The Life of Sir Ernest Shackleton Hugh Robert
Mill, 1923

Polar Castaways Richard McElrea, David L.
Harrowfield, 2004 When Sir Ernest Shackleton's dreams of
crossing Antarctica foundered with his expedition ship
Endurance in the ice of the Weddell Sea in October 1915,
he could only wonder what had become of his support
party on the other side of the continent. This book tells that
story. The task of the Ross Sea component of the
expedition was to lay the all-important depots in support of
the traverse party to be led by Shackleton. The party was
dogged from the outset by lack of finance and inadequate
preparation, and matters were severely compounded when,
in May 1915, their ship Aurora was carried away from its
winter moorings. This left ten men stranded and without
proper equipment and supplies. At great personal hardship
and cost, they laid the depots across the Ross Ice Shelf to
Mt. Hope. Three men were to die during this courageous
and perilous endeavour. Aurora, refitted in New Zealand,

eventually sailed south amidst considerable controversy, to rescue the seven survivors. *Polar Castaways* provides the first in-depth account of the Ross Sea party, the drift of *Aurora* and the relief expedition under the command of polar veteran Captain J.K. Davis.--BOOK JACKET. Title Summary field provided by Blackwell North America, Inc. All Rights Reserved.

Shackleton's Boat Harding McGregor
Dunnett, 2015-08-24 The James Caird is an unlikely hero, a 23-foot lifeboat that completed the most desperate and celebrated open boat voyage in history. On board were Ernest Shackleton, Tom Crean and Frank Worsley, now some of the most recognised names in Antarctic and Polar literature/history. This is the story of that little boat from its commissioning by Worsley to its dramatic escape from Antarctica to its final resting place at Dulwich College in the UK. Shackleton's Boat is a worthy memorial to a vessel famous in maritime history, and a story whose heroism has inspired generations. * Similar to: 'Tom Crean - An Unsung Hero', 'Captain Francis Crozier - Last Man Standing?' and 'Seek the Frozen Lands'

Sir Ernest Shackleton Linda Davis, 2009 Most explorers are famous for their successes and triumphs, but Antarctic explorer Sir Ernest Shackleton never met his ultimate goal of crossing the Antarctic continent. Instead, he is best known for an expedition that took a horrible turn

for the worse. In January 1915, as Shackleton and his crew of 27 men sailed the Endurance through the pack ice of the Weddell Sea, the temperature suddenly plummeted. The slushy water surrounding the ship froze into a solid block of ice, trapping Endurance in the frozen sea. Slowly, the pressure from the moving ice floes crushed Endurance and pulled it down to a watery grave, marooning the men hundreds of miles from land. In an astonishing tale of survival, Shackleton led his men through more than 850 miles of the South Atlantic's treacherous seas. Never giving up hope for rescue and overcoming the worst of obstacles, he managed to miraculously save all 27 of his men.

The Ship Beneath the Ice Mensun Bound, 2024-02-27
As thrilling as any tale from the heroic age of exploration. ... Bound's account is a triumph. The storytelling is piano-wire taut, the writing saturated with polar moodiness. — Sunday Times The inside story of how the Endurance, Ernest Shackleton's legendary lost ship, was found in the most hostile sea on Earth, told by the expedition's Director of Exploration. On November 21, 1914, after sailing more than ten thousand miles from Norway to the Antarctic Ocean, the Endurance finally succumbed to the

surrounding ice. Ernest Shackleton and his crew had navigated the 144-foot, three-masted wooden vessel to Antarctica to become the first to cross the barren continent, but early season pack ice trapped them in place offshore. They watched in silence as the ship's stern rose twenty feet in the air and disappeared into the frigid sea, then spent six harrowing months marooned on the ice in its wake. Seal meat was their only sustenance as Shackleton's expedition to push the limits of human strength took a new form: one of survival against the odds. As this legendary story entered the annals of polar exploration, it inspired a new global race to find the wrecked Endurance, by all accounts the world's most unreachable shipwreck. Several missions failed, thwarted, as Shackleton was, by the unpredictable Weddell Sea. Finally, a century to the day after Shackleton's death, renowned marine archeologist Mensun Bound and an elite team of explorers discovered the lost shipwreck. Nearly ten thousand feet below the ice lay a remarkably preserved Endurance, its name still emblazoned on the ship's stern. The Ship Beneath the Ice chronicles two dramatic expeditions to what Shackleton called the most hostile sea on Earth. Bound experienced failure and despair in his attempts to locate the wreck, and, like Shackleton before him, very nearly found his vessel frozen in ice. Complete with captivating photos from the 1914 expedition and of the wreck as Bound and his team found it, this inspiring modern-day adventure narrative captures the intrepid spirit that joins two mariners across the centuries--both of whom accomplished the impossible.

South! Sir Ernest Shackleton, 2017-10-25 South! The Story of Shackleton's Last Expedition 1914-1917 is the factual blow-by-blow narrative of the ill-fated polar expedition of the Endurance from the mouth of the

Captain, Sir Ernest Shackleton himself. Part adventure tale, part story of survival, the British explorer's detailed journal is one of the most gripping tales of heroism and survival in the face of almost certain death to have ever been told.

Shackleton Sir Ernest Henry Shackleton, 2002 This omnibus combines Heart of the Antarctic and South, Ernest Shackleton's personal accounts of his polar expeditions.
