French Secret Projects 3: French & European Spaceplane Designs 1964-1994 Jean-Christophe Carbonel, 2021-10-07 In 1963, Eugen Sanger, became head of the Eurospace organization which promoted the 'AeroSpace Transporter'. In response to a Eurospace call, aircraft makers in France, Germany and UK designed recoverable, winged spacecraft. From 1964 to 1970 the French government led studies to evaluate the feasibility of the concept. Those studies, under the leadership of the French Centre National d'Etudes Spatiales (CNES), coalesced into the Hermes spaceplane which was then adopted by the European Space Agency. In parallel, Germany and UK proposed fully recoverable designs while other countries, including Japan, India and Russia came to CNES to share ideas about spaceplane design. Unfortunately Hermes was never launched and by 1994 was abandoned after many alternative propositions were discussed. This book relates the story of these remarkable concepts, crossovers between aircraft and spacecraft beginning with the 'antipodal bomber' of 1944 and continuing to Aerospatiale STS-2000 project through the Transporteur Aero-Spatial, VERAS, AW Pyramid, Bumerang, Sanger II, HOTOL, Hermes, and Taranis. Non-European projects like Dyna-Soar, Hyperplane, HOPE, and MAKs are also covered. It provides a fascinating and detailed account of these projects which, being half-way between aircraft and spacecraft, have hitherto often been neglected by aviation writers and historians.

A New International History of the Spanish Civil War Michael Alpert, 1994-06-28 '...a lucid and scholarly account of an important and immensely complex subject...Dr. Alpert's command of a broad range of archival material, printed documents and secondary works in six languages is extremely impressive.' - P. Preston, London School of Economics and Political Science It is now twenty years since a study was dedicated to the international aspects of the Spanish Civil War and this new synthesis covering the whole of the era and setting it against major events of the late 1930s is well overdue. Michael Alpert takes full advantage of newly accessible archival sources to disentangle the intricacies of this complex issue.

Rearming the French Marcel Vigneras, 1957 The reemergence of French national forces in the war against the Axis Powers, and the role of large-scale American aid.

Hitler and Spain Robert H. Whealey, 2021-05-11 "An imperative starting point of any future inquiry concerning Nazi Germany's incursion into and manipulation of Spain's civil strife." —International History Review The Spanish Civil War, begun in July 1936, was a preliminary round of World War II. Hitler's and Mussolini's cooperation with General Franco resulted in the Axis agreement of October 1936 and the subsequent Pact of Steel of May 1939, immediately following the end of the Civil War. This study presents comprehensive documentation of Hitler's use of the upheaval in Spain to strengthen the Third Reich diplomatically, ideologically, economically, and militarily. While the last great cause drew all eyes to Western Europe and divided the British and especially the French internally, Hitler could pursue territorial gains in Eastern Europe. This book, based on little-known German records and recently opened Spanish archives, fills a major gap in our understanding of one of the twentieth century's most significant conflicts. Its comprehensive treatment of German-Spanish relations from 1936 through 1939, bringing together diplomatic, economic, military, and naval aspects, will be of great value to specialists in European diplomacy and the political economy of Nazi imperialism, as well as to all students of the Spanish Civil War. "A major contribution to understanding not only the Spanish conflict, but also the history of the thirties and, in particular, the failure of Britain, France and the Soviet Union to make common cause against fascist powers." —History Workshop Journal

The Spanish Civil War 1936-39 Patrick Turnbull, 2013-06-20 By the spring of 1936 an armed clash was imminent between the forces of Spain's extreme Left and extreme Right. Viewed largely as a confrontation between democracy and fascism, the resulting civil war proved to be of enormous international significance. Nazi Germany and Fascist Italy intervened to assist General Franco, while the Soviet Union came to the aid of the Republican forces. This book explains the background to the war and charts the course of the nearly three-year long conflict through to General Franco's victory. Photographs and colour plates illustrate the uniforms and equipment of the Republican and

Nationalist armies.

Air Power and Maneuver Warfare Martin van Creveld, Kenneth Brower, Steven Canby, 2012-08-01
An essential part of the Air War College curriculum consists of the study of military history and specific campaigns. Part 1 of this manuscript presents an attempt to clarify the relationship between air power and maneuver warfare since 1939, a subject that derives its importance from the fact that maneuver warfare has been the U.S. Army's official doctrine since the early eighties and remains so to the present day. Part 2 contains the collective wisdom of the military doctrine analysis of the Air University on the same subjects, as well as the way in which we have presented them.

Maneuver in War Charles Andrew Willoughby, 2005 An excellent study on the theory of maneuver with many historical illustrations, it is as applicable today as it was when published in 1939.

The Battle for Spain Antony Beevor, 2006-06-01 A fresh and acclaimed account of the Spanish Civil War by the bestselling author of Stalingrad and The Battle of Arnhem To mark the 70th anniversary of the Spanish Civil War's outbreak, Antony Beevor has written a completely updated and revised account of one of the most bitter and hard-fought wars of the twentieth century. With new material gleaned from the Russian archives and numerous other sources, this brisk and accessible book (Spain's #1 bestseller for twelve weeks), provides a balanced and penetrating perspective, explaining the tensions that led to this terrible overture to World War II and affording new insights into the war-its causes, course, and consequences.

The Deadly Stroke Warren Tute, 2007-10-18 With the defeat of the French forces by the Germans, Winston Churchill was determined that the French fleet would not fall into German hands, and to that end he ordered that every French ship from Alexandria to Martinique, Portsmouth to Dakar either surrender or be seized. Only those in Algeria committed to the Vichy government refused. In a tragic and ironic battle the British sank the French fleet at Oran, the author explores in detail the events surrounding this event. With an Introduction by Sir John Colville.

The Aircraft Encyclopedia Roy Braybrook, 1985 A guidebook with the history of aircraft technology and modern aircraft.

French Secret Projects 1: Post War Fighters Jean-Christophe Carbonel, 2016 Based on pre-war research and captured German wartime technology, a number of French jet, ramjet and rocket-powered aircraft reached at least prototype form. Vertical take-off, variable geometry wings and even flying boat concepts were among some of the most radical aircraft designs, studies and projects ever produced anywhere in the world. Driven by the need to equip its air forces, compete in export markets and catch-up with its international competitors, French companies gave free reign to their designers to come up with radical and unconventional aircraft.--Jacket.

Distributed Propulsion Technology Amir S. Gohardani, 2014 Distributed propulsion technology is one of the revolutionary candidates for future aircraft propulsion. In this book, which serves as the very first reference book on distributed propulsion technology, the potential role of distributed propulsion technology in future aviation is investigated. Following a historical journey that revisits distributed propulsion technology in unmanned air vehicles, commercial aircrafts, and military aircrafts, features of this specific technology are highlighted in synergy with an electric aircraft concept and a first-of-its-kind comparison between commercial and military aircrafts employing distributed propulsion arrangements. In light of propulsion/airframe integration and complementary technologies, such as boundary layer ingestion, thrust vectoring and circulation control, transpired opportunities and challenges are addressed in addition to a number of identified research directions proposed for future aircrafts. Moreover, a diverse set of distributed propulsion arrangements are considered. These include: small engines, gas-driven multi-fan architectures, turboelectric systems featuring superconductive and non-superconducting electrical machine technology, and electromagnetic fans. This book features contributions by the National Aeronautics and Space Administration (NASA) and the United States Air Force (USAF), and includes the first proposed official definition for distributed propulsion technology in subsonic fixed wing aircrafts.

Northwest Africa George Frederick Howe, 1957

The Rise and Fall of the French Air Force Greg Baughen,2018-04-17 On 10 May 1940, the French possessed one of the largest air forces in the world. On paper, it was nearly as strong as the RAF. Six weeks later, France had been defeated. For a struggling French Army desperately looking for air support, the skies seemed empty of friendly planes. In the decades that followed, the debate raged. Were there unused stockpiles of planes? Were French aircraft really so inferior? Baughen examines the myths that surround the French defeat. He explains how at the end of the First World War, the French had possessed the most effective air force in the world, only for the lessons learned to be forgotten. Instead, air policy was guided by radical theories that predicted air power alone would decide future wars. Baughen traces some of the problems back to the very earliest days of French aviation. He describes the mistakes and bad luck that dogged the French efforts to modernise their air force in the twenties and thirties. He examines how decisions made just months before the German attack further weakened the air force. Yet defeat was not inevitable. If better use had been made of the planes that were available, the result might have been different.

Case Red Robert Forczyk,2017-11-30 Even after the legendary evacuation from Dunkirk in June 1940 there were still large British formations fighting the Germans alongside their French allies. After mounting a vigorous counterattack at Abbeville and then conducting a tough defence along the Somme, the British were forced to conduct a second evacuation from the ports of Le Havre, Cherbourg, Brest and St Nazaire. While France was in its death throes, politicians and soldiers debated what to do – flee to England or North Africa, or seek an armistice. *Case Red* captures the drama of the final three weeks of military operations in France in June 1940, and explains the great impact it had on the course of relations between Britain and France during the remainder of the war. It also addresses the military, political and human drama of France's collapse in June 1940, and how the windfall of captured military equipment, fuel and industrial resources enhanced the Third Reich's ability to attack its next foe – the Soviet Union.

The Fall of France in the Second World War Richard Carswell,2019-02-01 This book examines how the fall of France in the Second World War has been recorded by historians and remembered within society. It argues that explanations of the fall have usually revolved around the four main themes of decadence, failure, constraint and contingency. It shows that the dominant explanation claimed for many years that the fall was the inevitable consequence of a society grown rotten in the inter-war period. This view has been largely replaced among academic historians by a consensus which distinguishes between the military defeat and the political demise of the Third Republic. It emphasizes the contingent factors that led to the military defeat. At the same time it seeks to understand the constraints within which France's policy-makers were required to act and the reasons for their policy-making failures in economics, defence and diplomacy.
