Deus Ex James Swallow,2011 IT'S NOT THE END OF THE WORLD. BUT YOU CAN SEE IT FROM HERE. In the near future, with physical augmentation gaining ground and nano-cybernetics only years away, the dawn of limitless human evolution is just beyond the horizon, and a secret corporate cabal of ruthless men intends to make sure that humankind stays under its control. But two people on opposite sides of the world are starting to ask questions that could get them killed. Secret Service agent Anna Kelso has been suspended for investigating the shooting that claimed her partner's life. Anna suspects that the head of a bio-augmentation firm was the real target, and against orders she's turned up a few leads concerning a covert paramilitary force and a cadre of underground hackers. But the cover-up runs deep, and now there's a target on her back. Meanwhile, Ben Saxon, former SAS officer turned mercenary, joins a shadowy special ops outfit. They say they're a force for good, but Saxon quickly learns that the truth is not so clear-cut. So begins a dangerous quest to uncover a deadly secret that will take him from Moscow to London, D.C. to Geneva, and to the dark truth--if he lives that long. The year is 2027; in a world consumed by chaos and conspiracy, two people are set on a collision course with the most powerful and dangerous organization in history--and the fate of humanity hangs in the balance.

Deus Ex: Black Light (Deus Ex: Mankind Divided prequel) James Swallow,2016-08-23 ILLUMINATE THE SHADOWS The year is 2029, and the shining promise of a new age of human augmentation is in ruins in the wake of the devastating 'Aug Incident' - a horrific catastrophe triggered by a cabal of shadowy power brokers, where millions of cybernetically-enhanced people suffered a forced psychotic break. Awakening in the aftermath of a changed world, with gaps in his memories and suspicion on all sides, augmented ex-cop and former security operative Adam Jensen struggles to piece his life back together, in a new reality where 'Aug's' have become the targets of hatred, fear and violent discrimination. Now the dark forces behind the Incident are gathering once again, reaching out to manipulate the course of global events through terror and intimidation. To find the answers that he seeks and the people who destroyed everything he knew, Jensen must return to the ashes of the past, reconnect with old allies, and risk all to expose a deadly conspiracy - but in a world shattered by secrets, can the truth be brought into the light? A brand-new official Deus Ex novel, bridging events between Deus Ex: Human Revolution and the brand-new game Deus Ex: Mankind Divided.

Engaging with Videogames: Play, Theory and Practice Dawn Stobbart,Monica Evans,2019-01-04 This volume was first published by Inter-Disciplinary Press in 2014. Engaging with Videogames focuses on the multiplicity of lenses through which the digital game can be understood, particularly as a cultural artefact, economic product, educational tool, and narrative experience. Game studies remains a highly interdisciplinary field, and as such tends to bring together scholars and researchers from a wide variety of fields and analytical practices. As such, this volume includes explorations of videogames from the fields of literature, visual art, history, classics, film studies, new media studies, phenomenology, education, philosophy, psychology, and the social sciences, as well as game studies, design, and development. The chapters are organised thematically into four sections focusing on educational game practices, videogame cultures, videogame theory, and the practice of critical analysis. Within these chapters are explorations of sexual identity and health, videogame history, slapstick, player mythology and belief systems, gender and racial ideologies, games as a 'body-without organs,' and controversial games from Mass Effect 3 to Raid over Moscow. This volume aims to inspire further research in this rapidly evolving and expanding field.

What the Koran Really Says Ibn Warraq,2010-10-29 This excellent collection of critical commentaries on the Koran brings together outstanding articles by noted scholars from the beginning of the 20th century to recent times. These important studies, as well as the editor's own lengthy introduction, show that little about the text of the Koran can be taken at face value. Among the fascinating topics discussed is evidence that early Muslims did not understand Muhammad's original revelation, that the ninth-century explosion of literary activity was designed to organize and make sense of an often incoherent text, and that much of the traditions surrounding Muhammad's life were fabricated long after his death in an attempt to give meaning to the Koran. Also of interest are suggestions that Coptic and other Christian sources heavily influenced much of the text and that some passages reflect an essential background reaching back to the community of the Dead Sea Scrolls. This valuable compilation will be a welcome resource to interested lay readers and scholars alike.

The Routledge Companion to Cyberpunk Culture Anna McFarlane,Lars Schmeink,Graham Murphy,2019-11-28 In this companion, an international range of contributors examine the cultural formation of cyberpunk from micro-level analyses of example texts to macro-level debates of movements, providing readers with snapshots of cyberpunk culture and also cyberpunk as culture. With technology seamlessly integrated into our lives and our selves, and social systems veering towards globalization and corporatization, cyberpunk has become a ubiquitous cultural formation that dominates our twenty-first century techno-digital landscapes. The Routledge Companion to Cyberpunk Culture traces cyberpunk through its historical developments as a literary science fiction form to its spread into other media such as comics, film, television, and video games. Moreover, seeing cyberpunk as a general cultural practice, the Companion provides insights into photography, music, fashion, and activism. Cyberpunk, as the chapters presented here argue, is integrated with other critical theoretical tenets of our times, such as posthumanism, the Anthropocene, animality, and empire. And lastly, cyberpunk is a vehicle that lends itself to the rise of new futurisms, occupying a variety of positions in our regionally diverse reality and thus linking, as much as differentiating, our perspectives on a globalized technoscientific world. With original entries that engage cyberpunk's diverse 'angles' and its proliferation in our life worlds, this critical reference will be of significant interest to humanities students and scholars of media, cultural studies, literature, and beyond.

The State and the Tributary Mode of Production John F. Haldon,1993 In this groundbreaking critique of both traditional and Marxist notions of feudalism and of the pre-capitalist state, John Haldon considers the configuration of state and social relations in medieval Europe and Mughal India as well as in Byzantium and the Ottoman Empire. He argues that a Marxist reading of the pre-capitalist state can take account of the autonomy of power relations and avoid economic reductionism while still focusing on the forms of tribute which sustained the ruling power. Haldon explores the conflicts to which these gave rise and shows the Ottoman state elite, often held to be a clear example of independence from underlying social relations, to be deeply enmeshed in economic relationships and the extraction of tribute. Haldon argues that feudalism was the specifically European form of a much more widely diffused tributary mode, whose characteristic social relations and structural constraints can be seen at work in the Byzantine, Ottoman and Mughal empires as well. While acknowledging the range of ideological and cultural variation within and between these examples of the tributary mode, Haldon denies the thesis that such "superstructural" variations themselves yielded fundamentally contrasting social relations.

Memoirs of a Spacewoman Naomi Mitchison,Isobel Murray,2011 Naomi Mitchison, daughter of a distinguished scientist, sister of geneticist J B S Haldane, was always interested in the sciences, especially

genetics. Her novels did not tend to demonstrate this, and she did not publish a Science Fiction novel until almost forty years into her fiction-writing career. Isobel Murray's Introduction here argues that it is by no means 'pure' Science Fiction: the success of the novel depends not only on the extraordinarily variety of life forms its heroine encounters and attempts to communicate with on different worlds: she is also a very credible human, or Terran, with recognisibly human emotions and a dramatic emotional life. This novel works effectively for readers who usually eschew the genre and prefer more traditional narratives. Explorers like Mary are an elite class who consider curiosity to be Terrans' supreme gift, and in the novel she more than once takes risks that may destroy her life. Her voice, as she records her adventures and experiments, is individual, attractive and memorable. Isobel Murray is Emeritus Professor of Modern Scottish Literature at the University of Aberdeen.

Afghanistan and Central Asia Martin Mccauley,2016-04-29 The Afghan crisis has grabbed the attention of the entire world, and underlined the desperate need in the West for a better understanding of the region and its challenges in the face of increasingly militant interpretations of Islam. Carved up and fought over by the British and Tsarist Russia in the nineteenth century, and under Soviet domination for much of the twentieth, the lonely passes, deserts and peoples of the five Central Asian republics have remained shrouded in obscurity. Even Afghanistan, the site of almost constant conflict since the Soviet invasion of 1978, is little known beyond the media images of the Islamic fundamentalist Taliban movement. Martin McCauley draws on his vast knowledge of the region and its history to provide a clear and highly readable account of Afghanistan and the Central Asian republics of Kazakhstan, Kyrgyzstan, Tasikistan, Turkmenistan, Uzbekistan, from their medieval pasts to the unpredictable present. Illuminating languages and landscapes, cultures and society, he examines the rise of militant Islam and its impact on the region, the push and pull of global economics and politics, and possibilities for stability in an inherently unstable part of the world.

The Life and Pontificate of Leo the Tenth William Roscoe,
Spun yarn John Masefield,2011 'I must down to the seas again, to the lonely sky and sea' John Masefield was sent to join a training ship at a young age, his aunt hoping the experience would cure him of his addiction to books. Instead, Masefield was to become one of the greatest writers on life at sea. In this collection of short stories, extracts from novels, poetry (including 'Sea-Fever' and 'Cargoes' which Betjeman said 'will be remembered as long as the language lasts') and autobiography, he writes of the hardship, romance and adventure of seafaring with a sailor's way with language and sense of a good yarn- of life in dock and on the swelling seas, of salt spray, mutiny, great storms, the spirits beneath the waves, and the devil and Davy Jones playing dice for souls. This edition includes an introduction by Philip W. Errington on Masefield's reputation, his mistreatment of his own youthful work, and his conflicted attitude to his colourful life story. It also includes a chronology, further reading and notes. Edited with an introduction and notes by Philip W. Errington
