Everyone You Hate Is Going to Die Daniel Sloss, 2021-10-12 One of this generation's hottest and boldest young comedians presents a transgressive and hilarious analysis of all of our dysfunctional relationships, and attempts to point us in the vague direction of sanity. Daniel Sloss's stand-up comedy engages, enrages, offends, unsettles, educates, comforts, and gets audiences roaring with laughter—all at the same time. In his groundbreaking specials, seen on Netflix and HBO, he has brilliantly tackled everything from male toxicity and friendship to love, romance, and marriage—and claims (with the data to back it up) that his on-stage laser-like dissection of relationships has single-handedly caused more than 300 divorces and 120,000 breakups. Now, in his first book, he picks up where his specials left off, and goes after every conceivable kind of relationship—with one's country (Sloss's is Scotland); with America; with lovers, ex-lovers, ex-lovers who you hate, ex-lovers who hate you; with parents; with best friends (male and female), not-best friends; with children; with siblings; and even with the global pandemic and our own mortality. In *Everyone You Hate Is Going to Die*, every human connection gets the brutally funny (and unfailingly incisive) Sloss treatment as he illuminates the ways in which all of our relationships are fragile and ridiculous and awful—but also valuable and meaningful and important.

Reducing Underage Drinking Institute of Medicine, National Research Council, Division of Behavioral and Social Sciences and Education, Board on Children, Youth, and Families, Committee on Developing a Strategy to Reduce and Prevent Underage Drinking, 2004-03-26 Alcohol use by young people is extremely dangerous - both to themselves and society at large. Underage alcohol use is associated with traffic fatalities, violence, unsafe sex, suicide, educational failure, and other problem behaviors that diminish the prospects of future success, as well as health risks — and the earlier teens start drinking, the greater the danger. Despite these serious concerns, the media continues to make drinking look attractive to youth, and it remains possible and even easy for teenagers to get access to alcohol. Why is this dangerous behavior so pervasive? What can be done to prevent it? What will work and who is responsible for making sure it happens? *Reducing Underage Drinking* addresses these questions and proposes a new way to combat underage alcohol use. It explores the ways in which may different individuals and groups contribute to the problem and how they can be enlisted to prevent it. *Reducing Underage Drinking* will serve as both a game plan and a call to arms for anyone with an investment in youth health and safety.

Are Prisons Obsolete? Angela Y. Davis, 2011-01-04 With her characteristic brilliance, grace and radical audacity, Angela Y. Davis has put the case for the latest abolition movement in American life: the abolition of the prison. As she quite correctly notes, American life is replete with abolition movements, and when they were engaged in these struggles, their chances of success seemed almost unthinkable. For generations of Americans, the abolition of slavery was sheerest illusion. Similarly, the entrenched system of racial segregation seemed to last forever, and generations lived in the midst of the practice, with few predicting its passage from custom. The brutal, exploitative (dare one say lucrative?) convict-lease system that succeeded formal slavery reaped millions to southern jurisdictions (and untold miseries for tens of thousands of men, and women). Few predicted its passing from the American penal landscape. Davis expertly argues how social movements transformed these social, political and cultural institutions, and made such practices untenable. In *Are Prisons Obsolete?*, Professor Davis seeks to illustrate that the time for the prison is approaching an end. She argues forthrightly for decarceration, and argues for the transformation of the society as a whole.

Ecology of Fragmented Landscapes Sharon K. Collinge, 2009-06 Ask airline passengers what they see as they gaze out the window, and they will describe a fragmented landscape: a patchwork of desert, woodlands, farmlands, and developed neighborhoods. Once-contiguous forests are now subdivided; tallgrass prairies that extended for thousands of miles are now crisscrossed by highways and byways. Whether the result of naturally occurring environmental changes or the product of seemingly unchecked human development, fractured lands significantly impact the planet's biological diversity. In *Ecology of Fragmented Landscapes*, Sharon K. Collinge defines fragmentation, explains its various causes, and suggests ways that we can put our lands back together. Researchers have been studying the ecological effects of dismantling nature for decades. In this book, Collinge evaluates this body of research, expertly synthesizing all that is known about the ecology of fragmented landscapes. Expanding on the traditional coverage of this topic, Collinge also discusses disease ecology, restoration, conservation, and planning. Not since Richard T. T. Forman's classic *Land Mosaics* has there been a more comprehensive examination of landscape fragmentation. *Ecology of Fragmented Landscapes* is critical reading for ecologists, conservation biologists, and students alike.

The Partnership Charles D. Ellis, 2008-10-07 The inside story of one of the world's most powerful financial institutions. Now with a new foreword and final chapter, *The Partnership* chronicles the most important periods in Goldman Sachs's history and the individuals who built one of the world's largest investment banks. Charles D. Ellis, who worked as a strategy consultant to Goldman Sachs for more than thirty years, reveals the secrets behind the firm's continued success through many life-threatening changes. Disgraced and nearly destroyed in 1929, Goldman Sachs limped along as a break-even operation through the Depression and WWII. But with only one special service and one improbable banker, it began the stage-by-stage rise that took the firm to global leadership, even in the face of the world-wide credit crisis.

The Empathy Exams Leslie Jamison, 2014-04-01 From personal loss to phantom diseases, *The Empathy Exams* is a bold and brilliant collection, winner of the Graywolf Press Nonfiction Prize. A Publishers Weekly Top Ten Essay Collection of Spring 2014. Beginning with her experience as a medical actor who was paid to act out symptoms for medical students to diagnose, Leslie Jamison's visceral and revealing essays ask essential questions about our basic understanding of others: How should we care about each other? How can we feel another's pain, especially when pain can be assumed, distorted, or performed? Is empathy a tool by which to test or even grade each other? By confronting pain—real and imagined, her own and others'—Jamison uncovers a personal and cultural urgency to feel. She draws from her own experiences of illness and bodily injury to engage in an exploration that extends far beyond her life, spanning wide-ranging territory—from poverty tourism to phantom diseases, street violence to reality television, illness to incarceration—in its search for a kind of sight shaped by humility and grace.

Hearts and Mines Tanner Mirrlees, 2016-01-15 The US security state is everywhere in cultural products: in army-supported news stories, TV shows, and video games; in CIA-influenced blockbusters and comics; and in State Department ads, broadcasts, and websites. *Hearts and Mines* examines the rise and reach of the US Empire's culture industry – a nexus between the US's security state and media firms and the source of cultural products that promote American strategic interests around the world. Building on Herbert I. Schiller's classic study of US Empire and communications, Tanner Mirrlees interrogates the symbiotic geopolitical and economic relationships between the US state and media firms that drive the production of imperial culture.

Vital Directions for Health & Health Care National Academy of Medicine,2023-09-09 What can be more vital to each of us than our health? Yet, despite unprecedented health care spending, the U.S. health system is substantially underperforming, especially with respect to what should be possible, given current knowledge. Although the United States is currently devoting 18% of its Gross Domestic Product to delivering medical care—more than \$3 trillion annually and nearly double the expenditure of other advanced industrialized countries—the U.S. health system ranked only 37 in performance in a World Health Organization assessment of member nations. In *Vital Directions for Health & Health Care: An Initiative of the National Academy of Medicine*, the National Academy of Medicine (NAM), which has long stood as the nation's most trusted independent source of guidance in health, health care, and biomedical science, has marshaled the wisdom of more than 150 of the nation's best researchers and health policy experts to assess opportunities for substantially improving the health and well-being of Americans, the quality of care delivered, and the contributions of science and technology. This publication identifies practical and affordable steps that can and must be taken across eight action and infrastructure priorities, ranging from paying for value and connecting care, to measuring what matters most and accelerating the capture of real-world evidence. Without obscuring the difficulty of the changes needed, in *Vital Directions*, the NAM offers an important blueprint and resource for health, policy, and leaders at all levels to achieve much better health outcomes at much lower cost.

Theory and Application of Diagrams Michael Anderson,Peter Cheng,Volker Haarslev,2003-07-31 *Diagrams 2000* is dedicated to the memory of Jon Barwise. *Diagrams 2000* was the first event in a new interdisciplinary conference series on the Theory and Application of Diagrams. It was held at the University of Edinburgh, Scotland, September 1-3, 2000. Driven by the pervasiveness of diagrams in human communication and by the increasing availability of graphical environments in computerized work, the study of diagrammatic notations is emerging as a research field in its own right. This development has simultaneously taken place in several scientific disciplines, including, amongst others: cognitive science, artificial intelligence, and computer science. Consequently, a number of different workshop series on this topic have been successfully organized during the last few years: *Thinking with Diagrams*, *Theory of Visual Languages*, *Reasoning with Diagrammatic Representations*, and *Formalizing Reasoning with Visual and Diagrammatic Representations*. Diagrams are simultaneously complex cognitive phenomena and sophisticated computational artifacts. So, to be successful and relevant the study of diagrams must as a whole be interdisciplinary in nature. Thus, the workshop series mentioned above decided to merge into *Diagrams 2000*, as the single interdisciplinary conference for this exciting new field. It is intended that *Diagrams 2000* should become the premier international conference series in this area and provide a forum with sufficient breadth of scope to encompass researchers from all academic areas who are studying the nature of diagrammatic representations and their use by humans and in machines.

Deterrence and the Death Penalty National Research Council,Division of Behavioral and Social Sciences and Education,Committee on Law and Justice,Committee on Deterrence and the Death Penalty,2012-05-26 Many studies during the past few decades have sought to determine whether the death penalty has any deterrent effect on homicide rates. Researchers have reached widely varying, even contradictory, conclusions. Some studies have concluded that the threat of capital punishment deters murders, saving large numbers of lives; other studies have concluded that executions actually increase homicides; still others, that executions have no effect on murder rates. Commentary among researchers, advocates, and policymakers on the scientific validity of the findings has sometimes been acrimonious. Against this backdrop, the National Research Council report *Deterrence and the Death Penalty* assesses whether the available evidence provides a scientific basis for answering questions of if and how the death penalty affects homicide rates. This new report from the Committee on Law and Justice concludes that research to date on the effect of capital punishment on homicide rates is not useful in determining whether the death penalty increases, decreases, or has no effect on these rates. The key question is whether capital punishment is less or more effective as a deterrent than alternative punishments, such as a life sentence without the possibility of parole. Yet none of the research that has been done accounted for the possible effect of noncapital punishments on homicide rates. The report recommends new avenues of research that may provide broader insight into any deterrent effects from both capital and noncapital punishments.

EBOOK: Learning Disability Gordon Grant, Paul Ramcharan, Margaret Flynn, Malcolm Richardson, 2010-05-16 The editors have brought together a range of eminent contributors who present a range of issues throughout the life cycle. The book asserts that it hopes to 'assist readers to anticipate change and discontinuity in people's lives and think about strategies to support them' through the many challenges that they may face in their lives. In my view this book certainly does that and the editors and contributors are to be congratulated on the production of a relevant and contemporary text that I have no hesitation in both endorsing and recommending to all involved in supporting and or caring for people with learning disabilities. Professor Bob Gates, Project Leader - Learning Disabilities Workforce Development, NHS Education South Central, UK The editors have gathered an authoritative faculty to present and discuss a range of contemporary issues; both practical and ethical. The text is well grounded in the lived experience of people with disability and draws on the evidence-base of contemporary science. Each chapter includes thought provoking exercises. This is a seminal text for students and practitioners, researchers and policy makers. Associate Professor Keith R. McVilly, Deakin University, Australia I currently own a copy of the first edition and it has proved an invaluable resource time and time again. There is not an essay I complete that does not make reference to the book and I can consistently use it to reflect back on my practice as a student nurse and social worker. Having read several extracts from the new edition it does appear to include very high quality content covering learning disabilities over the lifespan ... if I were to personally recommend any book for budding or current learning disability professionals then this would be it. James Grainger, Student Nurse/Social Worker, Sheffield Hallam University, UK I like the way it has primary and secondary information from a range of sources. The exercises in the book also get you to think about the situation in question which helps us think about our values and anti-oppressive practice ... This book really does start with the basics and having a learning disability from birth and the effects, to in depth knowledge and literature ... This book would be very helpful to me as it brings in literature policies and models from both a health and social side, which is important for my course and collaborative working. Laura Jean Lowe, Student Nurse, Sheffield Hallam University, UK It is written with a clearly conveyed in-depth knowledge and in a way that has professional lived experience within the context of the work. The authors have taken into account the emotional, client-centred approach to the modern practitioner's practice ... The book gives a true wealth of good practice scenarios that can only help practitioners be good at what they do and aspire to be. Lee Marshall, Student Nurse, Sheffield Hallam University, UK With its spread of chapters covering key issues across the life cycle this text has established itself as the foundational primer for those studying the lived experiences of people with learning disabilities and their families, and outcomes achieved through services and support systems. Recognising learning disability as a lifelong disability, this accessible book is structured around the life cycle. The second edition is refreshed and expanded to include seven new chapters, covering: Aetiology Breaking news (about disability) and early intervention Transition to adulthood The sexual lives of women Employment Personalisation People with hidden identities With contributions from respected figures from a range of disciplines, the book draws heavily upon multidisciplinary perspectives and is based on the latest research and evidence for practice. The text is informed by medical, social and legal models of learning disability, exploring how learning disability is produced, reproduced and understood. Extensive use is made of real-life case studies, designed to bring theory, values, policy and practice to life. Narrative chapters describe, in the words of people with learning disabilities themselves, their lives and aspirations. They helpfully show readers the kinds of roles played by families, advocates and services in supporting people with learning disabilities. New exercises and questions have been added to encourage discussion and reflection on practice. Learning Disability is core reading for students entering health and social care professions to work with people with learning disabilities. It is a compelling reference text for practitioners as it squarely addresses the challenges facing people with learning disability, their loved ones and the people supporting them. Contributors Dawn Adams, Kathryn Almack, Dorothy Atkinson, Nigel Beail, Christine Bigby, Alison Brammer, Jacqui Brewster, Hilary Brown, Jennifer Clegg, Lesley Cogher, Helen Combes, Clare Connors, Bronach Crawley, Eric Emerson, Margaret Flynn, Linda Gething, Dan Goodley, Peter Goward, Gordon Grant, Chris Hatton, Sheila Hollins, Jane Hubert, Kelley Johnson, Gwynnyth Llewellyn, Heather McAlister, Michelle McCarthy, Alex McClimens, Roy McConkey, David McConnell, Keith McKinstrie, Fiona Mackenzie, Ghazala Mir, Ada Montgomery, Lesley Montisci, Elizabeth Murphy, Chris Oliver, Richard Parrott, Paul Ramcharan, Malcolm Richardson, Bronwyn Roberts, Philippa Russell, Kirsten Stalker, Martin Stevens, John Taylor, Irene Tuffrey-Wijne, Sally Twist, Jan Walmsley, Kate Woodcock

Thermodynamics and Energy Conversion Henning Struchtrup, 2014-07-02 This textbook gives a thorough treatment of engineering thermodynamics with applications to classical and modern energy conversion devices. Some emphasis lies on the description of irreversible processes, such as friction, heat transfer and mixing and the evaluation of the related work losses. Better use of resources requires high efficiencies therefore the reduction of irreversible losses should be seen as one of the main goals of a thermal engineer. This book provides the necessary tools. Topics include: car and aircraft engines, including Otto, Diesel and Atkinson cycles, by-pass turbofan engines, ramjet and scramjet; steam and gas power plants, including advanced regenerative systems, solar tower and compressed air energy storage; mixing and separation, including reverse osmosis, osmotic power plants and carbon sequestration; phase equilibrium and chemical equilibrium, distillation, chemical reactors, combustion processes and fuel cells; the microscopic

definition of entropy. The book includes about 300 end-of-chapter problems for homework assignments and exams. The material presented suffices for two or three full-term courses on thermodynamics and energy conversion.
