How to Change Your Mind Michael Pollan, 2019-05-14 Now on Netflix as a 4-part documentary series! "Pollan keeps you turning the pages . . . cleareyed and assured." –New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's mental travelogue is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.

Science And Human Behavior B.F Skinner, 2012-12-18 The psychology classic—a detailed study of scientific theories of human nature and the possible ways in which human behavior can be predicted and controlled—from one of the most influential behaviorists of the twentieth century and the author of *Walden Two*. "This is an important book, exceptionally well written, and logically consistent with the basic premise of the unitary nature of science. Many students of society and culture would take violent issue with most of the things that Skinner has to say, but even those who disagree most will find this a stimulating book." –Samuel M. Strong, *The American Journal of Sociology* "This is a remarkable book—remarkable in that it presents a strong, consistent, and all but exhaustive case for a natural science of human behavior...It ought to be...valuable for those whose preferences lie with, as well as those

whose preferences stand against, a behavioristic approach to human activity.” –Harry Prosch, Ethics

Black Swan Green David Mitchell, 2007-02-27 By the New York Times bestselling author of The Bone Clocks and Cloud Atlas | Longlisted for the Man Booker Prize Selected by Time as One of the Ten Best Books of the Year | A New York Times Notable Book | Named One of the Best Books of the Year by The Washington Post Book World, The Christian Science Monitor, Rocky Mountain News, and Kirkus Reviews | A Los Angeles Times Book Prize Finalist | Winner of the ALA Alex Award | Finalist for the Costa Novel Award From award-winning writer David Mitchell comes a sinewy, meditative novel of boyhood on the cusp of adulthood and the old on the cusp of the new. Black Swan Green tracks a single year in what is, for thirteen-year-old Jason Taylor, the sleepiest village in muddiest Worcestershire in a dying Cold War England, 1982. But the thirteen chapters, each a short story in its own right, create an exquisitely observed world that is anything but sleepy. A world of Kissingeresque realpolitik enacted in boys’ games on a frozen lake; of “nightcreeping” through the summer backyards of strangers; of the tabloid-fueled thrills of the Falklands War and its human toll; of the cruel, luscious Dawn Madden and her power-hungry boyfriend, Ross Wilcox; of a certain Madame Eva van Outryve de Crommelynck, an elderly bohemian emigré who is both more and less than she appears; of Jason’s search to replace his dead grandfather’s irreplaceable smashed watch before the crime is discovered; of first cigarettes, first kisses, first Duran Duran LPs, and first deaths; of Margaret Thatcher’s recession; of Gypsies camping in the woods and the hysteria they inspire; and, even closer to home, of a slow-motion divorce in four seasons. Pointed, funny, profound, left-field, elegiac, and painted with the stuff of life, Black Swan Green is David Mitchell’s subtlest and most effective achievement to date. Praise for Black Swan Green “[David Mitchell has created] one of the most endearing, smart, and funny young narrators ever to rise up from the pages of a novel. . . . The always fresh and brilliant writing will carry readers back to their own childhoods. . . . This enchanting novel makes us remember exactly what it was like.”—The Boston Globe “[David Mitchell is a] prodigiously daring and imaginative young writer. . . . As in the works of Thomas Pynchon

and Herman Melville, one feels the roof of the narrative lifted off and oneself in thrall.”—Time

The Production of Space Henri Lefebvre, 1992-04-08 Henri Lefebvre has considerable claims to be the greatest living philosopher. His work spans some sixty years and includes original work on a diverse range of subjects, from dialectical materialism to architecture, urbanism and the experience of everyday life. *The Production of Space* is his major philosophical work and its translation has been long awaited by scholars in many different fields. The book is a search for a reconciliation between mental space (the space of the philosophers) and real space (the physical and social spheres in which we all live). In the course of his exploration, Henri Lefebvre moves from metaphysical and ideological considerations of the meaning of space to its experience in the everyday life of home and city. He seeks, in other words, to bridge the gap between the realms of theory and practice, between the mental and the social, and between philosophy and reality. In doing so, he ranges through art, literature, architecture and economics, and further provides a powerful antidote to the sterile and obfuscatory methods and theories characteristic of much recent continental philosophy. This is a work of great vision and incisiveness. It is also characterized by its author's wit and by anecdote, as well as by a deftness of style which Donald Nicholson-Smith's sensitive translation precisely captures.

Agent, Person, Subject, Self Paul Kockelman, 2013 This book offers both a naturalistic and critical theory of signs, minds, and meaning-in-the-world. It provides a reconstructive rather than deconstructive theory of the individual, one which both analytically separates and theoretically synthesizes a range of faculties that are often confused and conflated: agency (understood as a causal capacity), subjectivity (understood as a representational capacity), selfhood (understood as a reflexive capacity), and personhood (understood as a sociopolitical capacity attendant on being an agent, subject, or self). It argues that these faculties are best understood from a semiotic stance that supersedes the usual intentional stance. And, in so doing, it offers a pragmatism-grounded approach to meaning and mediation that is general enough to account for processes that are as embodied and embedded as they are articulated and enminded. In particular, while this theory is focused on human-specific modes of meaning, it also offers a general theory of meaning, such that the agents, subjects and selves in question need not always, or even usually, map onto persons. And while this theory foregrounds agents, persons, subjects and selves, it does this by theorizing processes that often remain in the background of such (often erroneously) individuated figures: ontologies (akin to culture, but generalized across agentive collectivities), interaction (not only between people, but also between people and things, and anything outside or in-between), and infrastructure (akin to context, but generalized to include mediation at any degree of remove).

The Annotated Mona Lisa Carol Strickland, John Boswell, 2007-10 Like music, art is a universal language. Although looking at works of art is a pleasurable enough experience, to appreciate them fully requires certain skills and knowledge. --Carol Strickland, from the introduction to *The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern* * This heavily illustrated crash course in art history is revised and updated. This second edition of Carol Strickland's *The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric*

to Post-Modern offers an illustrated tutorial of prehistoric to post-modern art from cave paintings to video art installations to digital and Internet media. * Featuring succinct page-length essays, instructive sidebars, and more than 300 photographs, *The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern* takes art history out of the realm of dreary textbooks, demystifies jargon and theory, and makes art accessible—even at a cursory reading. * From Stonehenge to the Guggenheim and from Holbein to Warhol, more than 25,000 years of art is distilled into five sections covering a little more than 200 pages.

Through the Language Glass Guy Deutscher, 2010-08-31 A masterpiece of linguistics scholarship, at once erudite and entertaining, confronts the thorny question of how—and whether—culture shapes language and language, culture. Linguistics has long shied away from claiming any link between a language and the culture of its speakers: too much simplistic (even bigoted) chatter about the romance of Italian and the goose-stepping orderliness of German has made serious thinkers wary of the entire subject. But now, acclaimed linguist Guy Deutscher has dared to reopen the issue. Can culture influence language—and vice versa? Can different languages lead their speakers to different thoughts? Could our experience of the world depend on whether our language has a word for blue? Challenging the consensus that the fundamentals of language are hard-wired in our genes and thus universal, Deutscher argues that the answer to all these questions is—yes. In thrilling fashion, he takes us from Homer to Darwin, from Yale to the Amazon, from how to name the rainbow to why Russian water—a she—becomes a he once you dip a tea bag into her, demonstrating that language does in fact reflect culture in ways that are anything but trivial. Audacious, delightful, and field-changing, *Through the Language Glass* is a classic of intellectual discovery.

Book of Rhymes Adam Bradley, 2017-06-27 If asked to list the greatest innovators of modern American poetry, few of us would think to include Jay-Z or Eminem in their number. And yet hip hop is the source of some of the most exciting developments in verse today. The media uproar in response to its controversial lyrical content has obscured hip hop's revolution of poetic craft and experience: Only in rap music can the beat of a song render poetic meter audible, allowing an MC's wordplay to move a club-full of eager listeners. Examining rap history's most memorable lyricists and their inimitable techniques, literary scholar Adam Bradley argues that we must understand rap as poetry or miss the vanguard of poetry today. *Book of Rhymes* explores America's least understood poets, unpacking their surprisingly complex craft, and according rap poetry the respect it deserves.

A Thesaurus of English Word Roots Horace Gerald Danner, 2014-03-27 Horace G. Danner's *A Thesaurus of English Word Roots* is a compendium of the most-used word roots of the English language. As Timothy B. Noone notes in his foreword: "Dr. Danner's book allows you not only to build up your passive English vocabulary, resulting in word

recognition knowledge, but also gives you the rudiments for developing your active English vocabulary, making it possible to infer the meaning of words with which you are not yet acquainted. Your knowledge can now expand and will do so exponentially as your awareness of the roots in English words and your corresponding ability to decode unfamiliar words grows apace. This is the beginning of a fine mental linguistic library: so enjoy!" In *A Thesaurus of English Word Roots*, all word roots are listed alphabetically, along with the Greek or Latin words from which they derive, together with the roots' original meanings. If the current meaning of an individual root differs from the original meaning, that is listed in a separate column. In the examples column, the words which contain the root are then listed, starting with their prefixes, for example, dysacusia, hyperacusia. These root-starting terms then are followed by terms where the root falls behind the word, e.g., acouesthesia and acoumeter. These words are followed by words where the root falls in the middle or the end, as in such terms as bradyacusia and odynacusia.. In this manner, *A Thesaurus of English Word Roots* places the word in as many word families as there are elements in the word. This work will interest linguists and philologists and anyone interested in the etymological aspects of English language.

Post Memes Daniel Bristow, Alfie Bown, 2019 Art-form, send-up, farce, ironic disarticulation, pastiche, propaganda, trololololol, mode of critique, mode of production, means of politicisation, even of subjectivation -

memes are the inner currency of the internet's circulatory system. Independent of any one set value, memes are famously the mode of conveyance for the alt-right, the irony left, and the apoliticals alike, and they are impervious to many economic valuations: the attempts made in co-opting their discourse in advertising and big business have made little headway, and have usually been derailed by retaliative meming. POST MEMES: SEIZING THE MEMES OF PRODUCTION takes advantage of the meme's subversive adaptability and ripeness for a focused, in-depth study. Pulling together the interrogative forces of a raft of thinkers at the forefront of tech theory and media dissection, this collection of essays paves a way to articulating the semiotic fabric of the early 21st century's most prevalent means of content posting, and aims at the very seizing of the memes of production for the imagining and creation of new political horizons. With contributions from Scott and McKenzie Wark, Patricia Reed, Jay Owens, Thomas Hobson and Kaajal Modi, Dominic Pettman, Bogna M. Konior, and Eric Wilson, among others, this essay volume offers the freshest approaches available in the field of memes studies and inaugurates a new kind of writing about the newest manifestations of the written online. The book aims to become the go-to resource for all students and scholars of memes, and will be of the utmost interest to anyone interested in the internet's most viral phenomenon. ABOUT THE EDITORS ALFIE BOWN is the author of several books including The Playstation Dreamworld (Polity, 2017) and In the Event of Laughter: Psychoanalysis, Literature and Comedy (Bloomsbury, 2018). He is also a journalist for the Guardian, the Paris Review, and other outlets. DAN BRISTOW is a recovering academic, a bookseller, and author of Joyce and Lacan: Reading, Writing, and Psychoanalysis (Routledge, 2016) and 2001: A Space Odyssey and Lacanian Psychoanalytic Theory (Palgrave, 2017). He is also the co-creator with Alfie Bown of Everyday Analysis, now based at New Socialist magazine.

Holy Blood, Holy Grail Michael Baigent, Richard Leigh, Henry Lincoln, 2007-12-18 Is the traditional, accepted view of the life of Christ in some way incomplete? • Is it possible Christ did not die on the cross? • Is it possible Jesus was married, a father, and that his bloodline still exists? • Is it possible that parchments found in the South of France a century ago reveal one of the best-kept secrets of Christendom? • Is it possible that these parchments contain the very heart of the mystery of the Holy Grail? According to the authors of this extraordinarily provocative, meticulously researched book, not only are these things possible – they are probably true! so revolutionary, so original, so convincing, that the most faithful Christians will be moved; here is the book that has sparked worldwide controversy. Enough to seriously challenge many traditional Christian beliefs, if not alter them. – Los Angeles Times Book Review Like Chariots of the Gods?...the plot has all the elements of an international thriller. – Newsweek

Cultural Techniques Bernhard Siegert, 2015-05-01 In a crucial shift within posthumanistic media studies, Bernhard Siegert dissolves the concept of media into a network of operations that reproduce, displace, process, and reflect the distinctions fundamental for a given culture. Cultural Techniques aims to forget our traditional understanding of media so as to redefine the concept through something more fundamental than the empiricist study of a medium's individual or collective uses or of its cultural semantics or aesthetics. Rather, Siegert seeks to relocate media

and culture on a level where the distinctions between object and performance, matter and form, human and nonhuman, sign and channel, the symbolic and the real are still in the process of becoming. The result is to turn ontology into a domain of all that is meant in German by the word Kultur. Cultural techniques comprise not only self-referential symbolic practices like reading, writing, counting, or image-making. The analysis of artifacts as cultural techniques emphasizes their ontological status as “in-betweens,” shifting from firstorder to second-order techniques, from the technical to the artistic, from object to sign, from the natural to the cultural, from the operational to the representational. Cultural Techniques ranges from seafaring, drafting, and eating to the production of the sign-signal distinction in old and new media, to the reproduction of anthropological difference, to the study of trompe-l’oeils, grids, registers, and doors. Throughout, Siegert addresses fundamental questions of how ontological distinctions can be replaced by chains of operations that process those alleged ontological distinctions within the ontic. Grounding posthumanist theory both historically and technically, this book opens up a crucial dialogue between new German media theory and American postcybernetic discourses.
