Catherine the Great Hourly History, 2017-10-31 Catherine the Great is one of the most influential rulers in Russian history. Though born in Prussia, she endeavored to gain the throne of Russia and went on to be the longest-ruling empress in Russian history. She ruled as an enlightened despot, promoting the principles of the European Enlightenment as she sought to modernize her beloved country. She reformed the educational system of Russia, creating a national system that utilized modern educational theory in a co-educational setting. She attracted some of the most brilliant thinkers to her court and engaged their assistance in modernizing the arts and sciences as well as the Russian economic system. Because of her efforts, she ruled over what is considered the Golden Age of Russian Enlightenment. Inside you will read about... ✓ The Early Life of an Empress ✓ The Dawn of a New Era ✓ A Patron of the Arts ✓ Catherine the Warrior ✓ Catherine's Personal Life and Death And much more! Catherine the Great counted among her successes many glorious military victories which succeeded in expanding Russia's realm to over 200,000 square miles. She was, by all accounts, an efficacious leader and reformer in Russian history. Despite her professional successes, her personal life was far from ideal. Catherine never loved her husband and was alleged to have been complicit in his assassination. She never remarried, instead taking a string of lovers only for as long as they held her interest. She had three children, none of whom she claimed were fathered by her husband, Peter III. Despite her promiscuity, she was a generous lover, and many of her former lovers remained devoted to her throughout her life. She lived her life passionately, and can even be described as an early feminist, doing what she wanted. This book tells the story of this unconventional woman in a concise,

entertaining, and informative manner.

**Bioeconomy** Iris Lewandowski, 2017-12-11 This book is open access under a CC BY 4.0 license. This book defines the new field of Bioeconomy as the sustainable and innovative use of biomass and biological knowledge to provide food, feed, industrial products, bioenergy and ecological services. The chapters highlight the importance of bioeconomy-related concepts in public, scientific, and political discourse. Using an interdisciplinary approach, the authors outline the dimensions of the bioeconomy as a means of achieving sustainability. The authors are ideally situated to elaborate on the diverse aspects of the bioeconomy. They have acquired in-depth experience of interdisciplinary research through the university's focus on "Bioeconomy", its contribution to the Bioeconomy Research Program of the federal state of Baden-Württemberg, and its participation in the German Bioeconomy Council. With the number of bioeconomy-related projects at European universities rising, this book will provide graduate students and researchers with background information on the bioeconomy. It will familiarize scientific readers with bioeconomy-related terms and give scientific background for economists, agronomists and natural scientists alike.

**Fishes of the World** Joseph S. Nelson, Terry C. Grande, Mark V. H. Wilson, 2016-04-25 Take your knowledge of fishes to the next level. *Fishes of the World*, Fifth Edition is the only modern, phylogenetically based classification of the world's fishes. The updated text offers new phylogenetic diagrams that clarify the relationships among fish groups, as well as cutting-edge global knowledge that brings this classic reference up to date. With this resource, you can

classify orders, families, and genera of fishes, understand the connections among fish groups, organize fishes in their evolutionary context, and imagine new areas of research. To further assist your work, this text provides representative drawings, many of them new, for most families of fishes, allowing you to make visual connections to the information as you read. It also contains many references to the classical as well as the most up-to-date literature on fish relationships, based on both morphology and molecular biology. The study of fishes is one that certainly requires dedication—and access to reliable, accurate information. With more than 30,000 known species of sharks, rays, and bony fishes, both lobe-finned and ray-finned, you will need to master your area of study with the assistance of the best reference materials available. This text will help you bring your knowledge of fishes to the next level. Explore the anatomical characteristics, distribution, common and scientific names, and phylogenetic relationships of fishes Access biological and anatomical information on more than 515 families of living fishes Better appreciate the complexities and controversies behind the modern view of fish relationships Refer to an extensive bibliography, which points you in the direction of additional, valuable, and up-to-date information, much of it published within the last few years Fishes of the World, Fifth Edition is an invaluable resource for professional ichthyologists, aquatic ecologists, marine biologists, fish breeders, aquaculturists, and conservationists.

The Castle Richard Mosse, 2018-09 The Castle by Richard Mosse documents refugee camps located along mass migration routes into the European Union from the Middle East and Central Asia, via Turkey. Mosse's panoramic images are composed of hundreds of video frames derived from footage made with a thermo-graphic camera designed

for long-range border enforcement. Truncating time and space, these composite heat maps draw attention to the hostile environments in which asylum-seekers endure a Byzantine state of limbo.

**Europe and the Black Sea Region** Dominik Gutmeyr, 2019-05

When the scientific study of the Black Sea Region began in the late 18th and early 19th centuries, initially commissioned by adjacent powers such as the Habsburg and the Russian empires, this terra incognita was not yet considered part of Europe. The eighteen chapters of this volume show a broad range of thematic foci and theoretical approaches - the result of the enormous richness of the European macrocosm and the BSR. The microcosms of the many different case studies under scrutiny, however, demonstrate the historical dimension of exchange between the allegedly opposite poles of 'East' and 'West' and underscore the importance of mutual influences in the development of Europe and the BSR.

*St Petersburg and the Russian Court, 1703-1761 P.*

Keenan, 2013-06-24 This book focuses on the city of St Petersburg, the capital of the Russian empire from the early eighteenth century until the fall of the Romanov dynasty in 1917. It uses the Russian court as a prism through which to view the various cultural changes that were introduced in the city during the eighteenth century.

**Ethnic Identity and Imperial Power** Nico Roymans, 2004 This study explores the theme of Batavian ethnicity and ethnogenesis in the context of the Early Roman empire. Its starting point is the

current view in the social and historical sciences of ethnicity as a culturally determined, subjective construct that is shaped through interaction with an ethnic 'other'. The study analyses literary, epigraphic and archaeological sources relating to the Batavian image and self-image against the backdrop of Batavian integration into the Roman world. The Batavians were intensively exploited by the Roman authorities for the recruitment of auxiliary soldiers, with the result that their society developed into a full-blown military community.--Jacket.

**Bioenergy Production by Anaerobic Digestion** Nicholas

Korres, Padraig O'Kiely, John A.H. Benzie, Jonathan S. West, 2013-08-29

Interest in anaerobic digestion (AD), the process of energy production through the production of biogas, has increased rapidly in recent years. Agricultural and other organic waste are important substrates that can be treated by AD. This book is one of the first to provide a broad introduction to anaerobic digestion and its potential to turn agricultural crops or crop residues, animal and other organic waste, into biomethane. The substrates used can include any non-woody materials, including grass and maize silage, seaweeds, municipal and industrial wastes. These are all systematically reviewed in terms of their suitability from a biological, technical and economic perspective. In the past the technical competence and high capital investment required for industrial-scale anaerobic digesters has limited their uptake, but the authors show that recent advances have made smaller-scale systems more viable through a greater understanding of optimising bacterial metabolism and productivity. Broader issues such as life cycle assessment and energy policies to promote AD are also discussed.

**New Architecture and Technology** Gyula Sebestyen, Christopher Pollington, 2007-06-07 Many books have covered the topics of architecture, materials and technology. 'New Architecture and Technology' is the first to explore the interrelation between these three subjects. It illustrates the impact of modern technology and materials on architecture. The book explores the technical progress of building showing how developments, both past and present, are influenced by design methods. It provides a survey of contemporary architecture, as affected by construction technology. It also explores aspects of building technology within the context of general industrial, social and economic developments. The reader will acquire a vocabulary covering the entire range of structure types and learn a new approach to understanding the development of design.

Bauhaus Dream-house Katerina Rüedi, 2010 This original study brings critical social theory to bear on the ideas of architectural and design education at the Bauhaus - tracing the spread and influence of these ideas worldwide. Written for those in the fields of architectural and design education, architectural history and critical pedagogy, it is also for teachers and students in German art and cultural history.

*Bauhaus 1919-1933* Barry Bergdoll, Leah Dickerman, 2009 The Bauhaus, the school of art and design founded in Germany in 1919 and shut down by the Nazis in 1933, brought together artists, architects and designers in an extraordinary conversation about modern art. *Bauhaus 1919-1933*, published to accompany a major multimedia exhibition at MoMA, is the first comprehensive treatment of the subject by MoMA since 1938 and offers a new generational perspective on the 20th century's most influential experiment in artistic education. It brings together works in a broad range of mediums, including industrial design, furniture, architecture,

graphics, photography, textiles, ceramics, theatre and costume design, and painting and sculpture - many of which have rarely if ever been seen outside of Germany. Featuring about 400 colour plates and a rich range of documentary images, this publication includes two overarching images by the exhibition's curators, Leah Dickerman and Barry Bergdoll, concise interpretive essays on key objects by over twenty leading scholars, and an illustrated, narrative chronology.

**Settlement and Metalworking in the Middle Bronze Age and Beyond** Andy M. Jones, James Gossip, Henrietta Quinnell, 2015  
Between 2008 and 2011 excavations were undertaken by the Cornwall Archaeological Unit at Tremough, near Penryn, Cornwall. The site is situated on a plateau overlooking the Carrick Roads, historically one of the busiest waterways in Cornwall. The excavations led to a large number of significant archaeological features being uncovered ranging from Neolithic pits to Bronze Age structures and late prehistoric enclosures. Foremost of these sites were a Middle Bronze roundhouse (circa 1500-1300 cal BC) and a large circular Late Bronze Age enclosure (circa 1000-800 cal BC). Importantly, the roundhouse was found to contain stone molds associated with the production of socketed tools and pins, and traces of metalworking were found inside the building. As such, the excavations have provided the first evidence for metalworking inside a Middle Bronze Age roundhouse in southern England, as well as radiocarbon dating for a range of metalwork forms. As part of the project finds of metalwork from other roundhouses in the South West region have been reassessed. The Late Bronze Age enclosure is the first of its type to found in the South West of Britain. It encircled a large number of pits and postholes, some of which were associated with rectangular post-built structures. A carefully made cairn of burnt stone beside a

large pit and a second large pit containing burnt stone and pottery were also investigated. These may have been associated with cooking or perhaps with a small-scale episode of metalworking, as the tip of a sword mold was found in one of the pits. The significance of the investigated sites is fully discussed with regard to their relationships with other prehistoric sites on the plateau and in terms of their wider context with other sites in the South West and beyond.

**The Road to Rescue** Mietek Pemper, 2018-05-15 “Don’t thank me for your survival, thank your valiant Stern and Pemper, who stared death in the face constantly.”—Oskar Schindler in a speech to his released Jewish workers in May 1945. Steven Spielberg’s Oscar-winning film *Schindler’s List* popularized the true story of a German businessman who manipulated his Nazi connections and spent his personal fortune to save some 1,200 Jewish prisoners from certain death during the Holocaust. But few know that those lists were made possible by a secret strategy designed by a young Polish Jew at the Płaszów concentration camp. Mietek Pemper’s compelling and moving memoir tells the true story of how Schindler’s list really came to pass. Pemper was born in 1920 into a lively and cultivated Jewish family for whom everything changed in 1939 when the Germans invaded Poland. Evicted from their home, they were forced into the Kraków ghetto and, later, into the nearby camp of Płaszów where Pemper’s knowledge of the German language was put to use by the sadistic camp commandant Amon Göth. Forced to work as Göth’s personal stenographer from March 1943 to September 1944—an exceptional job for a Jewish prisoner—Pemper soon realized that he could use his position as the commandant’s private secretary to

familiarize himself with the inner workings of the Nazi bureaucracy and exploit the system to his fellow detainees' advantage. Once he gained access to classified documents, Pemper was able to pass on secret information for Schindler to compile his famous lists. After the war, Pemper was the key witness of the prosecution in the 1946 trial against Goth and several other SS officers. *The Road to Rescue* stands as a historically authentic testimony of one man's unparalleled courage, wit, defiance, and bittersweet victory over the Nazi regime.
