Danger in Space Henry M. Holden, 2012-07-01 Explores the Apollo 13 mission, including the causes of the disaster aboard the spacecraft, how the astronauts fixed the problems, and how the crew were saved--Provided by publisher.

Apollo 13 Phil Coleman, 2017-08-22 APOLLO 13: Houston We Have A Problem - The True Story of the Apollo 13 Disaster Those that are familiar with Apollo 13 know that it was the seventh installment of the Apollo space program. It was classified as a manned mission by NASA as well as the third mission with the intention of landing on the moon, though it never actually succeeded in the lunar landing as it was aborted due to an oxygen tank explosion. On April 11th of 1970, the Apollo 13 craft was sent to launch at 13:13 CST, or 19:13 UTC. It originated from the Kennedy Space Center in Florida. The incident that caused its mission to fail happened two days into the endeavor, and it crippled the Service Module. This was vitally important for the proper functioning of the Command Module. Other hardships that had to be battled during flight included loss of cabin heat, a limited supply of power, a critical need for makeshift repairs to the system that removed carbon dioxide from the craft, and a shortage of potable water. Despite all of these things, the crew was able to safely return to Earth six days after they launched, on the 17th of April. This is the incredible story of the Apollo 13 disaster, and the breathtaking, miraculous turnaround that saw the entire crew return safe and well.

Surviving a Space Disaster Benjamin Tunby, 2018 Through vivid storytelling, this book tells the story of the Apollo 13 mission and includes survival tips and information about pop culture surrounding the event.--

Apollo 13 Michael D. Cole, 1995 Planned as the third U.S. mission to the moon and fated to become a major space emergency, the flight of Apollo 13 was a struggle for survival against the cold and emptiness of outer space. Give your readers

an unforgettable look at this mission.

Triumph Over Disaster Aboard Apollo 13 Henry M. Holden, 2004
Relates events of the April, 1970, flight of Apollo 13, the third mission to the Moon, which was aborted after an explosion critically damaged the command module and nearly claimed the lives of the three astronauts aboard.

Thirteen Henry S. F. Cooper, 1995-08 On April 13, 1970 an explosion rocked the moon-bound Apollo 13 craft, 205,000 miles from Earth, damaging engines and life-support systems. This minute-by-minute account of the only manned NASA mission to have malfunctioned outside Earth's orbit describes the entire episode.

Thirteen Henry S. F. Cooper, 1995-08-01 An examination of the Apollo 13 mission focuses on the explosion that jeopardized the astronauts' lives and NASA's efforts to prevent disaster.

Danger on Apollo 13 David Baker, 1988 The account of the 1970 explosion on a space flight that threatened the lives of three U.S. astronauts.

Apollo 13, 1970 (including Saturn V, CM-109, SM-109, LM7
David Baker, 2013 On the 13th of April 1970, Apollo 13 suffered an explosion. The planned lunar landing was instantly called off and the new challenge was to get the spacecraft back to Earth. Only hours before hurtling back into the atmosphere did they power up Apollo again - not knowing if it had been fatally damaged in the explosion. Here is the story of how a potential disaster became NASA's finest hour

Apollo 13 Robert Godwin, 2010 Book & DVD. Homer himself could not have written a more captivating story than the flight of Apollo 13. On 11 April 1970 veteran astronaut Jim Lovell and his crewmates Jack Swigert and Fred Haise rode atop the eighth launch of the Saturn V juggernaut to begin their ill-fated journey to the moon. The aptly named Command Module Odyssey and the reluctant Lunar Module -- lifeboat Aquarius were to take the three men to a date with the lunar highland area known as Fra Mauro

but fate and a faulty circuit in one of the vehicle's oxygen tanks would irrevocably alter their plans and turn the flight of Apollo 13 into an epic to rival the original Odyssey. After an explosion in the Service Module crippled the spacecraft while it was still outward bound the crew would spend several harrowing days in near frigid temperatures while the technicians at home worked around the clock to devise new and ingenious ways to keep them alive and bring them home safely. In 1970 some considered Apollo 13 a catastrophic failure but it has since been recognised as one of NASA's truly great moments, when the spirit of daring and ingenuity came to life in the team at Mission Control as they successfully brought the crew home. In this book, some of the rare official documentation of the voyage of Apollo 13 is collected and made commercially available for the first time. Bonus DVD includes: High Quality Video and ROM Content featuring: The NASA video documentary Houston We've Got A Problem; The Pre-Explosion in-flight television broadcast from Apollo 13; An exclusive video interview with Commander James Lovell; Video of the launch of Apollo 13; Nearly 600 Hasselblad photographs taken by the Apollo 13 crew; An extensive NASA acronym data base. The 198 page technical document Separation Procedures / Alternate & Abort Missions for Apollo 13. DVD Quality Video of: The Post-flight Apollo 13 Press Conference and all of the in-flight 16 mm movies.

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The Vintage Years of Airfix Box Art Roy Cross,2009-08-01 Airfix has been commercially producing plastic kits since 1952 and its models have been made by successive generations of young boys and men alike. In the 1960s, a talented graphic artist called Roy Cross was commissioned to paint some of the box art for Airfix, and for a ten-year-period he provided many of the glorious paintings seen on the boxes, setting new standards for realism and accuracy. Many are still being used today, a full four decades later. Inside the pages of this book are some of Roy's best artworks, shown here in full format and in superb detail, with many reproduced here in book form for the very first time. As well as his vintage box art, Roy has included many sketches and alternative versions of his Airfix box art. After Roy left Airfix in 1974, the company went through a turbulent time. The present owners are Hornby, who have ambitious plans for Airfix and the other brands it acquired including Scalextric and Corgi. The decade that Roy

Cross worked for Airfix, though, could be classed as their vintage era, with some of their finest models being produced then in their millions, ready for eager youngsters to build up into detailed miniature models of their favorite aircraft, ships and locomotives.

The Women of Little Lon Barbara Minchinton, 2021-08-16 A vivid account of a remarkable but little-known chapter in Melbourne's history Sex workers in nineteenth-century Melbourne were judged morally corrupt by the respectable world around them. But theirs was a thriving trade, with links to the police and political leaders of the day, and the leading brothels were usually managed by women. While today a city lane is famously named after Madame Brussels, the identities of the other 'flash madams', the 'dressed girls' who worked for them and the hundreds of women who solicited on the streets of the Little Lon district of Melbourne are not remembered. Who were they? What did their daily lives look like? What became of them? Drawing on the findings of recent archaeological excavations, rare archival material and family records, historian Barbara Minchinton brings the fascinating world of Little Lon to life. Barbara Minchinton is a historian and independent researcher. For several years she collaborated with a team of archaeologists on the interpretation of artefacts from Melbourne's Little Lon district. She is the co-editor of *The Commonwealth Block*, Melbourne, a historical archaeology of the city's working-class and immigrant communities, and the author of *The Women of Little Lon*.

Apollo's Angels Jennifer Homans, 2013-01-03 *Apollo's Angels* is a major new history of classical ballet. It begins in the courts of Europe, where ballet was an aspect of aristocratic etiquette and a political event as much as it was an art. The story takes the reader from the sixteenth century through to our own time, from Italy and France to Britain, Denmark, Russia and contemporary America. The reader learns how ballet reflected political and cultural upheavals, how dance and dancers were influenced by the Renaissance and French Classicism, by Revolution and Romanticism, by Expressionism and Bolshevism, Modernism and the Cold War. Homans shows how and why 'the steps' were never just the steps: they were a set of beliefs and a way of life. She takes the reader into the lives of dancers and traces the formal evolution of technique, choreography and performance. Her book ends by looking at the contemporary crisis in ballet now that 'the masters are dead and gone' and offers a passionate plea for the centrality of classical dance in our civilization. *Apollo's Angels* is a book with broad popular appeal: beautifully written and illustrated, it is essential reading for anyone interested in history, culture and art.

The Alphabet and the Algorithm Mario Carpo, 2011-02-04 The rise and fall of identical copies: digital technologies and form-making from mass customization to mass collaboration. Digital technologies have changed architecture—the way it is taught, practiced, managed, and regulated. But if the digital has created a

“paradigm shift” for architecture, which paradigm is shifting? In *The Alphabet and the Algorithm*, Mario Carpo points to one key practice of modernity: the making of identical copies. Carpo highlights two examples of identity crucial to the shaping of architectural modernity: in the fifteenth century, Leon Battista Alberti's invention of architectural design, according to which a building is an identical copy of the architect's design; and, in the nineteenth and twentieth centuries, the mass production of identical copies from mechanical master models, matrixes, imprints, or molds. The modern power of the identical, Carpo argues, came to an end with the rise of digital technologies. Everything digital is variable. In architecture, this means the end of notational limitations, of mechanical standardization, and of the Albertian, authorial way of building by design. Charting the rise and fall of the paradigm of identity, Carpo compares new forms of postindustrial digital craftsmanship to hand-making and the cultures and technologies of variations that existed before the coming of machine-made, identical copies. Carpo reviews the unfolding of digitally based design and construction from the early 1990s to the present, and suggests a new agenda for architecture in an age of variable objects and of generic and participatory authorship.

How Writing Came About Denise Schmandt-Besserat, 2010-01-01 An “utterly lucid, thoughtfully illustrated, and thoroughly convincing” book on the origins of the world’s oldest known system of writing (American Journal of Archaeology). One of American Scientist’s Top 100 Books on Science, 2001 In 1992, the University of Texas Press published *Before Writing, Volume I: From Counting to Cuneiform* and *Before Writing, Volume II: A Catalog of Near Eastern Tokens*. In these two volumes, Denise Schmandt-Besserat set forth her groundbreaking theory that the cuneiform script invented in the Near East in the late fourth millennium B.C.—the world’s oldest known system of writing—derived from an archaic counting device. *How Writing Came About* draws material from both volumes of this scholarly work to present Schmandt-Besserat’s theory in an abridged version for a wide public and classroom audience. Based on the analysis and interpretation of a selection of 8,000 tokens or counters from 116 sites in Iran, Iraq, the Levant, and Turkey, it documents the immediate precursor of the cuneiform script./DIV
