Age of Sail Christopher Slaney,2018-02-13 In 1976 a series of seemingly random events put the author at the helm of a small boat and introduced him to the girl he will marry. This is the account of voyage they dreamed of, turned into a reality thirty years later and survived.

Shipping Finance Stephenson Harwood,2018-07-31 Now in its fourth edition, and containing over 500 pages of fully revised and updated material, Shipping Finance includes an analysis of ship mortgage terms and conditions, and mortgagee rights across the main maritime jurisdictions. In addition, Shipping Finance provides an extensive discussion of the procedure and documentation for registering ships on a country-by-country basis, with detailed advice from local experts. Chapters include: shipping finance from a banker's perspective; the financing of secondhand ships; the financing of new buildings; assignments of insurances and earnings, guarantees, indemnities, charges, debentures and other security relied upon by financiers; the sale and purchase of secondhand ships; the role of insurance in shipping; Islamic finance; Chinese leasing; and restructuring. Shipping Finance is an essential reference tool for anyone involved in shipping finance including bankers, lawyers and shipowners.

Rig Ship for Ultra Quiet Andrew Karam,2002-01-01 You've seen The Hunt for Red October and wondered if it was real. Now you'll know. Rig Ship for Ultra Quiet -- a book about submarines, written by a submariner. Spend two months in a nuclear fast attack submarine off the coast of the Soviet Union at the end of the Cold War with Andrew Karam, a decorated veteran of the US submarine force.

California Is a Lee Shore James Duvall, 3rd,Pam Duvall,2011-02-01 California is a Lee Shore chronicles the cruising adventures of Jim and Pamela Duvall. They have sailed extensively along the California shoreline as well as the many islands of California. Their adventures, observations, conclusions, and a full cruising guide for California. This title also includes several stops along Baja California and the Mexican Riviera.

Fast Track to Cruising Steve Colgate,Doris Colgate,2004-12-10 Learn how to handle a cruising sailboat in as little as seven days—even if you’ve never sailed before! Who says you have to be an experienced daysailor before you can think about cruising? Steve and Doris Colgate know that most of us don’t have that kind of time. At the Offshore Sailing School, the Colgates have helped more than 100,000 adults—three-quarters of whom started as beginning sailors or complete newcomers--take the helm of a midsize cruising sailboat. Now Fast Track to Cruising offers these proven instructional methods to all aspiring sailors with big dreams and little time. This is the very first guide that teaches sailing and cruising together, taking you from your first sail to independent cruising in one leap. You can make that leap in as little as seven days—as in the Colgates’ “Fast Track to Cruising” course—or you can get there at a more leisurely pace. Either way, no other book will take you from your first tacking or docking maneuver to a mastery of navigation and diesel engines as efficiently as this one. America's most experienced sailing instructors present a thorough and easy to understand look at cruising. Leisure time is precious. Safety is paramount. The Colgates will help you maximize your time on the water.-- Gary Jobson, ESPN's lead sailing analyst and editor at large for Cruising World and Sailing World “Doris and Steve Colgate understand that people want to reach their sailing goals as quickly as possible and they've built the excellent Fast Track program to accomplish it.”--Bernadette Bernon, former editorial director of Cruising World magazine Together Steve and Doris Colgate have been teaching beginners to sail for over half a century. In Fast Track to Cruising they have included every concept and procedure you need to get yourself from a want-to-be sailor to one who is knowledgeable and competent to take the helm--with confidence and a smile.--Charles Mason, Executive Editor, SAIL magazine

Genetic Entropy John C. Sanford,2014 In this text, Sanford, a retired Cornell professor, shows that the Primary Axiom--the foundational evolutionary premise that life is merely the result of mutations and natural selection--is false. He strongly refutes the Darwinian concept that man is just the result of a random and pointless natural process.

Programming Interactivity Joshua Noble,2009-07-21 Make cool stuff. If you're a designer or artist without a lot of programming experience, this book will teach you to work with 2D and 3D graphics, sound, physical interaction, and electronic circuitry to create all sorts of interesting and compelling experiences -- online and off. Programming Interactivity explains programming and electrical engineering basics, and introduces three freely available tools created specifically for artists and designers: Processing, a Java-based programming language and environment for building projects on the desktop, Web, or mobile phones Arduino, a system that integrates a microcomputer prototyping board, IDE, and programming language for creating your own hardware and controls OpenFrameworks, a coding framework simplified for designers and artists, using the powerful C++ programming language BTW, you don't have to wait until you finish the book to actually make something. You'll get working code samples you can use right away, along with the background and technical information you need to design, program, build, and troubleshoot your own projects. The cutting edge design techniques and discussions with leading artists and designers will give you the tools and inspiration to let your imagination take flight.

Hidden History of Transportation in Los Angeles Charles P. Hobbs,2014-11-04 Los Angeles transportation's epic scale--its iconic freeways, Union Station, Los Angeles International Airport and the giant ports of its shores--has obscured many offbeat transit stories of moxie and eccentricity. Triumphs such as the Vincent Thomas Bridge and Mac Barnes's Ground Link buspool have existed alongside such flops as the Santa Monica Freeway Diamond Lane and the Oxnard-Los Angeles Caltrain commuter rail. The City of Angels lacks a propeller-driven monorail and a freeway in the paved bed of the Los Angeles River, but not for a lack of public promoters. Horace Dobbins built the elevated California Cycleway in Pasadena, and Mike Kadletz deployed the Pink Buses for Orange County kids hitchhiking to the beach. Join Charles P. Hobbs as he recalls these and other lost episodes of LA-area transportation lore.

Ecocriticism and Indigenous Studies Salma Monani,Joni Adamson,2016-08-05 This book addresses the intersections between the interdisciplinary realms of Ecocriticism and Indigenous and Native American Studies, and between academic theory and pragmatic eco-activism conducted by multiethnic and indigenous communities. It illuminates the multi-layered, polyvocal ways in which artistic expressions render ecological connections, drawing on scholars working in collaboration with Indigenous artists from all walks of life, including film, literature, performance, and other forms of multimedia to expand existing conversations. Both local and global in its focus, the volume includes essays from multiethnic and Indigenous communities across the world, visiting topics such as Navajo opera, Sami film production history, south Indian tribal documentary, Maori art installations, Native American and First Nations science-fiction literature and film, Amazonian poetry, and many others. Highlighting trans-Indigenous sensibilities that speak to worldwide crises of environmental politics and action against marginalization, the collection alerts readers to movements of community resilience and resistance, cosmological thinking about inter- and intra-generational multi-species relations, and understandings of indigenous aesthetics and material ecologies. It engages with emerging environmental concepts such as multispecies ethnography, cosmopolitics, and trans-indigeneity, as well as with new areas of ecocritical research such as material ecocriticism, biosemiotics, and media studies. In its breadth and scope, this book promises new directions for ecocritical thought and environmental humanities practice, providing thought-provoking insight into what it means to be human in a locally situated, globally networked, and cosmologically complex world.

Stung! Lisa-ann Gershwin,2014-09-25 Discusses why the jellyfish population has exploded in recent years and why their dominance is indicative of a declining ocean ecosystem.

Saving Sailing Nicholas D. Hayes,2009-10 Saving Sailing makes an eloquent case for the revival of family sailing -- and similar uses of free time for lifelong pastimes that enrich our lives. The issue: participation in sailing is declining in America, down more than 40% since 1997 and 70% since 1979. In this wide-ranging book, researcher and avid sailor Nicholas Hayes explains why. The book shows how pressures on free time have increased, and how, in response, many Americans have turned to less rewarding forms of passive or overly structured activities and away from lifelong, family-based, multi-generational recreation. Saving Sailing builds a case for choosing how to spend free time better, seeking quality experiences with families and friends through lifelong pastimes like sailing. The main challenge, he suggests, is to develop an active system of mentoring, especially between generations. The lessons are broader than sailing, with useful ideas for all parents, for anyone seeking to strengthen the social fabric of American communities, and for those involved in programming for youth and adult activities. Author Nick Hayes is a market researcher and partner at the consulting firm FiveTwelve Group, and is active in the Milwaukee sailing scene. He has studied sailing, sailors, and sailing clubs for years, and interviewed more than 1,200 sailors worldwide since 2003 for this book. He lives in Milwaukee, Wisconsin.

Twenty Small Sailboats to Take You Anywhere John Vigor,1999-08 John Vigor turns the spotlight on twenty seaworthy sailboats that are at home on the ocean in all weather. These are old fiberglass boats, mostly of traditional design and strong construction. All are small, from 20 feet to 32 feet overall, but all have crossed oceans, and all are cheap. Choosing the right boat to take you across an ocean or around the world can be confusing and exasperating, particularly with a tight budget. Vigor sets out to remedy that in this book. He compares the designs and handling characteristics of 20 different boats whose secondhand market prices start at about \$3,000. Interviews with experienced owners (featuring valuable tips about handling each boat in heavy weather) are interspersed with line drawings of hulls, sail plans, and accommodations. Vigor has unearthed the known weaknesses of each boat and explains how to deal with them. He rates their comparative seaworthiness, their speed, and the number of people they can carry in comfort. If you have ever dreamed the dream this book can help you turn it into reality.
