Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

**From Cave Man to Cave Martian** Manfred "Dutch" von Ehrenfried, 2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a "Short Stay" Opposition Class mission to Mars as the first mission rather than the "Long Stay" concept requiring a mission that is too long, too dangerous and too costly for man's first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

Hand-drawn Perspectives and Sketches , 2021-05-14 ARCHITECTURAL RENDERING: HAND-DRAWN PERSPECTIVES & SKETCHES is a unique book in the form of a compendium of 412 hand-drawn perspectives, sketches, isometrics, axonometrics, paintings and posters collected personally from 27 renowned architects and artists. These drawings have been selected to represent as many styles, types, periods, and regions as possible. The architects and artists whose works have been included in this treatise belong to countries like India, Italy, Kenya, Peru, and the United

States of America. They represent about four generations of illustrators - the eldest one was born in 1910 and the youngest one is 1995-born. This range covers a period of almost a century and thus is witness to the many styles and changing trends in architectural rendering. It is hoped that the drawings featured in this book are sufficient to inspire young minds to adopt, adapt and continue the trend of hand-drawn perspectives, sketches, and paintings. The drawings featured in this book are grouped into four Sections. These include: Graphic Section-1: PERSPECTIVES (224 drawings) Graphic Section-2: SKETCHES (108 drawings) Graphic Section-3: ISOMETRICS and AXONOMETRICS (34 drawings) Graphic Section-4: PAINTINGS and POSTERS (46 drawings) The book was conceived of and is presented as a reference book for the use of architects, artists, painters, sketchers, sculptors, and students of these related disciplines.
