significance to the agricultural revolution some 13,000 years ago or the Industrial Revolution 250 years ago. This book helps readers make sense of our global crisis and the dynamics of transition that could result in a shift from the industrial epoch that we live in now to a more sustainable and equitable age. The global renewable energy transition that is already underway holds the key to the wider just transition. However, the evolutionary potential of the present also manifests in the mushrooming of ecocultures, new urban visions, sustainability-oriented developmental states and new ways of learning and researching. Shedding light on the highly complex challenge of a sustainable and just transition, this book is essential reading for anyone concerned with establishing a more sustainable and equitable world. Ultimately, this is a book about hope but without easy answers.

Globalization, Democracy and Oil Sector Reform in Nigeria Adeoye O. Akinola,2018-01-26 The Nigerian state has been oil-rich for decades, and yet perennially incapable of converting its oil resources into wealth for ordinary Nigerians. Adeoye O. Akinola tackles this “vexed” oil question by examining the political economy of efforts to deregulate the Nigerian downstream oil industry. Focusing on themes of globalization and democratization, this book considers how a resource-rich developing country like Nigeria can exploit the opportunities of globalization and navigate the pressures of democratization and the challenges of liberalization. Pairing sophisticated theoretical frameworks with firsthand accounts from actors in the oil industry, this book identifies the root causes of Nigeria’s development struggles and offers practical policy solutions for successfully deregulating the oil sector. For public officials and policymakers as well as researchers, this book offers a critical new lens on the future of natural resource management in Nigeria and the Global South.

Microbial Control of Insect and Mite Pests Lawrence A. Lacey,2016-09-03 Microbial Control of Insect and Mite Pests: From Theory to Practice is an important source of information on microbial control agents and their implementation in a variety of crops and their use against medical and veterinary vector insects, in urban homes and other structures, in turf and lawns, and in rangeland and forests. This comprehensive and enduring resource on entomopathogens and microbial control additionally functions as a supplementary text to courses in insect pathology, biological control, and integrated pest management. It gives regulators and producers up-to-date information to support their efforts to facilitate and adopt this sustainable method of pest management. Authors include an international cadre of experts from academia, government research agencies, technical representatives of companies that produce microbial pesticides, agricultural extension agents with hands on microbial control experience in agriculture and forestry, and other professionals working in public health and urban entomology. Covers all pathogens, including nematodes Addresses the rapidly progressing developments in insect pathology and microbial control, particularly with regard to molecular methods Demonstrates practical use of

entomopathogenic microorganisms for pest control, including tables describing which pathogens are available commercially Highlights successful practices in microbial control of individual major pests in temperate, subtropical, and tropical zones Features an international group of contributors, each of which is an expert in their fields of research related to insect pathology and microbial control

absenteeism and beyond: instructional time loss and consequences Helen Abadzi, 2007 Abstract: Studies have shown that learning outcomes are related to the amount of time students engage in learning tasks. However, visits to schools have revealed that students are often taught for only a fraction of the intended time, particularly in lower-income countries. Losses are due to informal school closures, teacher absenteeism, delays, early departures, and sub-optimal use of time in the classroom. A study was undertaken to develop an efficient methodology for measuring instructional time loss. Thus, instructional time use was measured in sampled schools in Tunisia, Morocco, Ghana, and the Brazilian state of Pernambuco. The percentage of time that students were engaged in learning vis-à-vis government expectations was approximately 39 percent in Ghana, 63 percent in Pernambuco, 71 percent in Morocco, and 78 percent in Tunisia. Instructional time use is a mediator variable that is challenging to measure, so it often escapes scrutiny. Research suggests that merely financing the ingredients of instruction is not enough to produce learning outcomes; students must also get sufficient time to process the information. The quantity-quality tradeoff that often accompanies large-scale enrollments may be partly due to instructional time restrictions. Time wastage also distorts budgetary outlays and teacher salary rates. To achieve the Millennium Development Goals students must get more of the time that governments, donors, and parents pay for.

Grunt: The Curious Science of Humans at War Mary Roach, 2016-06-07 A New York Times / National Bestseller America's funniest science writer (Washington Post) Mary Roach explores the science of keeping human beings intact, awake, sane, uninfected, and uninfested in the bizarre and extreme circumstances of war. Grunt tackles the science behind some of a soldier's most challenging adversaries—panic, exhaustion, heat, noise—and introduces us to the scientists who seek to conquer them. Mary Roach dodges hostile fire with the U.S. Marine Corps Paintball Team as part of a study on hearing loss and survivability in combat. She visits the fashion design studio of U.S. Army Natick Labs and learns why a zipper is a problem for a sniper. She visits a repurposed movie studio where amputee actors help prepare Marine Corps medics for the shock and gore of combat wounds. At Camp Lemmonier, Djibouti, in east Africa, we learn how diarrhea can be a threat to national security. Roach samples caffeinated meat, sniffs an archival sample of a World War II stink bomb, and stays up all night with the crew tending the missiles on the nuclear submarine USS Tennessee. She answers questions not found in any other book on the military: Why is DARPA interested in ducks? How is a wedding gown like a bomb suit? Why are shrimp more dangerous to sailors than sharks? Take a tour of duty with Roach, and you'll never see our nation's defenders in the same way again.

Just Transitions Mark Swilling, Eve Annecke, 2012 Current economic growth strategies around the world are rapidly depleting the natural resources and ecosystem services that we depend on. Just Transitions provides a comprehensive overview of these challenges from a Global South perspective. The authors ask: How do developing countries eradicate poverty via economic development, while at the same time facing the consequences of global warming and dwindling levels of cheap oil, productive soils, metals, clean water supplies, and forest products? How do they address widening inequalities in income as well as the need to rebuild ecosystem services

and natural resources? The book considers the theme of a just transition, which reconciles the sustainable use of natural resources with a pervasive commitment to sufficiency (where overconsumers are satisfied with less so that underconsumers can secure enough). It explores a range of different viewpoints and ideas and synthesizes them to illuminate new ways of thinking from a sustainability perspective. It rethinks development with special reference to the greening of the developmental state, explores the key role that cities could play in the transition to a more sustainably urbanized world, and highlights the neglect of soils in the global discussions around the potential of sustainable agriculture to feed the world. Case studies drawn from the African continent detail the challenges, but they are set in the context of global trends. The authors conclude with their experiences in building a community that aspires to live sustainably.
