Star Wars and the History of Transmedia Storytelling Sean Guynes, Dan Hassler-Forest, 2018 Star Wars has reached more than three generations of casual and hardcore fans alike, and as a result many of the producers of franchised Star Wars texts (films, television, comics, novels, games, and more) over the past four decades have been fans-turned-creators. Yet despite its dominant cultural and industrial positions, Star Wars has rarely been the topic of sustained critical work. Star Wars and the History of Transmedia Storytelling offers a corrective to this oversight by curating essays from a wide range of interdisciplinary scholars in order to bring Star Wars and its transmedia narratives more fully into the fold of media and cultural studies. The collection places Star Wars at the center of those studies' projects by examining video games, novels and novelizations, comics, advertising practices, television shows, franchising models, aesthetic and economic decisions, fandom and cultural responses, and other aspects of Star Wars and its world-building in their multiple contexts of production, distribution, and reception. In emphasizing that Star Wars is both a media franchise and a transmedia storyworld, Star Wars and the History of Transmedia Storytelling demonstrates the ways in which transmedia storytelling and the industrial logic of media franchising have developed in concert over the past four decades, as multinational corporations have become the central means for subsidizing, profiting from, and selling modes of immersive storyworlds to global audiences. By taking this dual approach, the book focuses on the interconnected nature of corporate production, fan consumption, and transmedia world-building. As such, this collection grapples with the historical, cultural, aesthetic, and political-economic implications of the relationship between media franchising and transmedia storytelling as they are seen at work in the world's most profitable transmedia franchise.

**Critical Genre Analysis** Vijay K. Bhatia,2016-11-18 Genre theory has focused primarily on the analysis of generic constructs, with increasing attention to and emphasis on the contexts in which such genres are produced, interpreted, and used to achieve objectives, often giving the impression as if producing genres is an end in itself, rather than a means to an end. The result of this focus is that there has been very little attention paid to the ultimate outcomes of these genre-based discursive activities, which are more appropriately viewed as academic, institutional, organizational, and professional actions and practices, which are invariably non-discursive, though often achieved through discursive means. It was this objective in mind that the book develops an approach to a more critical and deeper understanding of interdiscursive professional voices and actions. Critical Genre Analysis as a theory of discursive performance is thus an attempt to be as objective as possible, rigorous in analytical endeavour, using a multiperspective and multidimensional methodological framework taking into account interdiscursive aspects of genre construction to make it increasingly explanatory to demystify discursive performance in a range of professional contexts.

Research Questions in Language Education and Applied Linguistics Hassan Mohebbi, Christine Coombe, 2022-01-13 This volume encompasses the range of research questions on language-related problems that arise in language teaching, learning and assessment. The [150] chapters are written by experts in the field who each offer their insights into current and future directions of research, and who suggest several highly relevant research questions. Topics include, but are not limited to: language skills teaching, language skills assessment and testing, measurement, feedback, discourse analysis, pragmatics, semantics, language learning through technology, CALL, MALL, ESP, EAP, ERPP, TBLT, materials development, genre analysis, needs analysis, corpus, content-based language teaching, language teaching and learning strategies, individual differences, research methods, classroom research, form-focused instruction, age effects, literacy, proficiency, and teacher education and teacher development. The book serves as a reference and offers inspiration to researchers and students in language education. An important skill in reviewing the research literature is following a study's "plan of attack." Broadly, this means that before accepting and acting upon the findings, one considers a) the research question (Is it clear and focused? Measurable?), b) the subjects examined, the methods deployed, and the measures chosen (Do they fit the study's goal and have the potential to yield useful results?), and c) the analysis of the data (Do the data lead to the discussion presented? Has the author reasonably interpreted results to reach the conclusion?). Mohebbi and Coombe's book, Research Questions in Language Education and Applied Linguistics: A Reference Guide, helps budding researchers take the first step and develop a solid research question. As the field of language education evolves, we need continual research to improve our instructional and assessment practices and our understanding of the learners' language learning processes. This book with its remarkable 150 topics and 10 times the number of potential research questions provides a wealth of ideas that will help early career researchers conduct studies that move our field forward and grow our knowledge base. Deborah J. Short, Ph.D., Director, Academic Language Research & Training, Past President, TESOL International Association (2021-22) As a teacher in graduate programs in TESOL I frequently come across the frustration of students at centering their research interests on a particular topic and developing research guestions which are worth pursuing so as to make a contribution to the field. This frustration stems from the fact that our field is so vast and interrelated, that it is often impossible to properly address all that interests them. Hence, I wholeheartedly welcome this most relevant and innovative addition to the research literature in the field of TESOL and Applied Linguistics. Coombe and Mohebbi have created a real tour de force that stands to inform budding researchers in the field for many years to come. Additionally, the cutting-edge depiction of the field and all it has to offer will no doubt update the research agendas of many seasoned researchers around the world. The 150 chapters are organized in a most powerful, yet, deceptively simple way offering a positioning within the topic, suggesting questions that might direct inquiry and offering a basic set of bibliographic tools to start the reader in the path towards research. What is more, the nine sections in which the chapters are organized leave no area of the field unexplored. Dr. Gabriel Díaz Maggioli, Academic Advisor, Institute of Education, Universidad ORT del Uruguay, President, IATEFL

**Digital Genres in Academic Knowledge Production and Communication** María José Luzón, Carmen Pérez-Llantada, 2022-03-07 This book presents an overview of the wide variety of digital genres used by researchers to produce and communicate knowledge, perform new identities and evaluate research outputs. It explores the role of digital genres in the repertoires of genres used by local communities of researchers to communicate both locally and globally, both with experts and the interested public, and sheds light on the purposes for which researchers engage in digital communication and on the semiotic resources they deploy to achieve these purposes. The authors discuss the affordances of digital genres but also the challenges that they pose to researchers who engage in digital communication. The book explores what researchers can do with these genres, what meanings they can make, who they interact with, what identities they can construct and what new relations they establish, and, finally, what language(s) they deploy in carrying out all these practices.

**Translation and Contemporary Art** MaCarmen África Vidal Claramonte,2022-03-01 This book looks to expand the definition of translation in line with Susan Bassnett and David Johnston's notion of the "outward turn", applying this perspective to contemporary art to broaden the scope of how we understand translation in today's global multisemiotic world. The book takes as its point of departure the idea that texts are comprised of not only words but other semiotic systems and therefore expanding our notions of both language and translation can better equip us to translate stories told via non-traditional means in novel ways. While the "outward turn" has been analyzed in literature, Vidal directs this spotlight to contemporary art, a field which has already engaged in disciplinary connections with Translation Studies. The volume highlights how the unpacking of such connections between disciplines encourages engagement with contemporary social issues, around identity, power, migration, and globalization, and in turn, new ways of thinking and bringing about wider cultural change. This innovative book will be of interest to scholars in translation studies and contemporary art.

**The Orientalist Semiotics of »Dune«** Frank Jacob,2022-03-30 Frank Herbert's »Dune« (1965) is considered to be one of the most successful Science Fiction novels of the 20th century. It introduces its readers to a future universe, in which the production of the most valuable resource of the universe - >spice< - is only possible on one vast desert planet called Arrakis. »Dune« offers many different motifs, including a hero that eventually turns into a superhuman being. However, the novel is also rich of orientalist semiotics and relates to a sign system existent when Herbert wrote his book. Frank Jacob discusses these semiotics in detail and shows how much of »Lawrence of Arabia« is present in the story's plot.

**Aesthetic Justice** Zoe Beloff,2015 In a world ruled by seemingly continuous and increasingly complex conflicts, questions about justice, about 'the right' course of action, are at the forefront of artistic investigation. In Aesthetic Justice sociologist Pascal Gielen and curator Niels Van Tomme invite a variety of artists and critical thinkers to reflect on new futures for the notion and practice of justice. Launching the proposition of 'aesthetic justice', the book offers thought-provoking views on how works of art can confront, and potentially redirect social and political imaginaries. Using analyses of contemporary art works that challenge the social, political, or economic status quo, as well as theoretical reflections and interviews with artists, this book imagines alternatives for a more just future.

Stuffocation James Wallman, 2015-03-17 Stuffocation is a movement manifesto for "experiential" living, a call to arms to stop accumulating stuff and start accumulating experiences, and a road map for a new way forward with the potential to transform our lives. Reject materialism. Embrace experientialism. Live more with less. Stuffocation is one of the most pressing problems of the twenty-first century. We have more stuff than we could ever need, and it isn't making us happier. It's bad for the planet. It's cluttering up our homes. It's making us stressed—and it might even be killing us. A rising number of us are already turning our backs on all-youcan-get consumption. We are choosing access over ownership, and taking our business to companies like Zipcar, Spotify, and Netflix. Fed up with materialism, we are ready for a new way forward. Trend forecaster James Wallman traces our obsession with stuff back to the original Mad Men, who first created desire through advertising. He interviews anthropologists studying the clutter crisis, economists searching for new ways of measuring progress, and psychologists who link stuffocation to declining well-being. And he introduces us to the innovators who are already living more consciously and with more meaning by choosing experience over stuff. Experientialism does not mean giving up all of our possessions. It is a solution that is less extreme but equally fundamental. It's about transforming what we value. Stuffocation is a paradigm-shifting look at our habits and an inspiring call for living more with less. It's the one important book you won't be able to live without. Praise for Stuffocation "The revelations come fast and furious as he asserts that acquiring 'stuff' is often just an easy way to ignore the tougher questions of life, dodging 'why am I here?' and 'how should I live?' for 'will that go with the top I bought last week?' Tart and often funny . . . [Stuffocation] will be an eye-opener for those long ago persuaded that more is better. A scintillating read that will provoke conversation (or at least closet cleaning)."—Booklist "James Wallman deftly hits upon a major insight for our times: that acquiring 'stuff' and 'things' is not nearly as meaningful as collecting experiences. Some of the happiest days of my life were when I had nothing and lived on a houseboat. Without stuff to tie me down, I felt completely free."—Blake Mycoskie, founder of TOMS and author of the New York Times bestseller Start Something That Matters "A must-read . . . We think that more stuff will make us happier, but as the book nicely shows, we're just plain wrong. A great mix of stories and science, Stuffocation reveals the downside of more, and what we can do about it."—Jonah Berger, author of the New York Times bestseller Contagious "Wallman offers a deeply important message by weaving contemporary social science into very engaging stories. Reading the book is such a pleasure that you hardly recognize you're being told that you should change how you live your life."—Barry Schwartz, author of The Paradox of Choice "With a sociologist's eye and a storyteller's ear, Wallman takes us on a tour of today's experience economy from the perspective not of businesses, nor even of consumers per se, but of everyday people."—B. Joseph Pine II and James H. Gilmore, authors of The Experience Economy

Chronology of Twentieth-Century History: Business and Commerce Frank N. Magill,2014-04-23 First Published in 2004. Volume II provides the hard facts and the history behind the headlines; significant 20th-century events in the evolution of all aspects of business and commerce are described in chronologically-arranged articles. The text of each article is divided into two sections: Summary of the Event describes the event itself and the circumstances leading up to it, and Impact of the Event analyzes the influence of the event on the evolution of business practice or on a major industry in both the short and long terms. Each article concludes with a fully annotated Bibliography.

**War and Semiotics** Frank Jacob, 2020-12-28 Wars create their own dynamics, especially with regard to images and language. The semiotic and semantic codes are redefined, according to the need to create an enemy image, or in reference to the results of a war that are post-event defined as just or reasonable. The semiotic systems of wars are central to the discussion of the contributions within this volume, which highlight the interrelationship of semiotic systems and their constructions during wars in different periods of history.

Cross-cultural Genre Analysis Danni Yu,2021-12 This unique monograph provides a theoretical and methodological account on how to do cross-cultural genre analysis with the aids of corpus tools. Cross-cultural genre analysis investigates how discourse communities from different cultural backgrounds use language to realize a particular genre. It can shed light on genre nature as well as cultural specificities. The book suggests five specific approaches in doing cross-cultural genre analysis: Investigating genre context; Approaching genre complexity; Exploring genre nature; Exploring culture specificity; and Focusing on specific communicative functions. Each of these approaches is illustrated and demonstrated in a specific chapter with practical analyses of the genre of CSR reports. Covering linguistic analysis of CSR reports in three languages: Chinese, English, and Italian, Yu provides insights into implications for both genre theories and CSR communication practice. By applying the cross-cultural perspective in corporate discourse analysis, her book demonstrates how the approach of cross-cultural genre analysis is fruitful and valuable in providing practical insights into the textual practice of CSR reporting in a globalized context. Moreover, in the final parts of the book, Yu illustrates how cross-cultural genre analysis can be applied in the didactic field of writing, translation, and cross-cultural studies. This volume is a valuable reference to scholars of genre analysis, corpus-based studies, cross-cultural studies and corporate communication. Moreover, it is also useful for professionals involved in compiling CSR reports. Armed with the knowledge imparted in this book, the reader should be able to analyse other genres from a cross-cultural perspective. In particular, instructions on how to use specific corpus tools are provided in the appendices, which can give scholars basic technical knowledge to approach the field of cross-cultural genre analysis--

The Daffodil Principle Jaroldeen Edwards, 2004 Every year, high in the San Bernadino mountain range of Southern California, five acres of beautiful daffodils burst into bloom. Amazingly, this special spot, known as The Daffodil Garden, was planted by one person, one bulb at a time, over a period of thirty-five years. Since The Daffodil Principle was first published, the story has gained international popularity and has been retold innumerable times. Available now for the first time as an illustrated gift book featuring vibrant artwork by Anne Marie Oborn, this story will touch your heart with its simple message: Start today, one step at a time, to change your world.

Biosemiotic Literary Criticism W. John Coletta, 2021-08-24 This volume is based to a large extent on the understanding of biosemiotic literary criticism as a semiotic-model-making enterprise. For Jurij Lotman and Thomas A. Sebeok, "nature writing is essentially a model of the relationship between humans and nature" (Timo Maran); biosemiotic literary criticism, itself a form of nature writing and thus itself an ecological-niche-making enterprise, will be considered to be a model of modeling, a model of nature naturing. Modes and models of analysis drawn from Thomas A. Sebeok and Marcel Danesi's Forms of Meaning: Modeling Systems Theory and Semiotic Analysis as well as from Timo Maran's work on "modeling the environment in literature," Edwina Taborsky's writing on Peircean semiosis, and, of course, Jesper Hoffmeyer's formative work in biosemiotics are among the most important organizing elements for this volume.

Has China Won? Kishore Mahbubani,2020-03-31 The defining geopolitical contest of the twenty-first century is between China and the US. But is it avoidable? And if it happens, is the outcome already inevitable? China and America are world powers without serious rivals. They eye each other warily across the Pacific; they communicate poorly; there seems little natural empathy. A massive geopolitical contest has begun. America prizes freedom; China values freedom from chaos. America values strategic decisiveness; China values patience. America is becoming society of lasting inequality; China a meritocracy. America has abandoned multilateralism;

China welcomes it. Kishore Mahbubani, a diplomat and scholar with unrivalled access to policymakers in Beijing and Washington, has written the definitive guide to the deep fault lines in the relationship, a clear-eyed assessment of the risk of any confrontation, and a bracingly honest appraisal of the strengths and weaknesses, and superpower eccentricities, of the US and China.

The Cynics R. Bracht Branham, Marie-Odile Goulet-Cazé, 2023-07-28 This collection of essays—the first of its kind in English—brings together the work of an international group of scholars examining the entire tradition associated with the ancient Cynics. The essays give a history of the movement as well as a state-of-the-art account of the literary, philosophical and cultural significance of Cynicism from antiquity to the present. Arguably the most original and influential branch of the Socratic tradition, Cynicism has become the focus of renewed scholarly interest in recent years, thanks to the work of Sloterdijk, Foucault, and Bakhtin, among others. The contributors to this volume—classicists, comparatists, and philosophers—draw on a variety of methodologies to explore the ethical, social and cultural practices inspired by the Cynics. The volume also includes an introduction, appendices, and an annotated bibliography, making it a valuable resource for a broad audience.
