Das Boot ,2002

German U-Boat Ace Heinrich Lehmann-Willenbrock Luc Braeuer,2017 With the international success of the classic film Das Boot, U-96 is arguably the most famous of all German U-boats. Here is the true story of U-96, and its legendary commander Heinrich Lehmann-Willenbrock. In continuous combat from September 1940 to March 1945, follow the crew of U-96 from their bases in Kiel, Germany, as well as Lorient and St. Nazaire on the west coast of France, to intense combat against Allied shipping. During eleven combat patrols in the North Atlantic under Lehmann-Willenbrock, U-96 sank twenty-four Allied ships, eventually earning its commander the Knight's Cross with Oak Leaves. One of their patrols was documented by war correspondent Lothar-Günther Buchheim, which was later novelized and made into the film Das Boot. This biography of Heinrich Lehmann-Willenbrock, and history of U-96 is based on the WWII captain's log as well as the recollections of crewmembers.

Das Boot Lothar-Günther Buchheim,Wolf Kähler,2004

The VIIC Type U-Boot Waldemar Góralski,Mieczysław Jastrzębski,2011-03 The type VIIC was a slightly modified version of the successful VIIB. They had basically the same engine layout and power, but were slightly larger and heavier which made them not quite as fast as the VIIB. 5 torpedo tubes (4 at the bow and one at the stern) were installed in all but the following boats; only two bow tubes (U-72, U-78, U-80, U-554 and U-555) and no stern tube (U-203, U-331, U-351, U-401, U-431 and U-651). The VIIC was the workhorse of the German U-boat force in World War Two from 1941 onwards and boats of this type were being built throughout the war. The first VIIC boat being commissioned was the U-69 in 1940. The VIIC was an effective fighting machine and was seen in almost all areas where the U-boat force operated although their range was not as great as the one of the larger IX types. The VIIC came into service as the Happy Days were almost over and it was this boat that faced the final defeat to the Allied anti-submarine campaign in late 1943 and 1944. Perhaps the most famous VIIC boat was the U-96 which is featured in the movie Das Boot, other noticeable boats were the U-flak boats. Many of these boats were fitted with the Schnorkel in 1944-1945. This design saw one more improvement in the type VIIC/41 boat. The larger mine-laying type VIID was a direct variant of the VIIC.

Das Boot Lothar-Günther Buchheim,1973 Jedes Wort dieses Buches ist wahr. Lothar-Günther Buchheim war im Zweiten Weltkrieg Marinekriegsberichterstatte. Als ein Mann, der sich zur Zeugenschaft aufgerufen fühlt, weil er extreme Situationen erlebte und überlebte, geht es ihm um die genaue Wiedergabe der Ereignisse, um die Beschwörung der Wochen und Monate quälender Gefangenschaft in der Enge des Boots, um die Stunden der Angst und die dramatischen Augenblicke des Kampfes.

Type VII Marek Krzyształowicz,2012-05-02 “Describ[es] the Type VII and its place in the history of warfare . . . probably the finest book on German submarines of WWII available in print.”—Firetrench First conceived in the mid–1930s, the Type VII was still in production in the closing stages of the Second World War a decade later. Subject to continuous improvement through six major variants and with around 650 completed, it was built in larger numbers than any other submarine design in history. It formed the backbone of the Kriegsmarine’s campaign against merchant shipping for the whole of the war, and in terms of tonnage sunk was by far the most successful U-boat type. This encyclopedic work combines a technical description of the type in all its variations with a history of its development and an overview of its most significant operations—especially those convoy battles that were to have a crucial impact on the evolution of the design and its equipment. A particular attraction of the book is the comprehensive visual coverage—photographs of virtually every aspect of design, construction, fittings and shipboard life; highly detailed general arrangement plans and close-up scale drawings; and, with modelmakers in mind, a stunning collection of full-color three-dimensional illustrations of every external feature and variant of the boats. There have been many books on U-boats reflecting an enduring public interest so any new offering has to be special. With its unique concentration of information and illustrative reference, Type VII is unrivalled. “A comprehensive history of the Kriegsmarine’s most potent weapon . . . includes detailed modelmakers’ plans together with over 320 photographs.”—Maritime Advisor

Type VII U-Boats Roger Chesneau,2012-01-20 The ShipCraft series provides in-depth information about building and modifying model kits of famous warship types. Lavishly illustrated, each book takes the modeller through a brief history of the subject class, highlighting differences between sister-ships and changes in their appearance over their careers. This includes paint schemes and camouflage, featuring colour profiles and highly-detailed line drawings and scale plans. The modelling section reviews the strengths and weaknesses of available kits, lists commercial accessory sets for super-detailing of the ships, and provides hints on modifying and improving the basic kit. This is followed by an extensive photographic gallery of selected high-quality models in a variety of scales, and the book concludes with a section on research references books, monographs, large-scale plans and websites.This volume is devoted to the largest class of submarines ever built, the Type VII, which formed the backbone of the German effort in the critical Battle of the Atlantic. A pre-war design, the Type VII was developed as the campaign progressed and was still in frontline service in 1945. All the major variants, as well as minor changes to equipment, are covered here. With its unparalleled level of visual information paint schemes, models, line drawings and photographs it is simply the best reference for any modelmaker setting out to build one of these famous boats.

History of the U-Boot Kittel & Graf,2015-03-10 U-Boot is the German term to refer broadly to submarines, and is short for Unterseeboot, literally submarine boat. The objectives of the U-boat campaigns in both wars were the convoys carrying supplies from the US to Europe. The term U-Boot, followed by a number, such as U-Boot 47 indicates a specific vessel, while U-Boot Type II a particular class, the only U-boats that can be considered true submarines, and submarines, are those that belong to the Type XXI and Type XXIII. During the Second World War, the attacks of the U-boats were the main component of the Battle of the North Eastern, which lasted until the end of the war. During the early stages of the war and immediately after the entry of the United States, the U-boats were extremely effective in the destruction of merchant allies. Improvements in tactical convoys, sonar, the depth charges, the deciphering of the Enigma code used by the Germans and the range of escort aircraft served to turn the fate against the U-boats. At the end of the U-boat fleet suffered extremely heavy losses, losing 789 units (three British submarines captured) of 1157 (of which 25 Allied captured) and about 30,000 sailors on a total of 50.000. The German U-boats and Japanese submarines and Italian sank around

2,828 Allied ships, for a total of about 15 million tons. Between 1939 and 1942 the U-boats also bombed the oil fields of Florida and Americans of many coastal areas causing extensive damage; when the British found a way to decipher Enigma allies were able to predict the movements, yet the Germans did not interrupt the use of U-boats in the Atlantic. During World War II, the Kriegsmarine (German Navy) produced different types of U-boats, as the technology improved. In this volume are indicated in detail the characteristics of all the classes of U-Boot, from Type I to Type XXIII, in addition to the history of the U-boats that made the protagonists during the Second World War.

German U-Boat Losses During World War II Axel Niestlé, 2014-06-30 A deep dive into the fate of German submarines lost during the Second World War. "This has to be the best reference you can find on the subject."—Military Modelling No other publication on this subject comes even close to including the amount of detail provided in this book. An introduction both summarizes previous works on the subject and describes the difficulties of obtaining and verifying information from either the Germans or the Allies on U-boat losses. The main part of the book lists by hull number each U-boat's date of commissioning, its commanding officer, and the date and port of departure for its last patrol. It also gives the date, position, and cause of loss of each submarine, with complete details on Allied units involved in the sinking, the names and ranks of their commanding officers and pilots, and the number of crew killed or rescued. An appendix neatly summarizes data on the disposition of surviving U-boats at the end of the war and provides valuable statistical data on German U-boat losses. "Highly recommended for every serious scholar of the Atlantic war, and every library in naval history and the history of the Second World War."—The Mariner's Mirror "The level of detail is quite impressive and this edition is the result of 16 years of further research since the first edition . . . If you are seeking data on the fate of U-Boats then this book should be your 'first place of call'—no other book has such detailed data."—Military Archive Research

U-Boat Ace Jordan Vause, 2001-11-02 An exceptional figure in the history of the German Navy, Wolfgang Luth was one of only seven men in the Wehrmacht to win Germany's highest combat decoration, the Knight's Cross with Oak Leaves, Swords, and Diamonds. At one time or another he operated in almost every theater of the undersea war, from Norway to the Indian Ocean, and became the second most successful German U-boat ace in World War II, sinking more than 220,000 tons of merchant shipping. A master in the art of military leadership, Luth was the youngest man to be appointed to the rank of captain and the youngest to become commandant of the German Naval Academy. Nevertheless, his accomplishments were overshadowed by those of other great aces, such as Prien, Kretschmer, and Topp. The publication of this book in hardcover in 1990 marked the first comprehensive study of Luth's life. Jordan Vause corrects the long neglect by providing an entertaining and authoritative biography that places the ace in the context of the war at sea. This new paperback edition includes corrections and additional information collected by the author over the past decade.

The Boat Lothar Günther Buchheim, 1975

Seizing the Enigma David Kahn, 2001 The Atlantic in World War II is the setting for the race to break the German U-boat codes and turn the tides of war by the losing British and American navys.

The Official U-Boat Commanders Handbook Bob Carruthers, 2013-01-21 This is the complete wartime translation by the U.S. Navy of the 1943 edition of the official handbook given to all U-boat commanders. The original handbook was compiled from combat reports and was regularly updated throughout the war. The handbook was an invaluable reference for every operational U-boat commander. Simply written and highly accessible for a wider audience, the U-boat handbook attempted to anticipate every possible situation and to advise on suitable tactics. This superb war-time primary source is enhanced by a rare series of photographs taken on an actual combat patrol and published during the time of the Third Reich in the book U-Boot Auf Feindfahrt. Together the handbook and these rare photographs provide a fascinating glimpse into the world of the U-boats from a first hand perspective, and is essential reading for anyone interested in World War II from primary sources.

U-Boats at War in World War I and II Jon Sutherland, Diane Canwell, 2009-11-19 A photographic history of German submarines in the world wars, including unseen images from the personal collections of captains and crew. U-boats were the scourge of the seas for Allied shipping during both world wars, almost bringing Britain to the brink of starvation on several occasions. This book contains unseen photographs taken by German submarine crew and captains during each war. The World War One selection features a submariner's photos of U-25, an early German U-boat. They belonged to WO Friedrich Pohl, who served on U-boats SM-25 and SMU-33. There are many photos of the U-boat itself, crew on deck, and attacks on Norwegian merchant ships with the surface gun. U-25 was launched July 12, 1913, sank a total of twenty-one ships and 14,126 tons, and surrendered to France on February 23, 1919. The World War Two photos include images from an original WW2 U-boat commander's photo album. It belonged to Kapitan Leutnant Herbert Bruninghaus. As a U-boat navigator, he served on the famous U-38 under ace Heinrich Liebe. Bruninghaus later went on to command three U-boats of his own: U-6, U-148, and U-1059. There are also original images from a Kriegsmarine officer's photo album (unfortunately unnamed), including photos of Commander Prien's U-47 returning to Kiel after attacks at Scapa Flow.

Steel Boat, Iron Hearts Hans Goebeler, John Vanzo, 2005-01-19 The story of the German submarine U-505 and its dramatic capture by the US Navy during WWII—told by one of its crewmen. Hans Goebeler is known as the man who "pulled the plug" on U-505 in 1944 to keep his beloved U-boat out of Allied hands. *Steel Boat, Iron Hearts* is his no-holds-barred account of service aboard a combat U-boat. It is the only full-length memoir of its kind, and Goebeler was aboard for every one of U-505's war patrols. Using his own experiences, log books, and correspondence with other U-boat crewmen, Goebeler offers rich and very personal details about what life was like in the German Navy under Hitler. Because his first and last posting was to U-505, Goebeler's perspective of the crew, commanders, and war patrols paints a vivid and complete portrait unlike any other to come out of the Kriegsmarine. He witnessed it all: from deadly sabotage efforts that almost sunk the boat to the tragic suicide of the only U-boat commander who took his life during WWII; from the terror and exhilaration of hunting the enemy to the seedy brothels of France. The vivid, honest, and smooth-flowing prose calls it like it was and pulls no punches. U-505 was captured by Captain Dan Gallery's Guadalcanal Task Group 22.3 on June 4, 1944. Trapped by this "Hunter-Killer" group, U-505 was depth-charged to the surface, strafed by machine gun fire, and boarded. It was the first enemy ship captured at sea since the War of 1812. Today, hundreds of thousands of visitors tour U-505 each year at the Chicago Museum of Science and Industry. Includes photos and a special Introduction

German E-boats 1939–45 Gordon Williamson,2012-04-20 By the outbreak of World War II, Germany had done much to replace the Kaiser's High Seas Fleet, which was scuttled following their surrender at the end of World War I. Forced to build anew, the Kriegsmarine possessed some of the most technically advanced warships in existence. Although the heavy units of the fleet were too small in number to pose much of a threat, Germany was particularly well served by her Navy's smaller vessels, in particular the U-Boats and the S-Boats. Known to the allies as the E-Boats ('Enemy'), they performed sterling duties in the Black Sea and English Channel, where they became a particular scourge.

U-boats Offshore Edwin Palmer Hoyt,1978 We very nealy lost WWII. Not at Pearl Harbor nor in the land battles of Europe, but on our own doorstep. This is the story of what happened in the early days of the war when Nazi U-boats were sent against the East Coast of America.
