K is for Knifeball Avery Monsen, Jory John, 2012-09-14 An adult parody of children's alphabet books, offering horrible—but hilarious—advice, from the authors of All my friends are dead. In the

humorous vein of Go the F**k to Sleep comes a laugh-out-loud collection of bad advice that turns the children's alphabet book on its head. Adorable, illustrated characters lead readers down a path of poor decision-making, and alphabetical, rhyming couplets offer terrible life lessons. O is for opening things with your teeth, F is for setting Daddy's wallet on fire, and R is for Raccoon (but definitely not for rabies). With plenty of playfully disastrous choices lurking around every corner, this compendium of black humor may be terrible for actual children, but it's perfect for the common-senseless child in all adults. Plus, this is the fixed-format version, which looks nearly identical to the physical book. Praise for K is for Knifeball "Great fun for adults. The humorous illustrations, done in the style common in kids books, greatly add to the fun." —Geek Alerts

The Dawn of Modern Korea Andreï Nikolaevich Lan'kov, 2007 The 20th century was a time of great changes for any country, but in Korea these changes were especially dramatic. In 1960, it was one of the world's poorest countries. By 2000 it transformed itself into one of the world's largest economies. This astonishing transformation completely changed Koreans' daily life as well. This book describes how small but essential things have changed over the last century, and how new technology and ideas arrived in Korea for the first time. Within the last century photographs, newspapers, movies, restaurants, electric lights, cars (as well as accidents caused by them), subways, and so many other things appeared in Korea. In this book, the author details how these modern things changed the centuries-old ways of Korean life. -- BACK COVER.

Shadow Education and the Curriculum and Culture of Schooling in South Korea Young Chun Kim, 2016-09-23 This book enables Western scholars and educators to recognize the roles and contributions of shadow education/hakwon education in an international context. The book allows readers to redefine the traditional and limited understanding of the background success behind Korean schooling and to expand their perspectives on Korean hakwon education, as well as shadow

education in other nations with educational power, such as Japan, China, Singapore, and Taiwan. Kim exhorts readers and researchers to examine shadow education as an emerging research inquiry in the context of postcolonial and worldwide curriculum studies.

Biological Learning and Control Reza Shadmehr, Sandro Mussa-Ivaldi, 2012-01-27 A novel theoretical framework that describes a possible rationale for the regularity in how we move, how we learn, and how our brain predicts events. In *Biological Learning and Control*, Reza Shadmehr and Sandro Mussa-Ivaldi present a theoretical framework for understanding the regularity of the brain's perceptions, its reactions to sensory stimuli, and its control of movements. They offer an account of perception as the combination of prediction and observation: the brain builds internal models that describe what should happen and then combines this prediction with reports from the sensory system to form a belief. Considering the brain's control of movements, and variations despite biomechanical similarities among old and young, healthy and unhealthy, and humans and other animals, Shadmehr and Mussa-Ivaldi review evidence suggesting that motor commands reflect an economic decision made by our brain weighing reward and effort. This evidence also suggests that the brain prefers to receive a reward sooner than later, devaluing or discounting reward with the passage of time; then as the value of the expected reward changes in the brain with the passing of time (because of development, disease, or evolution), the shape of our movements will also change. The internal models formed by the brain provide the brain with an essential survival skill: the ability to predict based on past observations. The formal concepts presented by Shadmehr and Mussa-Ivaldi offer a way to describe how representations are formed, what structure they have, and how the theoretical concepts can be tested.
