Shooting the Pacific War Thayer Soule,2014-10-17 Thayer Soule couldn't believe his orders. As a junior officer with no military training or indoctrination and less than ten weeks of active duty behind him, he had been assigned to be photographic officer for the First Marine Division. The Corps had never had a photographic division before, much less a field photographic unit. But Soule accepted the challenge, created the unit from scratch, established policies for photography, and led his men into combat. Soule and his unit produced films and photos of training, combat action pictures, and later, terrain studies and photographs for intelligence purposes. Though he had never heard of a photo-litho set, he was in charge of using it for map production, which would prove vital to the division. Shooting the Pacific War is based on Soule's detailed wartime journals. Soule was in the unique position to interact with men at all levels of the military, and he provides intriguing closeups of generals, admirals, sergeants, and privates -everyone he met and worked with along the way. Though he witnessed the horror of war firsthand, he also writes of the vitality and intense comradeship that he and his fellow Marines experienced. Soule recounts the heat of battle as well as the intense training before and rebuilding after each campaign. He saw New Zealand in the desperate days of 1942. His division was rebuilt in Australia following Guadalcanal. After a stint back in Quantico training more combat photographers, he went to Guam and then to the crucible of Iwo Jima. At war's end he was serving as Photographic Officer, Fleet Marine Force Pacific, at Pearl Harbor.

Intelligence Analysis National Research Council,Division of Behavioral and Social Sciences and Education,Board on Behavioral, Cognitive, and Sensory Sciences,Committee on Behavioral and Social Science Research to Improve Intelligence Analysis for National Security,2011-04-08 The U.S. intelligence community (IC) is a complex human enterprise whose success depends on how well the people in it perform their work. Although often aided by sophisticated technologies, these people ultimately rely on their own intellect to identify, synthesize, and communicate the information on which the nation's security depends. The IC's success depends on having trained, motivated, and thoughtful people working within organizations able to understand, value, and coordinate their capabilities. Intelligence Analysis provides up-to-date scientific guidance for the intelligence community (IC) so that it might improve individual and group judgments, communication between analysts, and analytic processes. The papers in this volume provide the detailed evidentiary base for the National Research Council's report, Intelligence Analysis for Tomorrow: Advances from the Behavioral and Social Sciences. The opening chapter focuses on the structure, missions, operations, and characteristics of the IC while the following 12 papers provide in-depth reviews of key topics in three areas: analytic methods, analysts, and organizations. Informed by the IC's unique missions and constraints, each paper documents the latest advancements of the relevant science and is a stand-alone resource for the IC's leadership and workforce. The collection allows readers to focus on one area of interest (analytic methods, analysts, or organizations) or even one particular aspect of a category. As a collection, the volume provides a broad perspective of the issues involved in making difficult decisions, which is at the heart of intelligence analysis.
