Advances in Optimization and Numerical Analysis S. Gomez, J.P. Hennart, 2013-03-09 In January 1992, the Sixth Workshop on Optimization and Numerical Analysis was held in the heart of the Mixteco-Zapoteca region, in the city of Oaxaca, Mexico, a beautiful and culturally rich site in ancient, colonial and modern Mexican civilization. The Workshop was organized by the Numerical Analysis Department at the Institute of Research in Applied Mathematics of the National University of Mexico in collaboration with the Mathematical Sciences Department at Rice University, as were the previous ones in 1978, 1979, 1981, 1984 and 1989. As were the third, fourth, and fifth workshops, this one was supported by a grant from the Mexican National Council for Science and Technology, and the US National Science Foundation, as part of the joint Scientific and Technical Cooperation Program existing between these two countries. The participation of many of the leading figures in the field resulted in a good representation of the state of the art in Continuous Optimization, and in an overview of several topics including Numerical Methods for Diffusion-Advection PDE problems as well as some Numerical Linear Algebraic Methods to solve related problems. This book collects some of the papers given at this Workshop.

JeongMee Yoon Bonnie Yochelson, 2019 Why do girls love pink toys, and boys love blue ones? The fine arts photographer Jeongmee Yoon (*1969, Seoul) poses this question in her work, The Pink and Blue Project, for which she began photographing Korean and American girls and boys in their rooms in 2005. The gender-specific color schemes quickly established themselves as an overarching phenomenon, independent of cultural or ethnic background. Yoon's impressive portraits, for which she spent hours carefully arranging pink or blue objects, question these color codes and the consumer habits of both parents and children. They reveal the connections linking gender identity and social norms, consumer culture, and media. She continued this project by visiting the children years later and capturing how their favorite colors had changed. Jeongmee Yoon was awarded the ILWOO Foundation Prize for her project.

100 Classic Toys David Smith, 2011 This fascinating book covers one hundred classic toys that have enchanted, captivated and enthralled generations of children. From the simplest building blocks to the most sophisticated robots, each toy included is still being manufactured or is easily available through sites like eBay. Why do some toys become classic? There are many reasons why particular toys stood out from their competitors. Perhaps the limitless creative possibilities of the LEGO brick, the timeless appeal of the dolls' house or the comforting presence of a favorite bear - whatever the secret, these toys and games have earned a special place in the hearts

of millions of children (and former children). The author presents the background on how each toy was created and explains why it has become a classic.
