European Pack for Visiting Auschwitz-Birkenau Memorial and Museum Alicja

Białecka, 2010-01-01 Taking groups of students To The Auschwitz-Birkenau Memorial and Museum is a heavy responsibility, but it is a major contribution to citizenship if it fosters understanding of what Auschwitz stands for, particularly when the last survivors are at the end of their lives. It comes with certain risks, however. This pack is designed for teachers wishing to organise student visits to authentic places of remembrance, and For The guides, academics and others who work every day with young people at Auschwitz. There is nothing magical about visiting an authentic place of remembrance, and it calls for a carefully thought-out approach. To avoid the risk of inappropriate reactions or the failure to benefit from a large investment in travel and accommodation, considerable preparation and discussion is necessary before the visit and serious reflection afterwards. Teachers must prepare students for a form of learning they may never have met before. This pack offers insights into the complexities of human behaviour so that students can have a better understanding of what it means to be a citizen. How are they concerned by what happened at Auschwitz? Is the unprecedented process of exclusion that was practised in the Holocaust still going on in Europe today? In what sense is it different from present-day racism and anti-Semitism? The young people who visit Auschwitz in the next few years will be witnesses of the last witnesses, links in the chain of memory. Their generation will be the last to hear the survivors speaking on the spot. The Council of Europe, The Polish Ministry of Education And The Auschwitz-Birkenau Memorial and Museum are jointly sponsoring this project aimed at preventing crimes against humanity through Holocaust remembrance teaching.

Music Scenes Andy Bennett, Richard A. Peterson, 2004 While more than 80 percent of the world's commercial music is controlled by four multinational firms, most music is made and enjoyed in diverse situations divorced from such corporate behemoths. These fourteen original essays examine the fascinating world of music scenes, those largely inconspicuous sites where clusters of musicians, producers, and fans explore their common musical tastes and distinctive lifestyle choices. Although most music scenes come and go with hardly a trace, they nevertheless give immense satisfaction to their participants, and a few - New York bop jazz, Merseybeat, Memphis rockabilly, London punk, Bronx hip-hop - achieve fame and spur musical innovations. To date, serious study of the scenes phenomenon has focused mainly on specific music scenes while paying less attention to recurrent dynamics of scene life, such as how individuals construct and negotiate scenes to the various activities. This volume remedies that neglect. The editors distinguish between three types of scenes - local, translocal, and virtual - which provide the organizing framework for the essays. Aspects of local scenes, which are confined to specific areas, are explored through essays on Chicago blues, rave, karaoke, teen pop, and salsa. The section on translocal scenes, which involve the coming together of scattered local scenes around a particular type of music and lifestyle, includes articles on Riot Grrrls, goths, art music, and anarcho-punk. Aspects of virtual scenes, in which fans communicate via the internet, are illustrated using alternative country, the Canterbury sound, postrock, and Kate Bush fans. Also included is an essay that shows how the social conditions in places where jazz was made influenced that music's development.

The Unicorn Project Gene Kim, 2019-11-26 The Phoenix Project wowed over a half-million readers. Now comes the Wall Street Journal Bestselling The Unicorn Project! “The Unicorn Project is amazing, and I loved it 100 times more than The Phoenix Project...”—FERNANDO CORNAGO, Senior Director Platform Engineering, Adidas “Gene Kim does a masterful job of showing how ... the efforts of many create lasting business advantages for all.”—DR. STEVEN SPEAR, author of The High-Velocity Edge, Sr. Lecturer at MIT, and principal of HVE LLC. “The Unicorn Project is so clever, so good, so crazy enlightening!”—CORNELIA DAVIS, Vice President Of Technology at Pivotal Software, Inc., Author of Cloud Native Patterns This highly anticipated follow-up to the bestselling title The Phoenix Project takes another look at Parts Unlimited, this time from the perspective of software development. In The Unicorn Project, we follow Maxine, a senior lead developer and architect, as she is exiled to the Phoenix Project, to the horror of her friends and colleagues, as punishment for contributing to a payroll outage. She tries to survive in what feels like a heartless and uncaring bureaucracy and to work within a system where no one can get anything done without endless committees, paperwork, and approvals. One day, she is approached by a ragtag bunch of misfits who say they want to overthrow the existing order, to liberate developers, to bring joy back to technology work, and to enable the business to win in a time of digital disruption. To her surprise, she finds herself drawn ever further into this movement, eventually becoming one of the leaders of the Rebellion, which puts her in the crosshairs of some familiar and very dangerous enemies. The Age of Software is here, and another mass extinction event looms—this is a story about rebel developers and business leaders working together, racing against time to innovate, survive, and thrive in a time of unprecedented uncertainty...and opportunity. “The Unicorn Project provides insanely useful

insights on how to improve your technology business.”—DOMINICA DEGRANDIS, author of Making Work Visible and Director of Digital Transformation at Tasktop ——— “My goal in writing The Unicorn Project was to explore and reveal the necessary but invisible structures required to make developers (and all engineers) productive, and reveal the devastating effects of technical debt and complexity. I hope this book can create common ground for technology and business leaders to leave the past behind, and co-create a better future together.”—Gene Kim, November 2019

Introduction to Management of Reverse Logistics and Closed Loop Supply Chain Processes Donald F. Blumberg, 2004-11-29 Increasing legislative and environmental pressure requires businesses to become more responsive to products that either have been returned or that are at the end of their useful lives. Life cycles are getting shorter, and efficient handling can save large amounts of money since many materials can be extracted and reused or redistributed. Reverse lo

From Cave Man to Cave Martian Manfred "Dutch" von Ehrenfried, 2019-04-05 This book explores the practicality of using the existing subsurface geology on the Moon and Mars for protection against radiation, thermal extremes, micrometeorites and dust storms rather than building surface habitats at great expense at least for those first few missions. It encourages NASA to plan a precursor mission using this concept and employ a “Short Stay” Opposition Class mission to Mars as the first mission rather than the “Long Stay” concept requiring a mission that is too long, too dangerous and too costly for man’s first missions to Mars. Included in these pages is a short history on the uses of caves by early humans over great periods of time. It then describes the

ongoing efforts to research caves, pits, tunnels, lava tubes, skylights and the associated technologies that pertain to potential lunar and Mars exploration and habitation. It describes evidence for existing caves and lava tubes on both the Moon and Mars. The work of noted scientists, technologists and roboticists are referenced and described. This ongoing work is more extensive than one would think and is directly applicable to longer term habitation and exploration of the Moon and Mars. Emphasis is also given to the operational aspects of working and living in lunar and Martian caves and lava tubes.

Young People Re-Generating Politics in Times of Crises Sarah Pickard, Judith Bessant, 2017-07-31 This book provides insight into the diverse ways young people from around the world are regenerating politics in innovative and multifaceted ways. The authors, who include academics and activists, challenge claims that young people are apolitical, apathetic and living up to the 'me generation' stereotype. Contributions cover a rich body of case examples of traditional and new forms of youth politics in response to situated injustices and political and socio-economic crises. Significant and optimistic, the collection presents strong evidence from across the globe that these developments are not isolated incidences, but are in fact part of a systemic, large-scale transformation leading to a regeneration of the political landscape by young people. The book is aimed at students and scholars in the fields of politics, sociology, policy studies and youth and childhood studies.

Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
