Organizational Culture and Leadership Edgar H. Schein, 2010-07-16 Regarded as one of the most influential management books of all time, this fourth edition of Leadership and Organizational Culture transforms the abstract concept of culture into a tool that can be used to better shape the dynamics of organization and change. This updated edition focuses on today's business realities. Edgar Schein draws on a wide range of contemporary research to redefine culture and demonstrate the crucial role leaders play in successfully applying the principles of culture to achieve their organizational goals.

The Adult Learner Malcolm S. Knowles, Elwood F. Holton III, Richard A. Swanson, Petra A. Robinson, 2020-12-21 How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of The Adult Learner has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of The Adult Learner will provide basic instructor aids. For each chapter, there will be a PowerPoint presentation, learning exercises, and added study questions. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.

Engaged Fatherhood for Men, Families and Gender Equality Marc Grau Grau, Mireia las Heras Maestro, Hannah Riley Bowles, 2022 This aim of this open access book is to launch an international, cross-disciplinary conversation on fatherhood engagement. By integrating perspective from three sectors -- Health, Social Policy, and Work in Organizations -- the book offers a novel perspective on the benefits of engaged fatherhood for men, for families, and for gender equality. The chapters are crafted to engaged broad audiences, including policy makers and organizational leaders, healthcare practitioners and fellow scholars, as well as families and their loved ones.

Nonsuicidal Self-Injury E. David Klonsky, Jennifer Muehlenkamp, Stephen P. Lewis, Barent Walsh, 2011-01-01 Nonsuicidal self-injury (NSSI) is a baffling, troubling, and hard to treat phenomenon that has increased markedly in recent years. Key issues in diagnosing and treating NSSI adequately include differentiating it from attempted suicide and other mental disorders, as well as understanding the motivations for self-injury and the context in which it occurs. This accessible and practical book provides therapists and students with a clear understanding of these key issues, as well as of suitable assessment techniques. It then goes on to delineate research-informed treatment approaches for NSSI, with an emphasis on functional assessment, emotion regulation, and problem solving, including motivational interviewing, interpersonal skills, CBT, DBT, behavioral management strategies, delay behaviors, exercise, family therapy, risk management, and

medication, as well as how to successfully combine methods.

Physics of Surfaces and Interfaces Harald Ibach, 2006-11-18 This graduate-level textbook covers the major developments in surface sciences of recent decades, from experimental tricks and basic techniques to the latest experimental methods and theoretical understanding. It is unique in its attempt to treat the physics of surfaces, thin films and interfaces, surface chemistry, thermodynamics, statistical physics and the physics of the solid/electrolyte interface in an integral manner, rather than in separate compartments. It is designed as a handbook for the researcher as well as a study-text for graduate students. Written explanations are supported by 350 graphs and illustrations.

Collect Raindrops Nikki McClure, 2014-03-18 "Gorgeous . . . it's a stroll through winter, spring, summer and fall, as the reader savors her beautifully composed images of nature and family life." —The Seattle Times Gather, Navigate, Welcome, Fortify, Surrender, Save, Listen, Make Mistakes. These are some of the messages renowned artist Nikki McClure affirms in this gorgeous monograph of her paper cuts. Organized by season, these delicate pieces exude an optimism that revolves around community, sustenance, parenting, and appreciating both urban and rural landscapes. McClure's work reminds us of the important things: the change of seasons, slowing down the world for a moment so we can actually taste it, looking up at the stars to dream. This reissue of the 2007 art book includes sixty-four pages of new, breathtaking art. At a smaller trim size than the original, this volume makes the perfect gift. "Absolutely beautiful in its entirety." —Brain Pickings

Meticulous, accurate notes provide detailed descriptions for the dazzling array of apparel.

Home Carson Ellis, 2015-02-24 A whimsical tribute to the different types of homes depicting them in real-world environments as well as fantastical settings.

Edible Insects Arnold van Huis, Food and Agriculture Organization of the United Nations, 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body of research on issues such as insect nutrition and food safety, the use of insects as animal feed, and the processing and preservation of insects and their products. It highlights the need to develop a regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of stakeholders. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

The SAFER-R Model George Everly, Jr., 2017-04 Psychological Crisis Intervention: The SAFER-R Model is designed to provide the reader with a simple set of guidelines for the provision of psychological first aid (PFA). The model of psychological first aid (PFA) for individuals presented in this volume is the SAFER-R model developed by the authors. Arguably it is the most widely used tactical model of crisis intervention in the world with roughly 1 million individuals trained in its

operational and derivative guidelines. This model of PFA is not a therapy model nor a substitute for therapy. Rather it is designed to help crisis interventionists stabilize and mitigate acute crisis reactions in individuals, as opposed to groups. Guidelines for triage and referrals are also provided. Before plunging into the step-by-step guidelines, a brief history and terminological framework is provided. Lastly, recommendations for addressing specific psychological challenges (suicidal ideation, resistance to seeking professional psychological support, and depression) are provided.

Reducing Environmental Cancer Risk Suzanne H. Reuben, 2010-10 Though overall cancer incidence and mortality have continued to decline in recent years, cancer continues to devastate the lives of far too many Americans. In 2009 alone, 1.5 million American men, women, and children were diagnosed with cancer, and 562,000 died from the disease. There is a growing body of evidence linking environmental exposures to cancer. The Pres. Cancer Panel dedicated its 2008-2009 activities to examining the impact of environmental factors on cancer risk. The Panel considered industrial, occupational, and agricultural exposures as well as exposures related to medical practice, military activities, modern lifestyles, and natural sources. This report presents the Panel's recommendations to mitigate or eliminate these barriers. Illus.

Overshoot William R. Catton, 1980-10-01 Our day-to-day experiences over the past decade have taught us that there must be limits to our tremendous appetite for energy, natural resources, and consumer goods. Even utility and oil companies now promote conservation in the face of demands for dwindling energy reserves. And for years some biologists have warned us of the direct correlation between scarcity and population growth. These scientists see an appalling future riding the tidal wave of a worldwide growth of population and technology. A calm but unflinching realist, Catton suggests that we cannot stop this wave - for we have already overshoot the Earth's capacity to support so huge a load. He contradicts those scientists, engineers, and technocrats who continue to write optimistically about energy alternatives. Catton asserts that the technological panaceas proposed by those who would harvest from the seas, harness the winds, and farm the deserts are ignoring the fundamental premise that the principles of ecology apply to all living things. These principles tell us that, within a finite system, economic expansion is not irreversible and population growth cannot continue indefinitely. If we disregard these facts, our sagging American Dream will soon shatter completely.

Cognitive Therapy of Anxiety Disorders David A. Clark, Aaron T. Beck, 2011-08-10 - Winner of the American Journal of Nursing Book of the Year Award - Mental Health Nursing! Aaron T. Beck - Winner of the Lifetime Achievement Award from the National Nursing Centers Consortium! Updating and reformulating Aaron T. Beck's pioneering cognitive model of anxiety disorders, this book is both authoritative and highly practical. The authors synthesize the latest thinking and empirical data on anxiety treatment and offer step-by-step instruction in cognitive assessment, case formulation, cognitive restructuring, and behavioral intervention. They provide evidence-based mini-manuals for treating the five most common anxiety disorders: panic disorder, social phobia, generalized anxiety disorder, obsessive-compulsive disorder, and posttraumatic stress disorder. User-friendly features include vivid case examples, concise Clinician Guidelines that reinforce key points, and over three dozen reproducible handouts and forms.

Education System Design Brian Hudson, Marilyn Leask, Sarah Younie, 2020-11-26 This book highlights decisions governments have to make about their public education systems, the options they have before them and the consequences of their decisions. As well as covering issues such as values, curriculum, teacher training, structures and so on, the book addresses education planning for epidemics, pandemics and disasters. Education systems provide the foundations for the future wellbeing of every society, yet existing systems are a point of global concern. Education System Design is a response to debates in developing and developed countries about the characteristics of a

high-quality national education service. It questions what makes a successful system of education. With chapters that draw on experience in education systems around the world, each one considers an element of a national education service and its role in providing a coherent and connected set of structures to ensure good education for all members of society. Key topics include: Existing education systems and what a future system might look like Inclusion and social justice Leadership and teacher education Policy options, and the consequences of policy changes This book suggests an education system be viewed as an ecosystem with interdependencies between many different components needing to be considered when change is contemplated. It is a vital book for any stakeholders in educational systems including students, teachers and senior leaders. It would be particularly useful to policy makers and those implementing policy changes.

Character Strengths and Virtues Christopher Peterson, Martin E. P. Seligman, 2004-04-08
Character has become a front-and-center topic in contemporary discourse, but this term does not have a fixed meaning. Character may be simply defined by what someone does not do, but a more active and thorough definition is necessary, one that addresses certain vital questions. Is character a singular characteristic of an individual, or is it composed of different aspects? Does character--however we define it--exist in degrees, or is it simply something one happens to have? How can character be developed? Can it be learned? Relatedly, can it be taught, and who might be the most effective teacher? What roles are played by family, schools, the media, religion, and the larger culture? This groundbreaking handbook of character strengths and virtues is the first progress report from a prestigious group of researchers who have undertaken the systematic classification and measurement of widely valued positive traits. They approach good character in terms of separate strengths--authenticity, persistence, kindness, gratitude, hope, humor, and so on--each of which exists in degrees. Character Strengths and Virtues classifies twenty-four specific strengths under six broad virtues that consistently emerge across history and culture: wisdom, courage, humanity, justice, temperance, and transcendence. Each strength is thoroughly examined in its own chapter, with special attention to its meaning, explanation, measurement, causes, correlates, consequences, and development across the life span, as well as to strategies for its deliberate cultivation. This book demands the attention of anyone interested in psychology and what it can teach about the good life.

Feminism and the Politics of Childhood Rachel Rosen, Katherine Twamley, 2018-02-22
Feminism and the Politics of Childhood offers an innovative and critical exploration of perceived commonalities and conflicts between women and children and, more broadly, between various forms of feminism and the politics of childhood. This unique collection of 18 chapters brings into dialogue authors from a range of geographical contexts, social science disciplines, activist organisations, and theoretical perspectives. The wide variety of subjects include refugee camps, care labour, domestic violence and childcare and education. Chapter authors focus on local contexts as well as their global interconnections, and draw on diverse theoretical traditions such as poststructuralism, psychoanalysis, posthumanism, postcolonialism, political economy, and the ethics of care. Together the contributions offer new ways to conceptualise relations between women and children, and to address injustices faced by both groups. Praise for *Feminism and the Politics of Childhood: Friends or Foes?* 'This book is genuinely ground-breaking.' – Val Gillies, University of Westminster
'Feminism and the Politics of Childhood: Friends or Foes?' asks an impossible question, and then casts prismatic light on all corners of its impossibility.' – Cindi Katz, CUNY 'This provocative and stimulating publication comes not a day too soon.' – Gerison Lansdown, Child to Child 'A smart, innovative, and provocative book.' – Chandra Talpade Mohanty, Syracuse University 'This volume raises and addresses issues so pressing that it is surprising they are not already at the heart of scholarship.' – Ann Phoenix, UCL
